

SYGEF ECTFE

Highest reliability under extreme conditions

The piping system for aggressive applications

The SYGEF ECTFE system
ensures maximum safety.

Extremely reliable

The SYGEF ECTFE system also performs excellently under extreme conditions, consistently and reliably. Limited maintenance and a long service life ensure considerable cost reductions.

For the transport of aggressive media such as concentrated sulfuric acid (H_2SO_4) or hydrogen peroxide (H_2O_2) under high pressure and temperature conditions, alternative materials such as PP, PVC or PVDF quickly reach their limits. At the same time, due to their lengthy assembly times, high weight and exterior corrosion susceptibility, lined steel pipes are not an entirely satisfying system solution either.

In contrast, the ECTFE system from GF Piping Systems was designed specifically as a high-end solution for extreme conditions. The piping system has been proven to be extremely resistant and reliable for the transport of bases or highly concentrated acids. At the same time, users benefit from quick assembly, a long system service life, and lower initial costs than welded PFA systems. The combination with the latest IR welding technology from GF Piping Systems provides the highest level of safety for people, the environment and the production process.

SYGEF meets the highest requirements since 45 years

With the ECTFE system we are expanding the established SYGEF brand family by a safe, reliable and cost reducing high-end solution for extremely aggressive media. SYGEF ECTFE is suitable for exceptionally demanding applications in the industrial sector and combines highest chemical, pressure and temperature resistance with economic and efficient operation.

For nearly 45 years, the SYGEF fluoropolymer systems have been used in industrial applications with high demands for physical properties such as pressure, temperature and chemical resistance, as well as highest purity requirements in the high purity sector. SYGEF systems are known across all industries for the highest requirements in terms of material and manufacturing quality.

With the new SYGEF ECTFE system, GF Piping Systems has expanded its proven solutions with a complete system, which sets new standards for transporting particularly aggressive media such as highly concentrated sulfuric acid. The ECTFE product portfolio includes the complete range of pipes, fitting and innovative jointing technology. This gives users a suitable solution that complements the existing industrial portfolio of PP-, PVC- or PVDF-plastic piping

systems. Similar to all SYGEF system solutions, the particularly robust ECTFE system is produced at the world's largest clean room plant for fluoropolymer products in Ettenheim, Germany. The fully controlled processes coupled with unique quality assurance warranties 100% traceability of each individual product.

The ECTFE fluoropolymer system benefits wherever other plastic piping system solutions reach their limits or metal pipes are chemically attacked. Alternative materials like PFA or PTFE can be quickly, reliably and cost-effectively substituted by ECTFE. Compared to PFA ECTFE enables higher pressure ranges and allows a streamlined and efficient installation design. The ECTFE system is about 50% more cost-effective than IR-welded PFA solutions.

Safe handling of aggressive media

The SYGEF ECTFE piping system shows its advantages when it comes to manufacturing, transport and filling of concentrated chemicals under high temperature and pressure. This property makes ECTFE an ideal addition to the SYGEF fluoropolymer family. Due to faster assembly, lower initial costs and longer service life compared to alternative solutions, an economical transport of particularly aggressive media is achieved. The system is well suited for the chemical process industry, water treatment and microelectronics.

+ Safe and reliable

The ECTFE system enables safe handling of chemicals including those with a pH value below 2 and above 12. At the same time, the high-end system solution is absolutely reliable thanks to advanced IR welding technologies.

+ Long system lifetime

Aggressive media often considerably affect the service life of piping systems. Due to its extremely high resistance, ECTFE reduces maintenance costs and eliminates process interruptions.

+ 200 % higher pressure range

Due to its excellent mechanical properties, ECTFE allows a 200% higher pressure range than PFA. This provides users with more efficient processes and higher safety standards.

+ 20 % more efficient pipe volume

Thanks to its high mechanical stability, the wall thickness of the ECTFE has optimal SDR and is 20% more efficient compared to PFA. Thereby the system enables higher flow rates with equal or less space requirements.

+ Low initial costs

Compared to the widely used PFA solutions, ECTFE is also characterized by significant cost savings and optimum permeation characteristics. The initial costs are 50% lower than those of IR-welded PFA piping systems.

+ 85 % faster assembly

The ECTFE components are securely connected in a few minutes using most advanced IR-welding technology. Compared to pipes made of lined steel, installation time is significantly reduced.

Best quality warranted by accredited test laboratory

Safe and reliable

From the characteristics of the raw material to the quality control of the finished part: GF Piping Systems ensures that the warranted properties are met thanks to its unique laboratory expertise.

