Glen Dimplex Heating & Ventilation

At Glen Dimplex Heating & Ventilation we are committed to supporting the most forward-thinking, efficient and sustainable industry-leading brands. With our combined enthusiasm and dedication in developing the very best heating and ventilation solutions, you can feel assured that the products, services and systems created by our brands are:

- Innovative** - in their product design, technology and manufacture.
- Expert** - in their application of technical knowledge and industry experience.
- Proven** - from historically defining markets for more than 760 years collectively.
- Trusted** - worldwide to meet the highest standards of safety, quality and ethics.

Driven by knowledge and innovation

The Glen Dimplex Heating and Ventilation brands, with their extensive experience and ever-increasing collective product portfolios, assist and excel in new build specification, refurbishing and upgrading of residential, commercial and public-sector buildings.

Our popular brands make us the market leader in electric heating appliances in Europe and a leading player in decorative electric and gas fires and solid fuel stoves. Glen Dimplex Heating & Ventilation's focus is the design, development and manufacture of professionally installed heating and ventilation systems for residential and commercial buildings, ranging from smart electric heating systems using the latest control and communications technologies, through to heating, cooling & ventilation systems, encompassing heat pumps, Mechanical Ventilation and Heat Recovery (MVHR) systems and a range of heat emitters.

In the electric heating industry, our brands' portfolios include the UK's most popular ranges of storage and panel heating, expertise in portable heating solutions and an impressive variety of innovative gas and electric fires. In ventilation they cover domestic and commercial ventilation systems for single rooms or entire buildings as well as portable air treatments. And from their work in hot water solutions; our brands have developed various instantaneous and stored hot water systems, suited to both consumer and professional needs.

Ability, operating from their 30,000 square foot factory in Poole, specialise in the design, manufacture and global distribution of some of the most energy efficient fan coil units. At the forefront of this technology is Ability's Matrix range, voted 'Air Movement Product of the Year' in 2015.

Ability's fan coils benefit everyone when specifying this type of equipment; consultants gain flexibility, contractors can reduce installation time, while building tenants can economise on running costs. Ability offer a maintenance service, which tenants and building owners can benefit from.

Providing fan coil units throughout the world from Australia and New Zealand to Hong Kong and The United Arab Emirates, Ability is a forward-thinking global resource and supplier, now with manufacturing representatives in the United States and Canada.

