

Tank Trap Pyramid Barriers

To give your security real strength, whether it's to prevent vehicles being stolen or possible terrorist attacks, you need the complete, cost-effective perimeter security provided by our tank trap barriers.

The pointed pyramidal design has been specially designed to stop any size vehicle driving over them without being impaled. Each 2500kg unit consists of three 900mm square pyramids with interlocking connectors that just slot into place, making this simple system highly secure - whatever the length of your site perimeter.

Tank Trap Pyramid Barriers

Type	Length	Height	Width	Weight
TTPB	2700mm	900mm	900mm	2500kg

Important note: Prior to lifting older / pre-used blocks check the lifting pin for wear / corrosion and check the block for cracks. If the block is cracked or the pin is worn it could fail when being lifted.
