

PROJECT CASE STUDY

The cast stone features for the new-build world-class equine facility.

Matching cast stone design featuring the whole state.

Bespoke components for the construction of the owner's house.

Cast stone architectural features for World-class equine facility and house renovation

Location of Project
Horsham, Surrey

Project Overview

For the new-build equine facility, which is world-class and one of the largest in Europe, Procter produced a wide range of architectural features including 25 columns and capitals, and components to make a horse through.

Project Notes

Procter Cast Stone has completed a prestigious project to design, manufacture and supply cast stone components for the construction of a very large equine facility and the renovation of the owner's substantial house on the same site on Horsham, Surrey. All components were bespoke cast stone, and the project was delivered on time and to budget.

Client Feedback

"Extremely pleased with service provided by Procter and also the finished products."
