

PROJECT CASE STUDY

The full splendour of Bramham Park House.

One of our skilled installers working on site.

One section of the completed balustrade replacement.

Manufacture and installation of cast stone replica balustrade to grade 1 listed Bramham Park House

Client

Surface Protection, Lancashire

Location of project

Bramham Park, Wetherby, West Yorkshire

Project overview

This was a relatively simple project for us with the sole task to replace original but time-worn balustrade with cast stone replicas on this important grade 1 listed building.

Notes

As can be seen in the photos, the cast stone replicas do look overly 'new'. However, and in the same way as they would if more expensive natural stone had been used, they will soon weather and take on a similar appearance to the adjacent originals.

Client comments

The client expressed full satisfaction with our work and the end product.
