

QIC Trims Limited are the leading British manufacturer of aluminium trims and interior products for the ever-increasing demands of the fit-out sector.

All organisations and business's need to do all we can to minimize the transmission of Coronavirus within the workplace and maintain a safe workspace for all our staff. With this in mind QIC Partitions have developed a range of Desk screens products to maintain Personal Space and well-being within the workspace.

These products allow the end user to work within social distancing guidelines in any work and office space. Covid-19 will change our workplaces forever. We can turn this challenge into an opportunity to build workplaces of the future that are responsive, flexible, resilient, and most importantly, people centred.

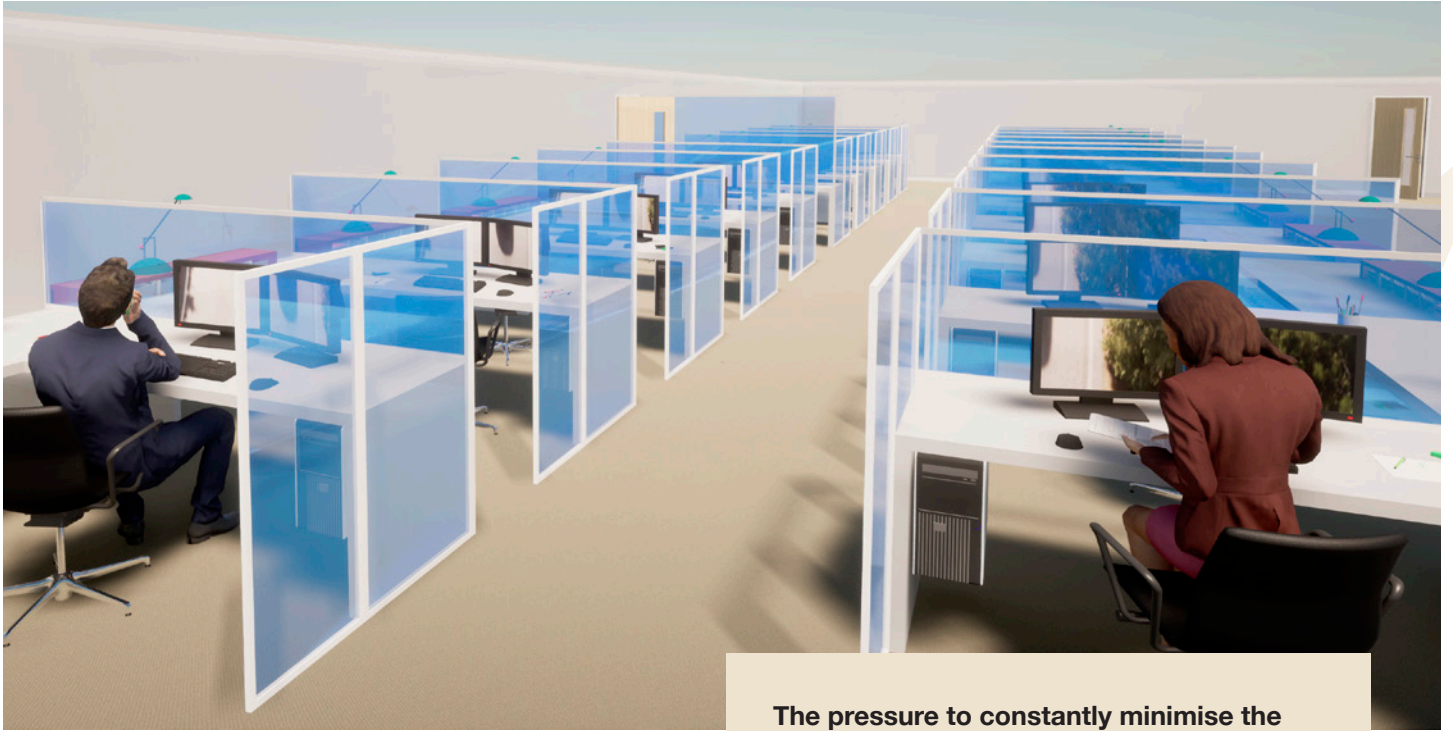

The impact of Covid-19 has challenged the conventions of the office building and will accelerate the implementation of different working styles. The role of the workplace will be just, if not more important, as its value is being demonstrated by its temporary removal. We have created products to help with getting people back in the office.

A BALANCED APPROACH

We've all learnt to video conference but it's not the same. Nobody knows how or when to interact, which is such an important part of our human behaviour. The role of the workplace, more than ever, is to collaborate, discuss issues, stimulate creativity, share ideas, learn and socialise.

As we've all learnt to socially distance ourselves, we've also learnt how vital the office is for our own well-being and vital need for human interaction.

QIC Partitions

The QIC Desk Screens have been designed and manufactured in the UK at our factory in Buckinghamshire. Using sustainable Aluminium sections, the product either pre-fabricated or in kit form requiring basic assembly on site. The system offers both Desktop and Floor supported versions.

The screens are available in standard sizes but also can be made to measure to suit all bespoke sizes and scenarios. To compliment the overall aesthetic, we can offer this product ex stock in standard RAL 9010, 9005, 9006 and 7016. Other colours are available and anti-bacterial coatings where required to offer extra protection.

The screens will be designed to suit the current government guidelines and the need for staff to social distance and keep the workplace safe.