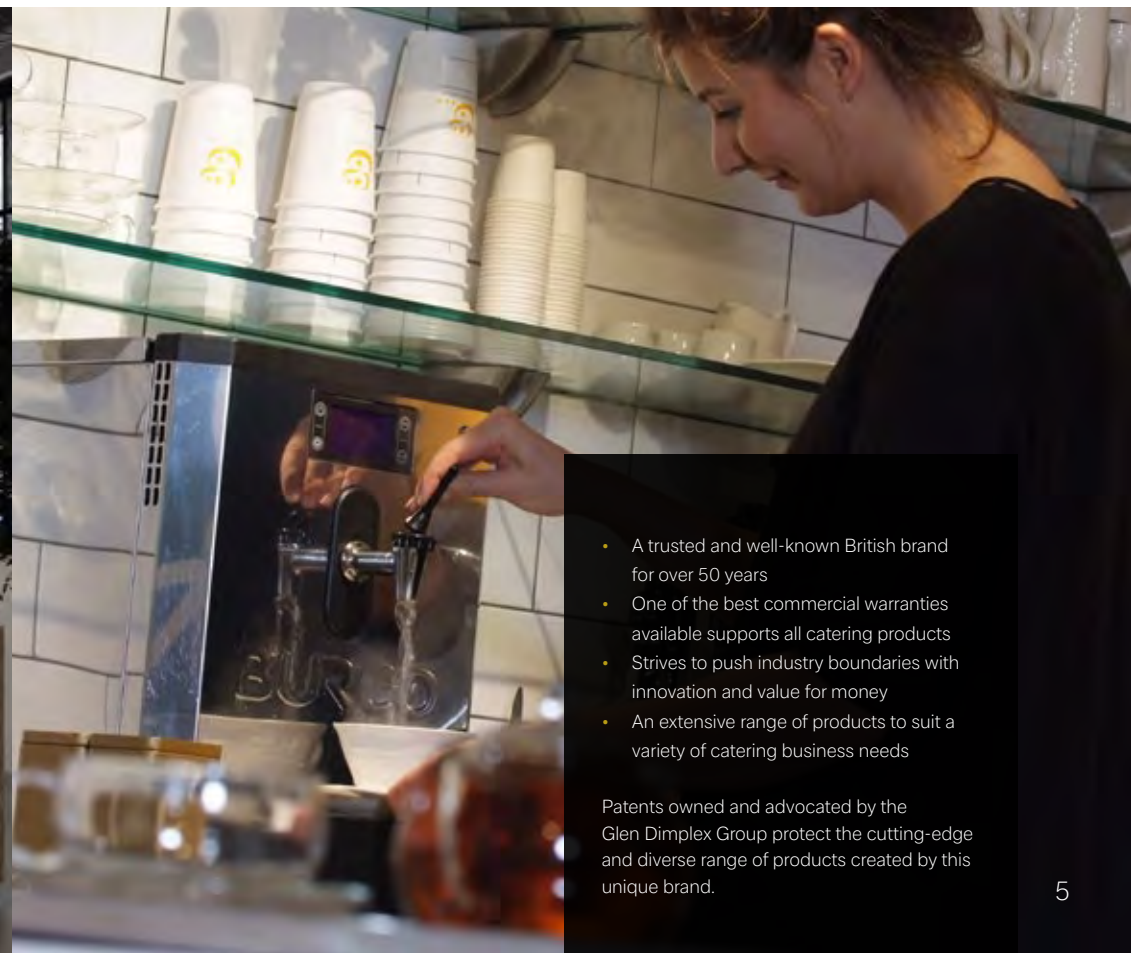

- One of the Top 1000 Companies to Inspire Britain
- Unique fan coil service and maintenance offering
- Projects on a worldwide scale

Patents owned and advocated by the Glen Dimplex Group protect the cutting-edge and diverse range of products created by this unique brand.

Burco, as a leader in modernisation within the Leisure and Catering market, consistently and skilfully adapts to changing trends to meet the high industry demands of current catering.

Despite humble beginnings, Burco has utilised 50 years of experience at the forefront of the catering industry. Their innovative spirit has only grown since joining the Glen Dimplex Group in 1985.

With products ranging from water heating and toasters to grills and specialist ovens, Burco is proud to continue transforming professional catering.

- A trusted and well-known British brand for over 50 years
- One of the best commercial warranties available supports all catering products
- Strives to push industry boundaries with innovation and value for money
- An extensive range of products to suit a variety of catering business needs

Patents owned and advocated by the Glen Dimplex Group protect the cutting-edge and diverse range of products created by this unique brand.

1844

The gas fires and stoves that form their modern collection today originated from a humble blacksmith's shop. Faber continues to work at the forefront of technology in pioneering new ideas and products.

BURCO

1895

Burco's original company W.H. Dean established in 1895. Initially, they produced gas equipment, but later during the 1950s Burco Dean formed, and was best known for the 'Baby Burco' wash boiler of the time.

1929

One of Redring's initial developments in the field of hot water solutions began with their radiant boiling plates for electric cooking. Since then Redring has not compromised on safety, quality and affordability.

1948

Dimplex was one of the first pioneering companies in electric heating. They produced the first domestic storage heater in 1961, and since their beginning, Dimplex has been a trusted household name.

1968

As highly experienced contributors to the ventilation industry, Xpelair's commitment to creating fresh, clean air is supported by their inbuilt reliability and quality in every product.

GlenDimplex

2017

As a significant figure in multiple global markets, through working with our brands, we strive to keep developing cutting-edge heating and ventilation solutions into the future.

When Valor first began they operated out of a small factory in Ludgate Hill, Birmingham. From here they have grounded their reputation in reliability, safety and efficiency.

1890

1918

What was once a small, family business has now become a leading light in heating solutions. The design-conscious and innovative French brand Campa continues to excel in its product ranges today.

1959

CAMPA

1978

Creda

2000

Faber creates versatile, innovative gas fires for premium residential and commercial projects. As a dominant brand in the exclusive gas, solid fuel and electric stove and fireplace markets across Europe, Faber has an exceptional reputation for concept design, technology and finish quality.

With their diverse and substantial product range, Faber can fulfil the most challenging of design briefs to add ambience to any room.

Designing and manufacturing the highest quality fires is a top priority at Faber. With a unique passion for providing everyone with the comfort of a fire, Faber's unique inventions have become a benchmark in the international market.

Nobø, a premium Scandinavian brand, sets the standard for electrical heating by offering the very best in heater components, production, technology and design. As pioneers in timer control using highly accurate thermostats and now optional management via a smartphone or tablet interface, the Nobø Energy Control System can be adjusted from anywhere in the world.

Applying Nobø's unique innovation and centrally controlled heating systems, users can reduce their electricity bills with cutting-edge electric heating control.

High-quality heater components from Nobø's local environment including Scandinavian steel and Norwegian product stains, contribute to their timeless designs. Bevelled edges, rounded corners and non-intrusive air outlets incorporate safety as a fundamental aspect of design.

Creda, with over 40 years of industry experience, produce economical, efficient electric heating products that enable specifiers and installers to meet their legal obligations through tracking new legislation and regulations.

It's easy to install or upgrade Creda's safe instant and responsive heating in domestic or commercial buildings.