GF Piping Systems examines the material, jointing technology, and products beyond mandatory standards in detail at its accredited laboratory (ISO/IEC 17025) in Schaffhausen (Switzerland). The guaranteed characteristics of the applied ECTFE raw materials are tested by GF Piping Systems. Despite decades of collaboration with material suppliers, GF Piping Systems strictly adheres to the principle of "trust and verify." SYGEF ECTFE has been and is continuously tested under temperature, also with chemicals, under long-term conditions. So you can be assured that information from our

chemical experts is based on decades of experience and various tests. Your medium is tested by GF Piping Systems under application conditions on real components. Additional details are also provided by the microscopic inspection of the parts morphology and the IR-joints. Besides important insights regarding production process and correct fusion parameters, the effect of test and application conditions is also carefully inspected. Has the product been chemically attacked? Extremely experienced staff members examine the samples and products not only visually but also using infrared microscopy.

Please note: The above list is only intended as a guideline and does not replace an in-depth review of material suitability for the particular application. The information is based on our experience and is state of the art. This data consists only of general indicators. In practice, however, other factors such as concentration, pressure and jointing technology must also be taken into consideration. The technical data is not binding and does not constitute expressly warranted characteristics of the goods. Please contact gss@georgfischer.com for help with selecting the right materials.

Online tool Chemical resistance

Our teams of experts have decades of experience in the chemical resistance of materials. The online tool ChemRes PLUS provides you with the most important basic information.

The ChemRes PLUS Online Tool from GF Piping Systems summarizes a large amount of data about materials and media and presents it visually. Choose among all materials and solvent components of the GF Piping Systems product portfolio and compare them to get a comprehensive overview.

- Select the medium you want to transport
- Select the pressure/temperature point corresponding to your requirements
- ChemRes PLUS shows you the suitable materials in a clearly arranged table

Jointing technology

Customizing and training

Application

Storage of acid

The transport of aggressive media in particular, such as highly concentrated sulfuric acid, requires an exceptionally reliable piping system to ensure safe handling at all times. The ECTFE assortment is used to fill the tank and subsequently transport such medias. In this case, one of the tanks contains 98 % sulfuric acid, a very corrosive liquid.

Special features

Highest safety requirements

Safety is the top priority when handling aggressive media. For this reason, the highest safety requirements must be met at every work step or production process.

Double protection

For safety reasons, two valves are always used redundantly for applications such as these. This ensures that filling is interrupted even if one of the valves does not close.

Pneumatic actuators

Electric actuators should be avoided when handling combustible or explosive media. The use of pneumatic actuators adds a maintenance-free and efficient unit to the process.

Low stress installation

- Lowest stress production
- Stress relieved pipes (annealed)
- Joining technology (IR)
- Design & installation

Your benefits

- Extreme corrosion resistance and reliability when handling aggressive chemicals
- Great permeation and temperature resistance
- Low initial and maintenance costs
- Long system service life

Application

Dosing sodium hypochlorite

The ECTFE range can also be used effectively for drinking water treatment. In the application example, SYGEF ECTFE is used for a dosing system in water treatment. A sodium hypochlorite solution is dosed into water for disinfection and preparation for drinking water use.

Special features

Highest safety requirements

Safety is the top priority when handling aggressive media. For this reason, the highest safety requirements must be met at every work step or production process.

Double protection

For safety reasons, two valves are always used redundantly for applications such as these. This ensures that filling is interrupted even if one of the valves does not close.

Ultrasonic Flow Meter

The U1000 V2 is based on non-contact ultrasonic measurement and can be installed without service interruption. It provides precise results, cost-effective operation and supports digital interfaces.

Offering planning assistance

The experts from GF Piping Systems will provide you with detailed information on materials, chemical resistance, dimensions, joining technology, installation techniques, approvals and standards.

Your benefits

- Extreme corrosion resistance and reliability when handling aggressive chemicals
- Great permeation and temperature resistance
- Low initial and maintenance costs
- Long system service life

Fast and easy installation thanks to infrared

In the area of pressure piping systems for industrial applications there are high requirements for mechanical stability, reproducibility and quality of the jointing technology. The IR-110 A is the new generation of infrared welding machines from GF Piping Systems. With its automation, intuitive handling and system safety, it ensures the highest efficiency for all users.

User-friendly and easy to operate: The IR-110 A

Advantages of welding with the IR-110 A

Compared to conventional butt welding, the infrared technology is distinguished by short fusion times, high reproducibility and highest reliability. The contact-free jointing of the components by IR-welding reduces the warm-up time by more than 30%, eliminating the adaptation, which often results in various weld bead formations. Sticking of the pipe

surface to the heating element is not possible. The IR-110 A from GF Piping Systems impresses with a fully automated welding process that reduces application errors and directly detects and reports faults. An integrated process and quality control system makes the welding process traceable and reportable at all times and ensures the best product quality.

