

Astralux 4000

room darkening systems

CI/SfB	(76.7)	X
--------	--------	---

DESCRIPTION

These room darkening systems consist of an aluminium barrel onto which the specified black-out fabric is securely fastened. To achieve a high degree of light exclusion a cassette system is used with a headbox, side channels and an optional bottom channel. The fabric runs within the side channels and if required can be held securely using crossbars or a zip system. The Astralux 4000 room darkening system is available in a range of flame retardant 100% black-out fabrics including:

- Anti-microbial
- Energy saving

CONTROL OPTIONS

- Side chain, where the blind is raised or lowered by a continuous chain located on one side of the blind. Child safety devices available
- Spring operation for smaller blinds
- Gearbox operation with fixed or removable handle to prevent unauthorised use. Inherently child safe
- Motorised - hard wired, radio. Inherently child safe.

PRODUCT OPTIONS

- Heavy duty side channels for where excessive fabric movement could occur
- Rooflight option for angled and horizontal installations
- Twin system with two blinds in one headbox
- Linked operation so one operating mechanism controls a number of blinds
- Powder coating of hardware to specific RAL/BS colours