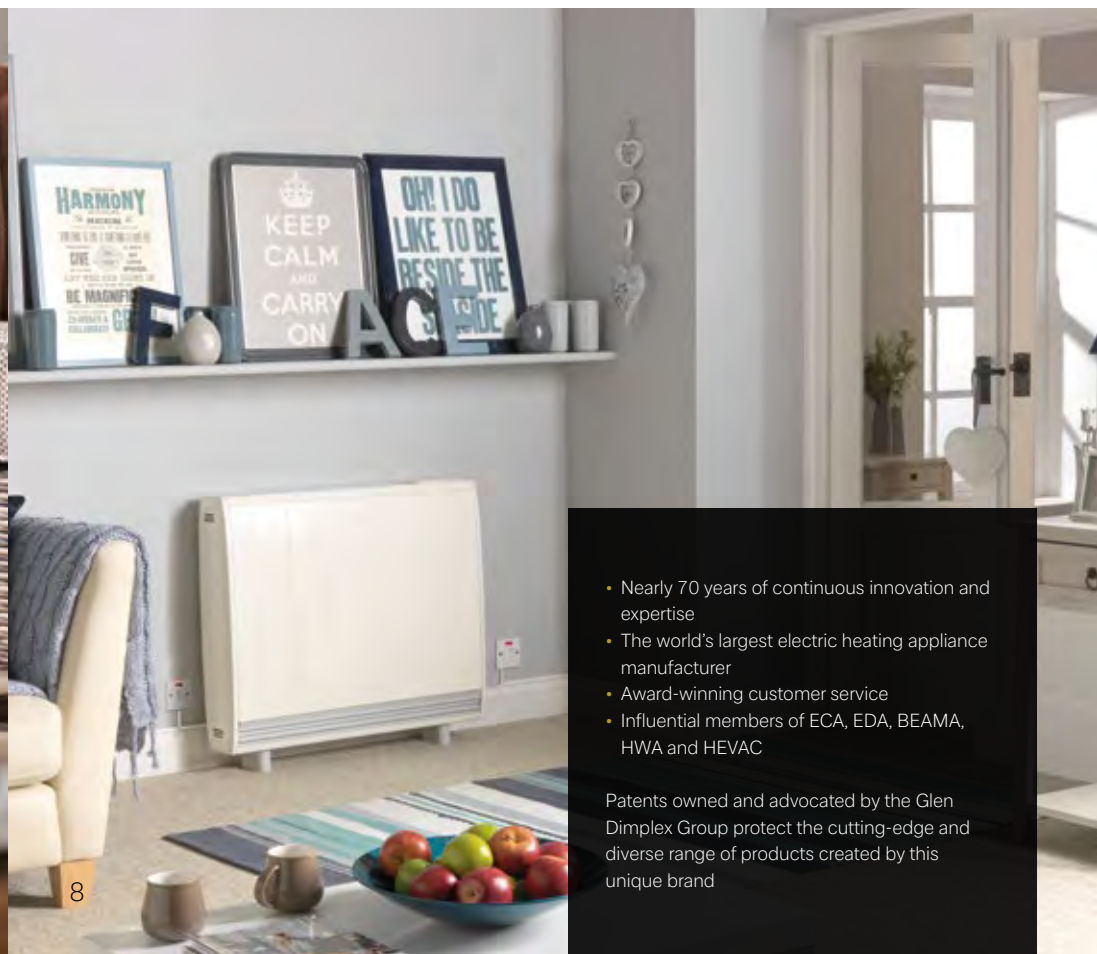

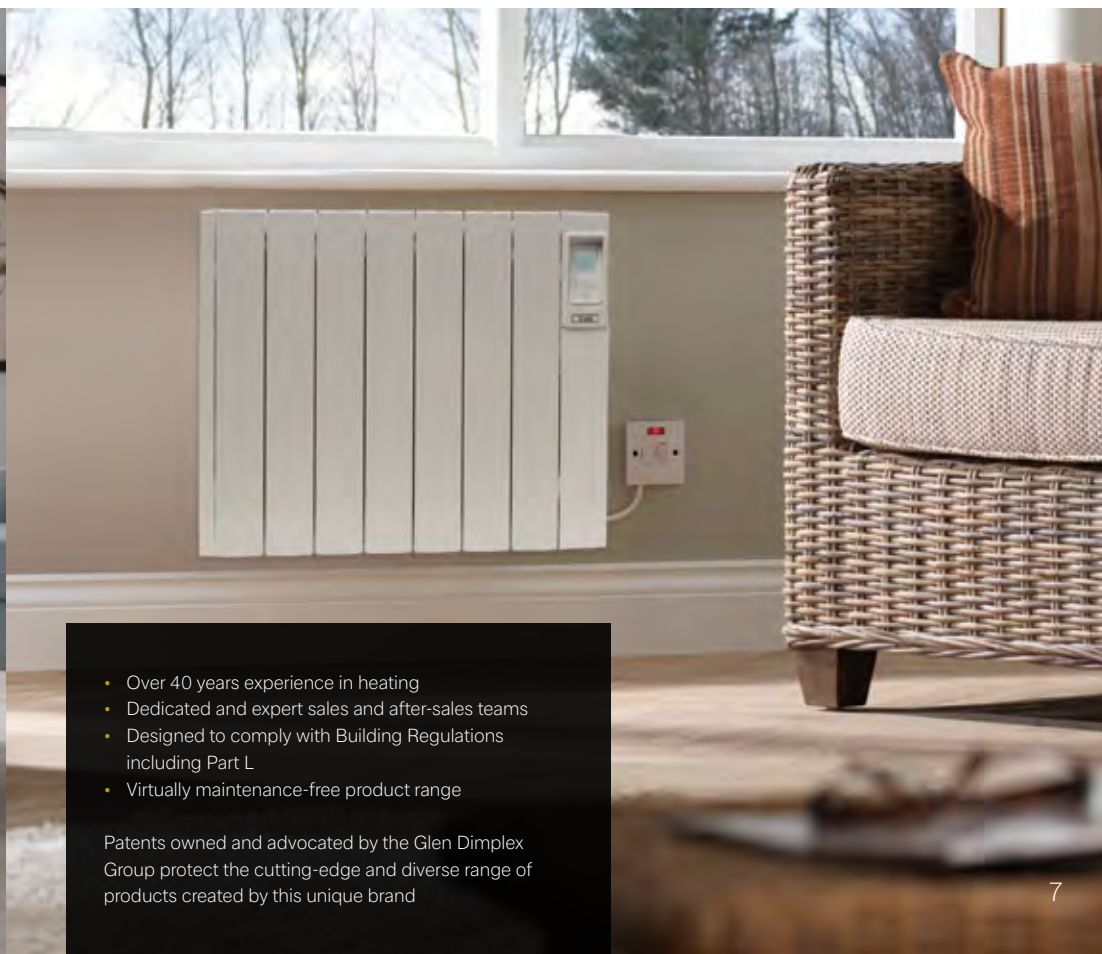

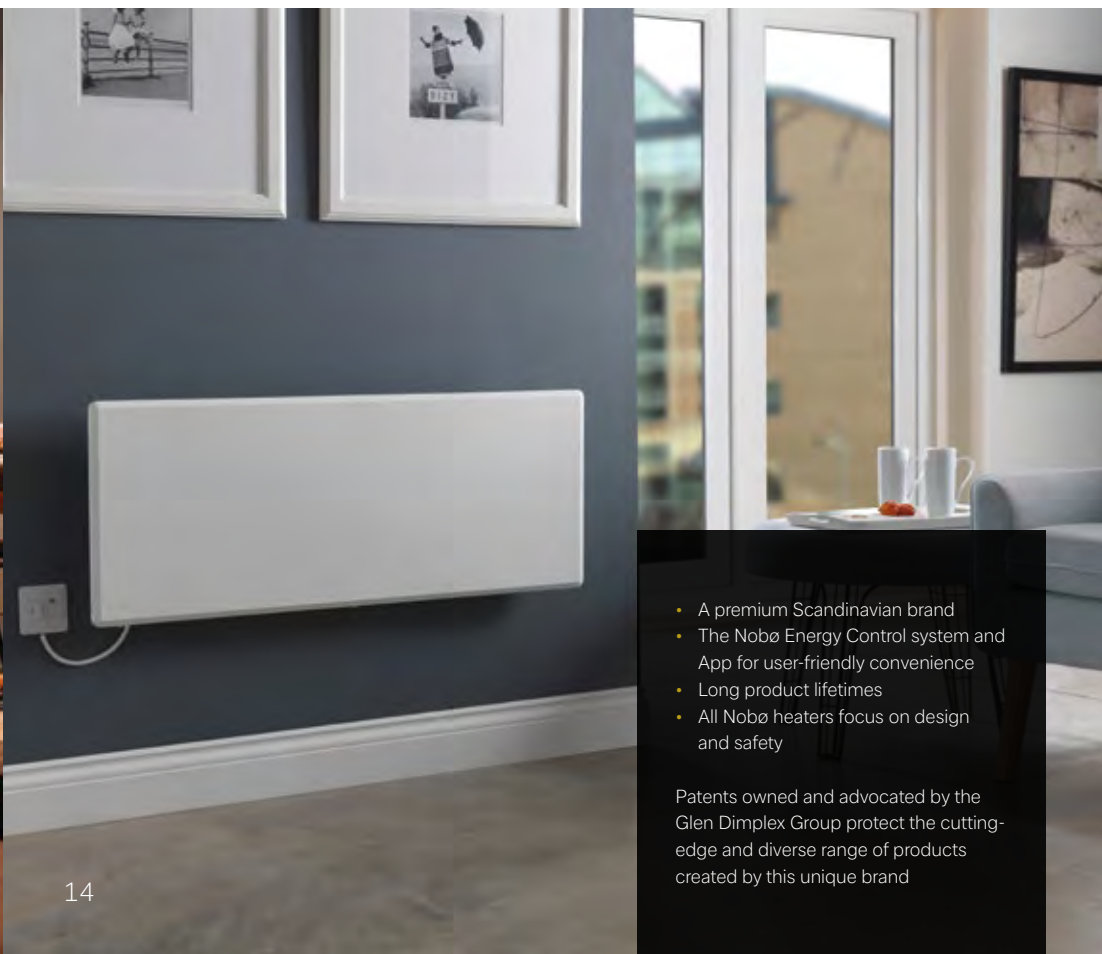

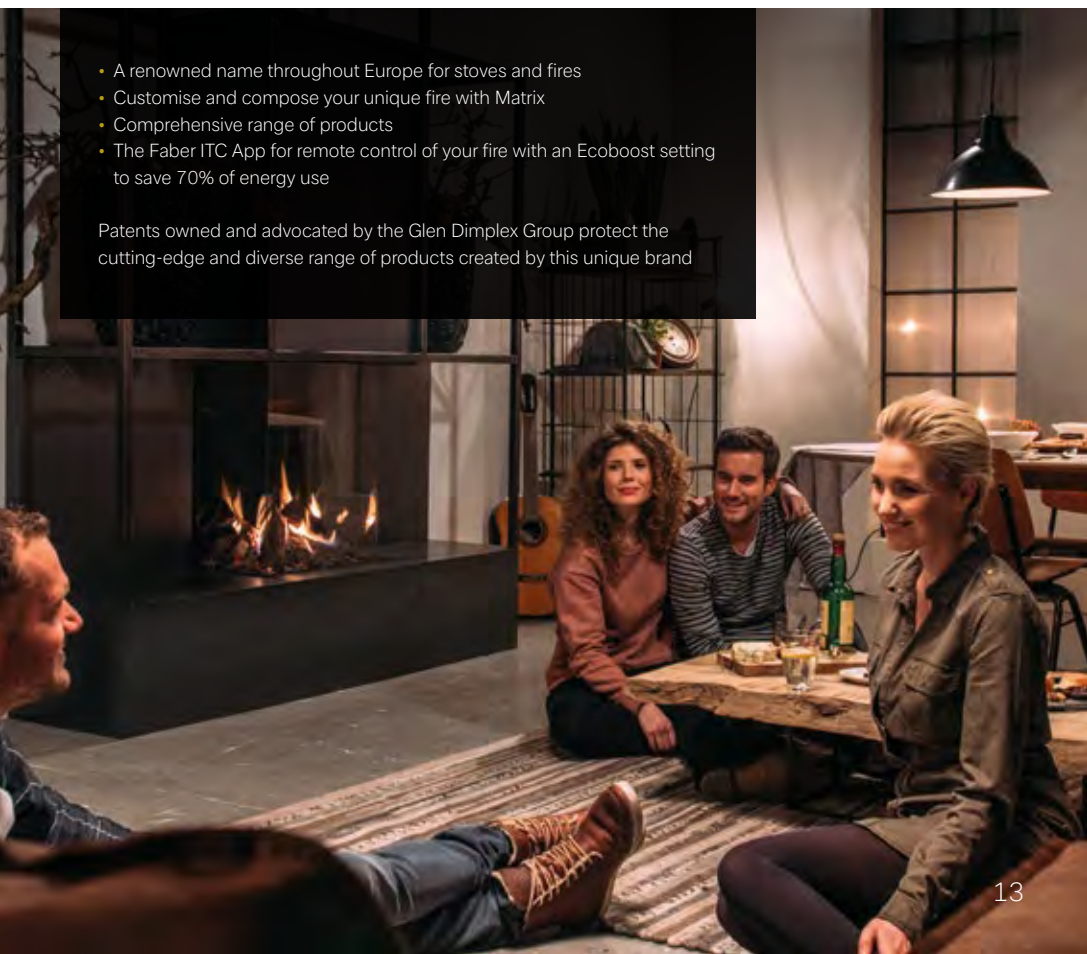

With their expert sales team and specialist after-sales support team, Creda works nationwide to provide maximum convenience for their clients.

Dimplex, for almost 70 years, has been the market leader in the creation and manufacture of energy efficient electric heating and hot water appliances and systems.

Dimplex is responsible for the sale of more than 45 million heaters in the UK alone. Their continuous investment in new ideas and designs enables Dimplex to deliver market-defining heating and air treatment.

With award-winning customer service and many BEAB-approved products, Dimplex works closely with government and industry groups to be secure as the world's most prominent electrical heating business.

