

Marchenet®

Aluminium handrails supports

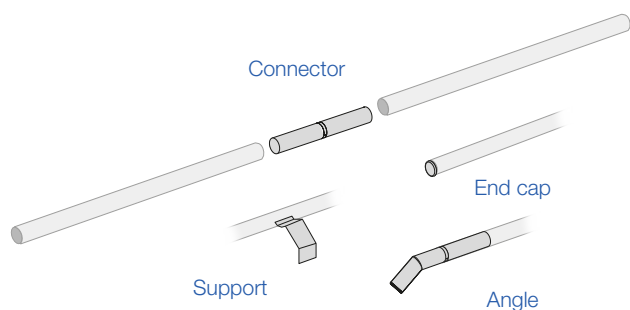

The system

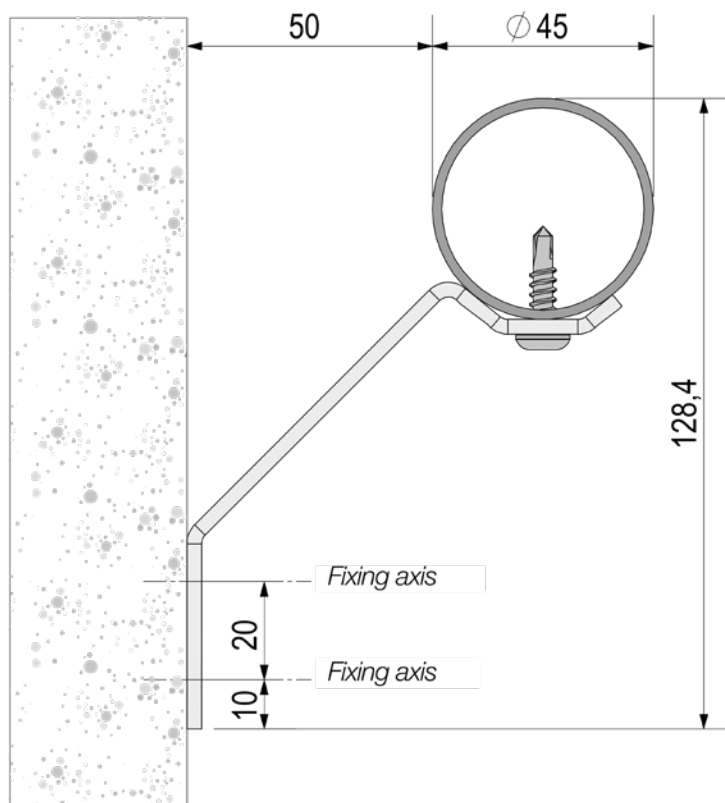

- ✓ Guidance and safety function
- ✓ Visual contrast
- ✓ Fast and easy to install
- ✓ Compatible with the dani alu Marchenet (stair treads) range and entire range of dani alu balustrading systems

The accessories

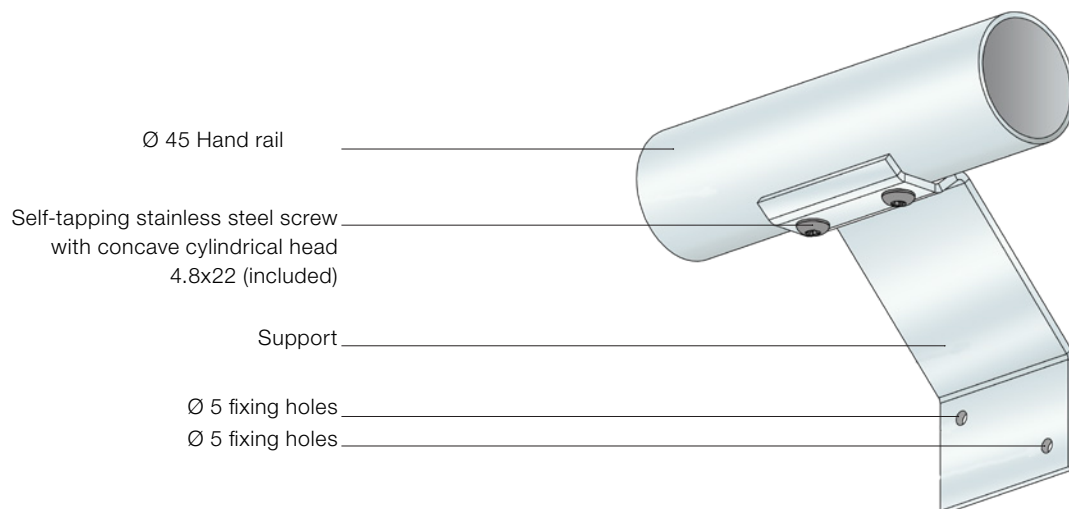

The hand rails are delivered in 3 m lengths to be cut on site, and are connected together using connectors. The unit is continuous with a constant handrail radius. The supports fixed to the hand rail provide discrete fixing to the wall. The ends are easy to identify both visually and to the touch and angled finish for safety.

Finish

Danilac powder coated aluminium, choice of RAL colours.

Aluminium PPC, cleaning and care information available on www.danialu.com or using this **QR code**.

Field of use

The hand rail on supports can be combined with the Marchenet product line (step treads, visually contrasting riser band, pedotactile plate) and the Panorama, Lotentic and Barnet guard rail product line for accessible flat roofs.

Find these products on the web site www.danialu.com