Services of GF Piping Systems

Optimal planning, installation and operation

The specialists at GF Piping Systems support you throughout all phases of your project. They help you to optimally plan, install and operate your plastic piping system. Therefore, they reduce unnecessary time and material losses for you and keep downtimes and other risks as short as necessary.

Recommended services

Engineering

We check the design of your piping system, support you with the choice of materials and components as well as with the correct installation. Our 60 years of experience with plastic systems help you to reduce your own risks.

Customizing

Customized special parts and solutions for special tasks are available in all required dimensions. Even unusual applications in challenging installation scenarios can be implemented easily, safely and on time.

Digital Product Libraries

The digital product libraries by GF Piping Systems allow planning with real-life dimensions and automatically generated parts lists, facilitating digital cooperation. They help reduce planning errors and shorten your project times.

Next steps

In this brochure you have received the most important information and technical details. But nothing replaces a personal conversation with an expert from GF Piping Systems. It is all about your needs and how we can support you in your daily business challenges. If you have not already done so, make an appointment today.

On the GF Piping Systems website you will find specialized contact persons in your area. There you will also find further information on the product, including technical data sheets and operating instructions as well as relevant certificates and approvals.

- Appointment with an expert from GF Piping Systems
- Advice on the benefits of the solution for you
- Information on reference applications
- Help with selection and calculations
- Support in all project phases

Model:

- For all metric GF Flange Adaptors
- Hardness: 70° Shore EPDM, 75° Shore FKM
- EPDM: approved acc. to DVGW Water W 270, KTW recommendation
- Centering on the inner diameter of the screw crown
- material steel insert: carbon steel
- Rubber-steel body combined with rubber profile cord ring

di FA are the suitable inner diameters of flanges adaptors

Pipe clip type 060 PP metric

Model:

- Material: clip and safety clip PP black, UV resistant
- **Minimum order quantity: standard packaging SP or gross packaging GP**
- Accidental opening of the safety clip is not possible
- Clip and safety clip are not assembled in the packaging.
- Pipes with flanges can be installed directly

IR-110 A Automated Fusion Machine

Model:

- Fully equipped automated infrared fusion machine with integrated working table for use under clean room conditions
- Welding of PVDF SYGEF (Standard/Plus), ECTFE SYGEF, PP grey PROGEF (Standard/Plus), PP-n PROGEF Natural, PE100 ecoFIT
- Dimensions d20-110 mm
- User friendly touch-screen interface 12.1" with various languages
- 4 USB interfaces, LAN Ethernet interface, 230 V Output
- Automated facer, clamping slide and heater
- Integrated video camera and temperature sensors
- Movable clamping units
- Clamping inserts d20-90 mm (8 pcs. per dimension)
- End caps PE d20-110 mm (4 pcs. per dimension)
- Shavings collection tray
- Transport box with integrated pallet
- 1-phase AC (50/60 Hz) 230V L/N/PE
- Power supply cable 230V EU Standard
- Torx key for facing blades (KW3)
- Cleaning brush
- Label printer
- Instruction manual

d-d (mm)	Code	SP	Weight (kg)
20 - 110	790 164 001	1	250.000

Clamping inserts

- The clamping inserts are different for each dimension. They are used to clamp and position the pipe components.

d (mm)	Code	SP	Weight (kg)	Pieces
20	790 164 022	0	0.099	1
25	790 164 023	0	0.097	1
32	790 164 024	0	0.093	1
40	790 164 025	0	0.088	1
50	790 164 026	0	0.081	1
63	790 132 156	0	0.085	1
75	790 132 157	0	0.087	1
90	790 132 158	0	0.064	1

Set of facing knives

- A set includes two facing knives and six screws. Each facing knife has four blades. The blade may be turned three times before it must be replaced.

d-d (mm)	Code	SP	Weight (kg)	Pieces
20 - 110	790 132 061	0	0.007	2

IR-63 Plus Fusion Machine

Model:

- Fully-equipped manually operated infrared fusion machine with integrated remote welding unit
- Welding of PVDF SYGEF (Standard/Plus), ECTFE SYGEF, PP-H PROGEF (Standard/Plus), PP-n PROGEF Natural, PE100 ecoFIT, PFA
- Dimensions d20-63 mm
- Monochrome display with icons and various languages
- 2 USB interfaces
- Heating and facing element
- Clamping slide with movable clamping units
- Clamping inserts d20-63 mm (8 pcs. per dimension)
- End caps PE d20-63 mm (4 pcs. per dimension)
- Pipe stop
- Clean-room compatible accessory tray with tools
- Transport box
- 1-phase AC (50/60 Hz) 230V L/N/PE
- Power supply cable 230 V
- Extension cable for clamping slide, heater and facing tool for remote welding (5m each)
- Label printer
- Instruction manual

Note:

Clamping inserts PFA (inch) on request

d-d (mm)	Code	SP	Weight (kg)
20 - 63	790 131 005	1	50.000

Clamping inserts

- The clamping inserts are different for each dimension. They are used to clamp and position the pipe components.

d (mm)	Code	SP	Weight (kg)	Pieces
20	790 131 038	1	0.140	1
25	790 131 039	1	0.090	1

90	790 132 158	0	0.064	1

Set of facing knives

- A set includes two facing knives and six screws. Each facing knife has four blades. The blade may be turned three times before it must be replaced.

d-d (mm)	Code	SP	Weight (kg)	Pieces
20 - 110	790 132 061	0	0.007	2

IR-225 Plus Fusion Machine

Model:

- Fully-equipped manually operated infrared fusion machine with integrated working table for use under clean room conditions
- Welding of PVDF SYGEF (Standard/Plus), ECTFE SYGEF, PP-H PROGEF (Standard/Plus), PP-n PROGEF Natural, PE100 ecoFIT
- Dimensions d63-225 mm
- Monochrome display with icons and various languages
- 2 USB interfaces
- Heating and facing element
- Clamping slide with movable clamping units
- Cooling fan
- Clamping inserts d63-225 mm (8 pcs. per dimension)
- End caps PE d63-225 mm (4 pcs. per dimension)
- Pipe stop
- Transport box with integrated pallet (stainless steel)
- 1-phase AC (50/60 Hz) 230V L/N/PE or 3-phase AC (50/60 Hz) 400V/230VL1/L2/L3/N/PE
- Connecting cable 400V - 230V
- Additional tools
- Label printer
- Instruction manual

d-d (mm)	Code	Weight (kg)
63 - 225	790 133 009	453.000

Clamping inserts

- The clamping inserts are different for each dimension. They are used to clamp and position the pipe components.

d (mm)	Code	SP	Weight (kg)	Pieces
63	790 133 026	1	0.700	1
75	790 133 027	1	0.400	1
90	790 133 028	1	0.691	1
110	790 133 029	1	0.644	1
125	790 133 030	1	0.500	1
140	790 133 031	1	0.600	1
160	790 133 032	1	0.600	1
180	790 133 463	1	0.560	1
200	790 133 033	1	0.700	1
225	790 133 034	1	0.270	1

Set of facing knives

- A set includes two facing knives and eight screws. Each facing knife has four blades. The blade may be turned three times before it must be replaced.

d-d (mm)	Code	SP	Weight (kg)	Pieces
63 - 225	790 133 046	1	0.125	2

Set of end caps

- A set includes 4 end caps. The end caps are different for each dimension. The ends of the pipe **must** be closed. The caps prevent heat loss due to airflow in the fusion zone and guarantee optimum fusion results of the pipe components.

d (mm)	Code	Weight (kg)	Pieces
20	790 131 030	0.040	4
25	790 131 031	0.010	4
32	790 131 032	0.088	4
40	790 131 033	0.005	4
50	790 131 034	0.005	4
63	790 131 035	0.023	4
75	790 133 036	0.095	4
90	790 133 037	0.028	4
110	790 133 038	0.180	4

Label Printer

- Label 36 mm included, order Label 24 mm separately

description	Code	Weight (kg)
Label Printer Brother PT-P900W	790 131 066	2.740
Ribbon 24 mm Brother TZ251	790 131 065	0.100

Cleaning tissue KO-TON-R

Minimum order quantity 100 pieces

- This cleaning tissue is suitable for the cleaning of the welding zone of piping components, because it is lint free and clean room checked.

Code	Weight (kg)
790 122 085	0.005

Tangit KS Cleaner

- Special cleaner for plastic fusion connections in the material of PP, PE, PVDF and PB
- Suitable for Tangit Rapid. Must not be used for solvent cementing
- DVGW approved
- DW 5290 BR 0464

Size	Code	SP	Weight (kg)
1 liter	799 298 023	8	0.872

Notes

This image shows a full page of blank white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page, providing a guide for writing. There are no margins, text, or other markings on the paper.