Campa, a company that began in France in 1959, provides an unparalleled level of commitment, passion and attention to detail in their development of sustainable heating solutions.

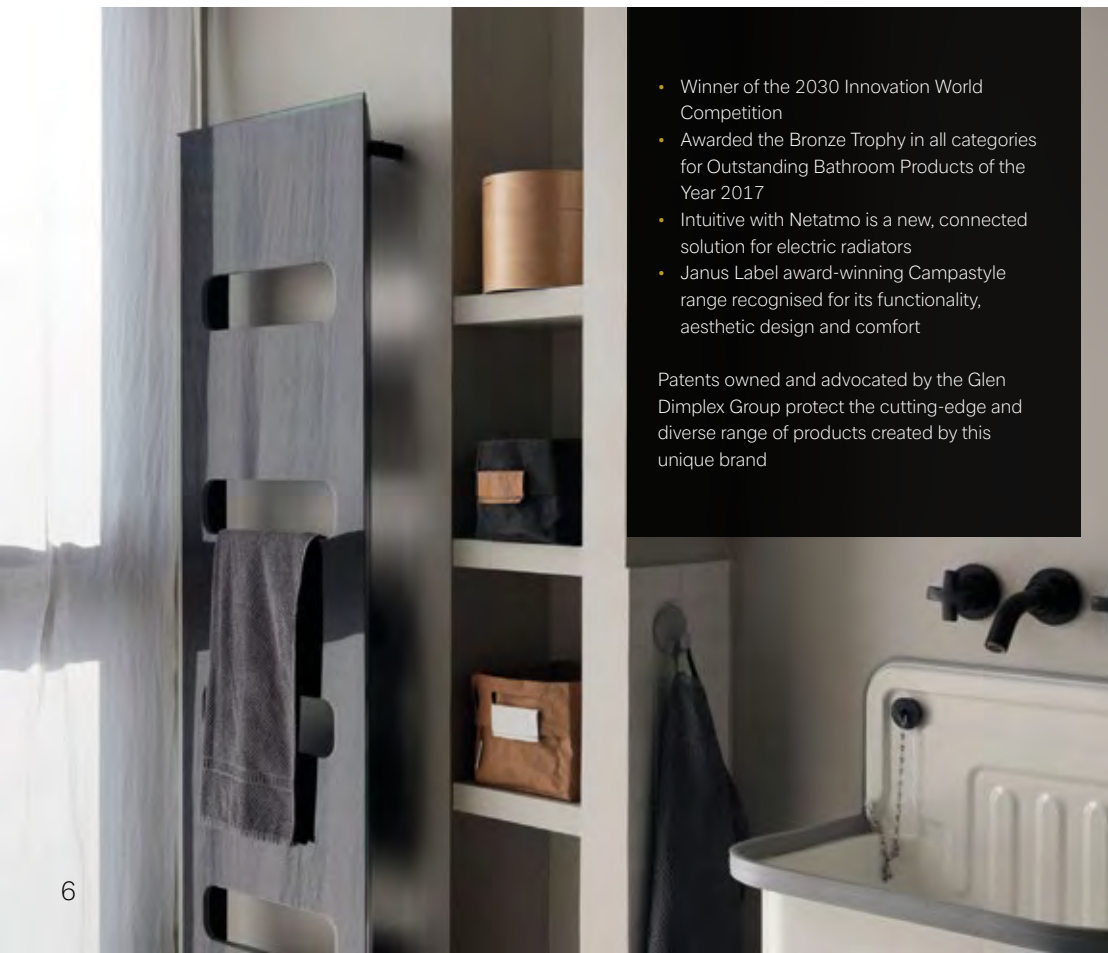

Now an award-winning brand with one of the largest research centres in Europe, Campa creates intelligent, connected, high-performance radiators made to an exceptional standard for both homes and commercial buildings.

Their eco-designed, electric heater consistently and intelligently reduces its environmental impact in each phase of its use over time. This innovation combined with stylish design and perfect comfort makes Campa a market-leading brand.

Redring is a global business that delivers outstanding shower and water heating solutions for residential and commercial premises. Redring's extensive product ranges include electric, power, digital and mixer showers, vented and unvented water storage heaters, beverage water boilers, boiling water taps and hand dryers.