• Desktop Screen

Designed to be installed on top of the existing desk with minimal assembly on site.

• Floor Supported Screen

Designed to fit as standalone sections or to be added to the Desktop screens, for additional cover.

Premium Quality, long lasting and cost effective.

The Coronavirus pandemic has changed our way of life probably forever, both personally and professionally. With a number of products being made available to the market, QIC Partitions have designed a framed glass solution. With cleaning regimes in mind Glass being the key component offers high levels of durability, cleanability and being cost effective.

The pressure to constantly minimise the size of the desk surface to increase the density of people within a space, will be replaced with a desire to protect our personal space.

People work better in a space that promotes physical well-being.

We are all human and our interpersonal space determines how comfortable we are in the presence of other people. We have a series of imaginary boundaries that define our personal space, including a 2000mm bubble that defines our social space.

We move nearer or further apart from others to keep these spaces defined.

Our instincts for space and territory are fundamental to how we interact and this directly impacts furniture layouts.

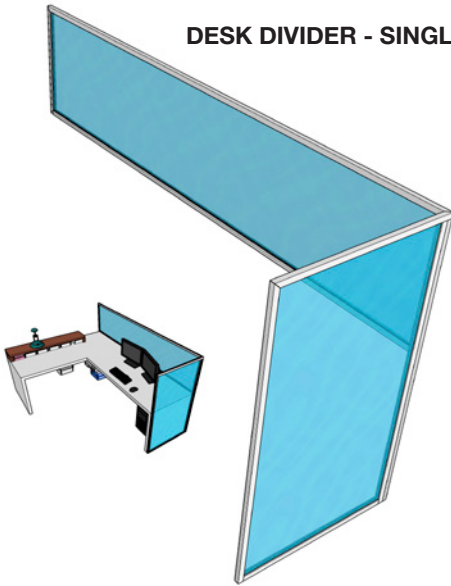

It is our personal responsibility to maintain the 2000mm physical distancing guidelines and we require simple and obvious clues in our furniture as we can no longer use the ubiquitous hand-shake to demarcate our personal boundaries.

Key Features of QIC Desk Screens

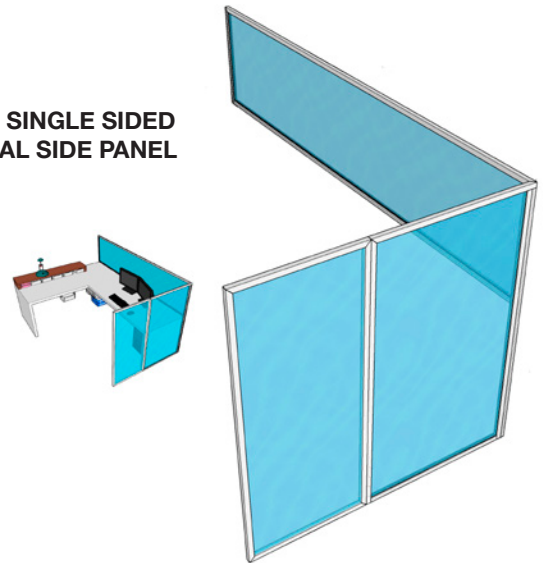

- UK Manufactured
- Short lead times, 3-5 days for standard colour
- Quick and easy to install
- Pre mitred kits excluding glass also available
- Flexible solutions - we can manufacture to suit
- Easy to maintain and clean
- A range of colours and finishes available
- Modular standard sizes
- Bespoke made to measure sizes

Installation requires limited tools and minimum disruption to the existing office space.

HUMAN EMOTION

Our 10 key design principles to mitigate the spread of Covid-19

1	2	3	4	5
EMBRACE HEALTH Embrace health and wellbeing principles to create safe workplaces by ensuring minimum 6ft/2m distancing and reducing occupancy where appropriate.	PHYSICAL DISTANCE We can encourage physical distancing and orientation through our innovative and adaptable furniture design.	REDUCE ANXIETY Our approach will help reduce anxiety of the workforce in the workplace by helping to ease transition into this new normal.	TOUCH FREE Allow intuitive and touch free use of furniture to help reduce contact throughout the workplace.	DEFINE BOUNDARIES Allow employees to define their own boundaries and to help identify and suggest appropriate distance between other employees.
6	7	8	9	10
MAINTAIN CALM Softer aesthetics, warmer tones and contemporary finishes will help reduce anxiety and create a calming and more tactile, human feel.	VISUAL CUES Incorporate visual cues to identify and suggest appropriate distance between employees.	CLEAN FREQUENTLY Smooth surfaces that are easy to clean to maintain hygiene without degrading overime.	EXISTING FURNITURE Negate the need to replan and reconfigure existing spaces by using existing furniture solutions that are highly adaptable so spaces can change quickly in response to any unplanned future disruptions.	MAINTAIN WELLBEING Does not impinge on existing ergonomics.

Covid-19 Guidelines

THIS DOCUMENT HAS BEEN CREATED AS OUR RESPONSE TO THE COVID-19 PANDEMIC THAT IS SWEEPING THE WORLD. THE DOCUMENT IS OUR INTERPRETATION OF HOW TO MANAGE OFFICE SPACE AND SOCIAL DISTANCING SAFELY BY INTRODUCING BARRIERS, MANY OF WHICH HAVE ANTIBACTERIAL PROPERTIES.
