

PROJECT CASE STUDY

New Majestic Wine retail unit in Basingstoke, Hampshire.

The contrast between the cast stone – which entirely replicates natural stone – and the red brick is striking.

The rebated edges on some of the walling creates a very effective shadow-gap.

Extensive Use of Cast Stone for New Majestic Wine Retail Unit

Client

E. G. Carter & Company Limited

Location of Project

Basingstoke

Project Overview

A new build retail premises for Majestic Wine, which used cast stone walling, quoins and copings, and these to contrast with red brick to create a striking and contemporary piece of architecture.

Project Notes

Some of the cast stone products were rebated to create a shadow-gap effect.

Client Feedback

Very pleased with the end result once a few issues with band marks were resolved.