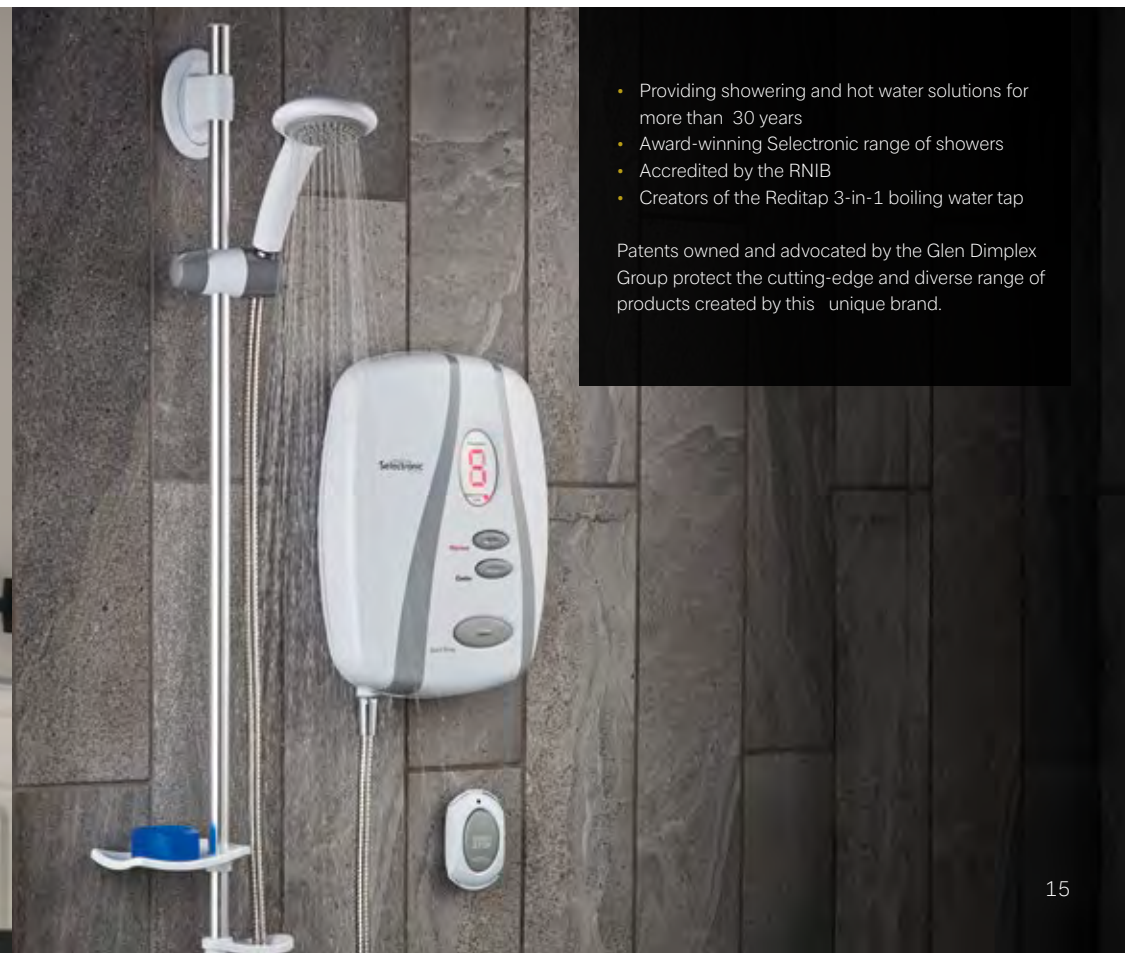

Drawing upon 30 years of experience, Redring conserves water and energy resources with instantaneous electric water heating systems and leads efforts to provide hot water precisely as it is required, to benefit specifiers, installers and end-users.

Safety is of great importance at Redring; their Selectronic shower range carries 'inclusive design' status and the BEAB care mark. Standards are ensured by their dedicated after-sales support team of engineers and professional installers.

- Winner of the 2030 Innovation World Competition
- Awarded the Bronze Trophy in all categories for Outstanding Bathroom Products of the Year 2017
- Intuitive with Netatmo is a new, connected solution for electric radiators
- Janus Label award-winning Campastyle range recognised for its functionality, aesthetic design and comfort

Patents owned and advocated by the Glen Dimplex Group protect the cutting-edge and diverse range of products created by this unique brand

- Providing showering and hot water solutions for more than 30 years
- Award-winning Selectronic range of showers
- Accredited by the RNIB
- Creators of the Reditap 3-in-1 boiling water tap

Patents owned and advocated by the Glen Dimplex Group protect the cutting-edge and diverse range of products created by this unique brand.

Valor, as pioneers in the electric and gas fire market, have one of the largest gas fire portfolios in the UK. The 'Inspire' range offers high-quality, stylish and affordable fires in a wide variety of choices, allowing customers to create the perfect gas fire tailored to their home.

By making the most of their industry-wide relationships, Valor continue to develop future-proof, energy efficient heating products that maximise customer comfort.

Using the latest technology, Valor works hard to reduce carbon emissions and running costs. Safety is also of paramount importance at Valor; ensuring the installation of many safety features in all gas fire models.

