

2019 Parts List

PROFILED SHEETING FEBRUARY 2019 PARTS LIST

Use this simple checklist to get what you need faster

To process your orders swiftly, please provide the following information:

- Full delivery address including house number and postcode
- Where possible, site contact name and telephone number
- Quote reference
- Quote price supplied against each item
- Order in pallet, banded or pack quantities
- Clear product descriptions including colour
- Delivery restrictions/specific vehicle requirements
- Include site contact details with vehicle offload
- Preferred delivery date

PROFILED SHEETING

Eternit has been backing British farming for more than 100 years with the only fibre cement profiled sheeting made in Britain. It's here to stay.

APPROVED
VENTILATION
SYSTEM
DESIGN

Protected Open Ridge

For effective outlet ventilation
in agricultural buildings

As the external air of a building moves up the slope of the roof due to wind or heat, the air is deflected away by the open ridge upstands. This increases the draw of air through the open vent from within the building. Not only does this aid internal ventilation it prevents rain and unwanted elements from entering the building.

In addition to the traditional fibre cement soffit strip, a polycarbonate alternative is available from Eternit to allow more natural light into the building.

Eternit can assist with design and technical advice to obtain optimum air space for livestock, machinery and storage of goods while adhering to health and safety guidance.

The protected open ridge is one of the ventilation design systems available from our vast range of products.

Please speak to your Area Sales Manager regarding soffit width options available.

See page 10 for additional product information.

New E-Luminate™

Brighter working environments

Designed to maximise light

The more we can replicate the natural environment inside a livestock or stable building, the better it is for the animals and you.

At Eternit, we have been investigating ways that we can help improve the living conditions for animals whilst retaining the performance of the building and not adding additional overheads like electricity and maintenance. E-Luminate increases natural light reducing energy costs, making a brighter future for brighter working environments.

E-Luminate is a technical product solution which can be used with P6/P3 painted sheet colour options in the following sizes:

P6 1220mm, 1375mm, 1525mm, 1675mm, 1825mm

P3 1525mm, 2450, 3050mm.

Maximum sheet quantities apply per order. POA.

Please call your Area Sales Manager for information.

Applications

- Roofs & Cladding
- Storage
- Garages & Sheds
- Stables

COLOUR RANGES

Request a sample

You can simply visit: eternit.co.uk

Painted colour range

Experience gained over many years has shown that the Eternit colour range will meet the wide ranging design requirements in both rural and urban areas. All the colours have been chosen for their ability to harmonise with the most commonly used building materials – brick, slate, stone, concrete and timber. Use colour codes (in brackets) when creating product codes.

Black
(GQ 60)

Van Dyke Brown
(BS 08 B 29)

Gunmetal Grey
(BS 18 B 25)

Brown
(GQ 78)

Cloud Grey
(GS 92)

Tawny Brown
(GQ 80)

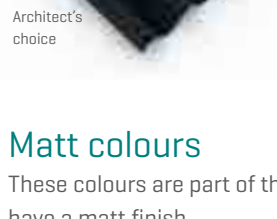

Slate Blue
(BS 18 B 29)

Laurel Green
(BS 12 B 29)

Architect's
choice

Matt colours

These colours are part of the standard colour range but have a matt finish.

Bracken (12)

Sherwood (17)

Natural Grey

Natural Grey is the standard unpainted finish for Profile 6 and Profile 3.

Natural Grey

Farmscape

Anthracite sheets have a pigmented surface layer. Together with subtle variations in tone inherent in any natural cementitious product, the appearance will blend with almost any landscape from the day the building is erected. Only available for Profile 6.

Anthracite (Pigmented
surface layer on
Profile 6 only)

E-Luminate™

Off-white is the colour used on the underside of painted P6 and P3 sheets – see opposite page for sheet sizes.

Off-White

E-Luminate™

E-Luminate* products feature a special off-white paint coating to a painted sheet underside, researched and designed to increase light to internal livestock areas or agricultural buildings. Only available on painted sheets in specific lengths. POA.

For further information please contact customer services.

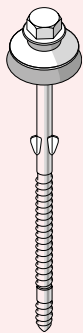

* IMPORTANT: E-Luminate - the permeability of the surface exposed to the weather should not be any less than the permeability of the inner surface, otherwise the sheets could bow excessively as they absorb moisture from rain and possibly cracks could form. Although the specialist paint is vapour permeable, it does reduce the permeability of the products and so, when the underside of fibre cement sheets are painted, the top surface also has to be painted. Therefore E-Luminate is not suitable with non-painted sheets.

Access to CAD drawings can be obtained by emailing techuk@etexgroup.co.uk

SERVICES

Getting our knowledge to you and your project smoothly and efficiently

Customer Services

Eternit is committed to providing outstanding customer care and is staffed by experienced personnel:

E-mail infouk@etexgroup.com

To find your nearest stockist, please visit: eternit.co.uk

Technical Advisory Team

Specifiers require prompt, knowledgeable and detailed responses to a vast range of enquiries covering everything from the embodied energy of a typical roof tile, to the different ventilation options available.

Email techuk@etexgroup.co.uk

Our Technical Advisory Team is staffed by a qualified team with specialist knowledge not only of all Eternit products, but also crucially, how those systems integrate with other roofing components and comply with Building Regulations, Health and Safety, environmental and other critical roofing criteria.

E-mail techuk@eternit.co.uk

SUSTAINABILITY & STANDARDS

Credits, credentials and clarity of information

Quality standard

The Eternit UK factory is ISO 9001, 14001 and ISO OHSAS 18001 accredited. It achieves the highest standards in quality, health and safety and the environment.

