

The AUTOPA Warehouse Column Protector

The AUTOPA Warehouse Column Protector is designed to protect pillars and columns in industrial and warehouse environments from vehicular damage. Manufactured from galvanised mild steel it is a hard wearing barrier suitable for internal and external use.

AUTOPA’s Warehouse Column Protector is made up of a variety of different sections (each sold separately), allowing a barrier to be created to suit a site’s exact needs. Barrier legs are supplied flanged only and are available in two heights; 235mm and 610mm above ground.

Product details

Barrier Leg Height: available in 235mm or 610mm above ground
Rail Height: 160mm
Rail Depth: 40mm

Installation & use

Column Protectors require bolting down to a suitable concrete surface (no less than 300mm in depth) by means of one 16mm bolt per leg.
Barrier Legs can be turned face inwards or outwards as required to suit the needs of a site.
A joint support piece is required to secure every join (two per hoop).
This product is guaranteed for 12 months (*if installed and used correctly*).