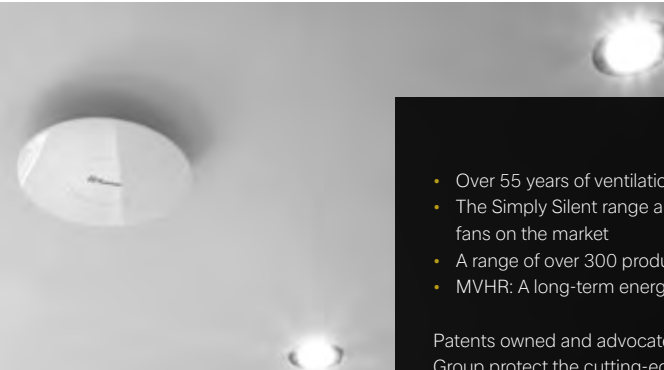

Xpelair is a recognised brand in the manufacturing and development of sustainable, eco-friendly ventilation products. From bathroom fans and whole-house heat recovery units to commercial ventilation systems, Xpelair's range of over 300 products offers specifiers a competitive choice based on quality, ease of installation, reliability, and competitive pricing.

Using their experience of more than 55 years, Xpelair utilises modern technologies to create clean, fresh air. Through close and constant monitoring, all Xpelair products ensure regulations and approvals for most applications can be met.

Current regulations require ventilation systems to be chosen with care, but Xpelair's fans and other air management products are essential in residential and commercial settings.

- A recognised and much-loved British brand
- Received the Queen's Award for Industry in 2009 for the bestselling Homeflame gas fire range
- Quality tested to a high standard
- Electric fire models are BEAB and CE approved

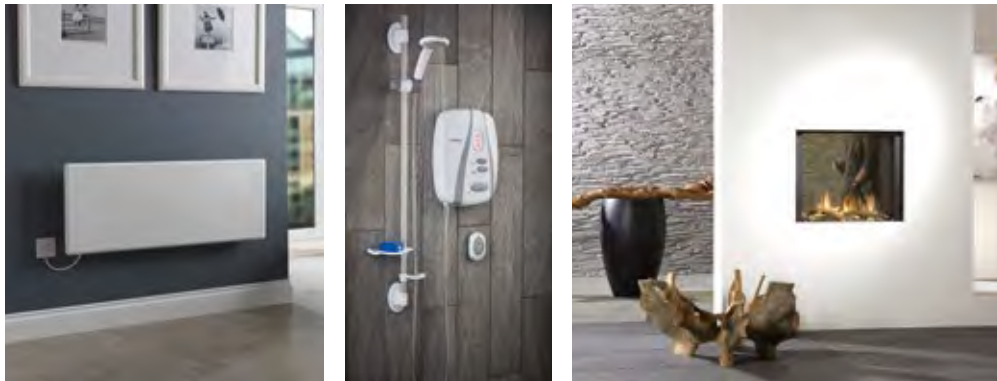

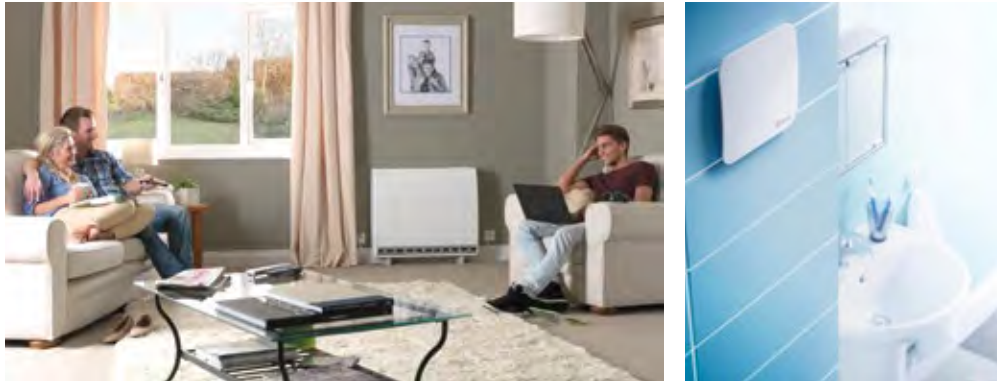

Patents owned and advocated by the Glen Dimplex Group protect the cutting-edge and diverse range of products created by this unique brand

- Over 55 years of ventilation experience
- The Simply Silent range are the quietest intermittent fans on the market
- A range of over 300 products
- MVHR: A long-term energy saving ventilation solution

Patents owned and advocated by the Glen Dimplex Group protect the cutting-edge and diverse range of products created by this unique brand

Our World

Mission Statement

To be the leading supplier of sustainable, efficient and desirable heating and ventilation products and systems to provide comfort for everyone using buildings.

To innovate and manufacture a new generation of electric heating appliances to address the needs of our Zero Carbon future.

To build strong, vibrant and effective brands within the global heating and ventilation market.

To put the lives of our customers at the centre of everything we do.
