

Cycle Security Rail

An extremely simple and effective way to secure a bicycle, the VELOPA Cycle Security Rail is fabricated from 15mm diameter mild steel bar with two flanges for attaching to a suitable wall. The Cycle Security Rail is particularly suited to domestic or internal environments, yet the galvanising will ensure it retains its finish for years, no matter where it is used. The Cycle Security Rail is also suitable for securing groundsman/garden tools.

The VELOPA Cycle Security Rail is supplied with the necessary fixing bolts and sheer nuts for installation to a suitable brick or concrete wall.

<u>Part Number</u>	<u>Description</u>	<u>Weight (kg)</u>
138 200 201	Cycle Security Rail	2.0kg

Product details

- 15mm diameter tube
- 830mm length

Installation & use

Position the rail to the required height (approximately 800mm for bicycles, recommended.)

Mark and drill holes in suitable concrete/brick wall. Bolt Cycle Security Rail to wall.

This product is guaranteed for 12 months (if installed and used correctly).