CE Marking

All of our products covered by an EN Standard carry an appropriate CE Mark. This means that our products meet the performance requirements and have a guaranteed level of quality.

BREEAM and the Code for Sustainable Homes

Credits gained from specifying our A-rated products, combined with additional credits from BES 6001 make our products more beneficial to the specifier.

01 ORDERING

- All orders must be emailed through
- Email ordersuk@etexgroup.com
- Verbal orders will not be accepted
- When your order is processed, an order acknowledgement will automatically be sent
- Discrepancies should be communicated to Customer Services immediately
- Items marked POA (price on application) are represented by pale red or green shading. Please speak to your Area Sales Manager for a quotation
- Items marked POA are not available

Amendments to orders

- Amendments to delivery orders cannot be accepted the day prior to the planned delivery date
- Amendments to orders can only be accepted if the order has not been shipped and in the case of additions, there is adequate space remaining on the vehicle

Cancellations

- 24 hours notice of cancellation of an order placed by the purchaser is required to be given to the Company. Failure to provide such notice before the scheduled delivery date will entitle Eternit to charge 25% of the cancelled order value
- Persistent cancellation of placed orders by the purchaser, even with 24 hours notice, could result in future orders not being accepted
- No cancellations will be accepted for MTO products

Made to order products

- Made to order items are not stocked as standard and may be subject to a lead time and minimum order quantity. Please check these details with Customer Services
- Orders cannot be amended or cancelled once production has commenced
- The lead time for the supply of made to order products will be confirmed at the time of order
- Written confirmation, accepting our made to order terms of sale, will be required prior to order

02 DELIVERY

- Deliveries must comply with Eternit's minimum order quantities
- Deliveries below minimum order quantities may be subject to an additional small order surcharge
- All deliveries are made between 8:00am - 5:00pm at unspecified times
- Deliveries are made to kerbside and require hardstanding ground
- Charges will be applied to all deliveries which take over 1 hour
- A member of staff needs to be on site to accept delivery
- Drivers have the right to refuse to offload material if deemed unsafe
- Orders must be delivered on the same delivery date, in full to the same location
- Eternit endeavour to deliver on the agreed date. However, the date or time cannot be guaranteed and we do not accept liability of consequential losses
- Customers must inform Eternit of vehicle/access restrictions

Small order charges

- The minimum order value is £1000. There will be a delivery surcharge of £150 for any orders below this amount. Please speak to our Customer Service Team for delivery options that may help avoid these surcharges

Lead times

- Standard items are typically available within 3-5 working days
- Painted items are typically available within 10-15 working days
- E-Luminate items are typically available within 20-25 working days.

03 COLLECTIONS

- Collection orders will be available from the date provided by your Customer Service Advisor
- To avoid loading delays, customers need to provide at least 24 hours notice of their arrival time

Information required on collection:

- The Eternit sales document number (supplied on your order acknowledgement) or alternatively your customer order number
- An overview of what is being collected to allow the driver to check their load prior to leaving site

Vehicle loading

All drivers collecting products must adhere to the on site health and safety instructions as summarised below:

- Follow instructions given by loading team at all times
- Remain in the cab of their vehicle with their engine switched off and parking brake applied during delivery
- Ensure that they do not move their vehicle until instructed by the loader
- We will not permit standing on top of the load at any Etex Group site without the use of a fall arrest system or netting station
- Customers should employ methods of load security that do not require the driver to access the rear of the vehicle
- The driver will only access the rear of the vehicle when the forklift truck has withdrawn.
- For full details of Eternit's Vehicle Loading Policy and Customer Collection Policy, please contact Customer Services

Personal protective equipment

All drivers collecting materials on site are required to use personal protective equipment (PPE) as listed below:

- Hi-Visibility vest or jacket
- Safety glasses or goggles (normal prescription glasses are not accepted as suitable eye protection)
- Safety footwear must be worn whilst out of the cab
- A hard hat with chinstrap must be worn whilst on the back of the vehicle (including crane)

04 PAYMENT

- All prices are net and exclusive of VAT
- This price list does not constitute an offer. All products are sold subject to the Company's conditions of sale

05 AFTERSALES

- Notification of claims for damaged material must in all cases be made within 24 hours of receipt
- Once a delivery ticket is signed, Eternit do not accept responsibility for damage or discrepancy

Full terms and conditions can be supplied on request. Please email ordersuk@etexgroup.com

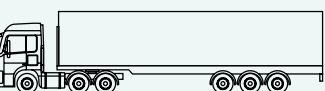

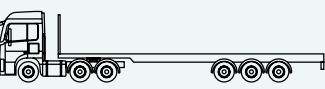

VEHICLES

Customers are required to advise if they require a restricted or unrestricted vehicle.

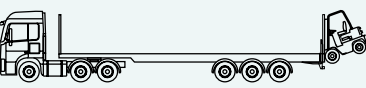

Wagon and drag

- Can carry around 22 tonnes
- Wagon and drag with offload facility depending on availability
- Where a moffett is chosen by Eternit, the max. travel distance is 50 metres
- Trailer will only be dropped with prior agreement and may be subject to a charge
- Allow 2 extra days rolling

Artic

- Flat bed or taut-liner
- Largest carrying capacity and availability
- Can carry up to 26 tonnes
- Customer to provide offloading facility

Unrestricted with offload

- Artic with moffett
- Can carry around 25 tonnes
- Offloaded with a moffett depending on availability
- Where a moffett is chosen by Eternit, the max. travel distance is 50 metres
