

XtremeMats

WORLD FIRST

The most advanced and versatile heavy-duty matting system in the world.

UNIQUE CONSTRUCTION

Ultra-tough HDPE plastic outer layer with a hard foam inner core for strength and buoyancy.

BIG

Large 4x2m mats are ideal for big projects and long access roads.

BOUYANT

Their buoyancy means you can make access roads across boggy ground, through swamps, or even floating on water!

FLANGED JOINTS

Overlapping flange joints give total support on soft ground, and are connected with special Mega-Thread bolts for easy alignment on undulating sites.

MULTI-WAY

Xtreme Mats can be joined in any direction for maximum versatility of site layouts. Also, by half overlapping the mats, the strength and rigidity of the trackway is greatly increased.

TOUGH

Built for use in the harshest environments, Xtreme Mats will far outlast timber bogmats, making them a sound investment for long term projects and rental companies.

XtremeMats

Material: HDPE plastic, fully recyclable

Overall Size: 4340 x 2290 x 100mm

Surface Size: 4110 x 2060mm

Surface Area: 8.46m²

Weight: 385kg

Packed in: 40 mats per 40' ISO container

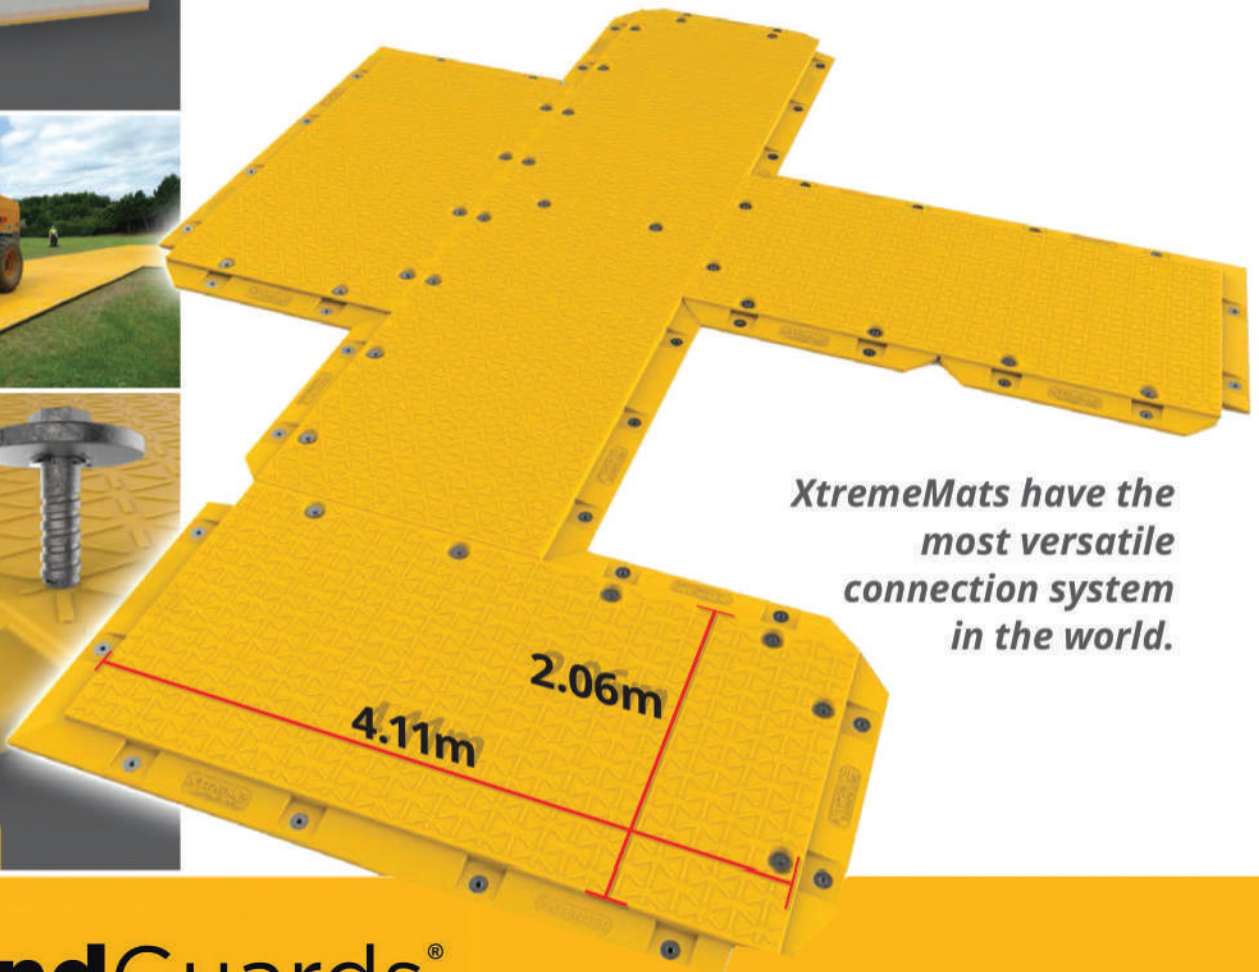

Connectors: 6 self-aligning bolts

Temperature Rating: -34°C to +49°C

Compressional Strength: 40kg/cm² (600 psi)

Static Dissipative Protection: Yes

UV Protection: Yes

XtremeMats have the most versatile connection system in the world.
