

## PROJECT CASE STUDY

The finished property shows how successfully cast stone can be used with natural stone.

We manufactured and supplied both external and internal window surrounds.

Our ability to colour-match our product to natural stone is clearly shown here.

### Cast Stone Architectural Features Used with Natural Stone on New Residential Property

#### Client

Mr A Kilmister

#### Location of Project

Tiffield, Northamptonshire

#### Project Overview

This new-build residential property combined both natural stone and cast stone to stunning effect. We manufactured and supplied internal and external window surrounds, quoins, copings and corbels.

#### Project Notes

By single residential property standards, this was a significant project for us and we supplied approximately 50 tonnes of cast stone product in total. The finished result perfectly demonstrates how cast stone architectural features can be combined very successfully with natural stone.

#### Client Feedback

"I'm very pleased with the service and also very happy with how the cast stone product complimented my choice of walling."
