

# Flexcrete

Roofdex - Monodex - Biodex

## Colour Matching Service

In addition to our standard range of colours, Flexcrete offers a bespoke colour matching service so that our entire range of Decorative Protective Coatings can be supplied to meet customer requirements. Please contact us for further information.

Due to the nature of the print process, the colours shown are only indicative of those which are realised, as the true colours will only be seen when products are installed on the actual substrate. Furthermore, different light conditions and different substrate textures will influence the appearance and perception of colours. Natural weathering of the coatings will cause a slight colour change over time.

# Flexcrete - Concrete Repair & Protection

## Decorative Protective Coatings

**Roofdex HB** - Highly elastomeric weatherproof membrane

**Monodex Smooth** - Advanced, styrene acrylic anti-carbonation coating (15 year life)

**Monodex Ultra** - Economic facade coating with high CO<sub>2</sub> diffusion resistance (10 year life)

**Monodex Textured** - Flexible high relief textured coating

**Monodex UVC** - UV curing elastomer with high vapour permeability

**Monosil** - Clear impregnating silane/siloxane waterproofing

**Biodex Sheen** - Biostatic sheen finish hygiene coating

**Biodex HB** - High build matt finish biostatic coating

## Mortars (EN1504-3)

**Monomix** - High build structural mortar (R3 + R4)

**Monolite** - High build cosmetic mortar (R2)

**Monolevel** - Engineering quality fairing coat (R2 + R4)

**Fastfill** - Rapid setting high strength mortar (R4)

## Cementitious Coatings (EN1504-2)

**Cementitious Coating 851** - Waterproof, chloride resistant coating. Reinstates effective concrete cover

**Cemprotec Elastic** - Elastomeric grade waterproofing

**Cemprotec E-Floor** - High flow waterproof deck coating

**Cemprotec E942** - Epoxy modified coating for enhanced chemical resistance
