

**modern flooring systems**

## About Us

**DCP is an internationally renowned manufacturer of high quality products for the construction market. With more than 80 years experience this highly regarded UK manufacturer has a truly global reach.**

With bases in the UK, across Europe, the Middle East and India, DCP support a valued customer network in 35 countries worldwide.

DCP has an unrivalled reputation for quality standards and innovative solutions developed at our modern manufacturing plants.

We are a leading manufacturer of flooring solutions – with a product range and technical expertise to

meet a whole range of project demands including extreme environments and climatic conditions.

Our in-house technical specialists are always on hand to provide expertise and advice, whether for small independent operators, construction specifiers or multi-national project managers.

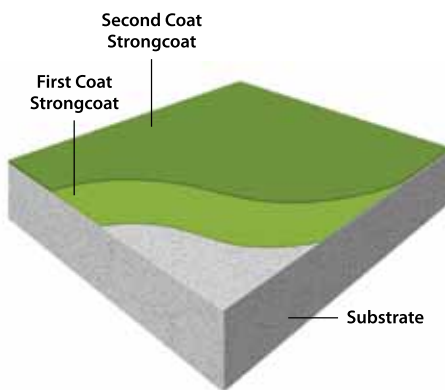

# Epoxy Based Flooring Systems

DCP's Strongcoat epoxy flooring systems are resin-based products suitable for a wide range of construction projects from refurbishments to new builds. With products for both internal and external situations from coatings and screeds to anti-slip surfaces.

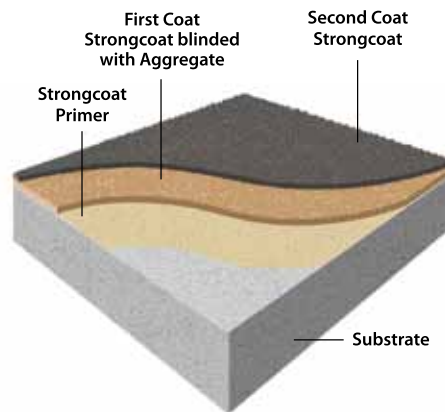

At DCP we have developed a wide range of epoxy based systems to ensure clients' needs are met – from light use areas to the most heavy-duty specification.

Our Strongcoat epoxy based range delivers seamless and hygienic floor surfaces which are guaranteed to be easy to clean and maintain, while meeting the widest range of construction project needs.

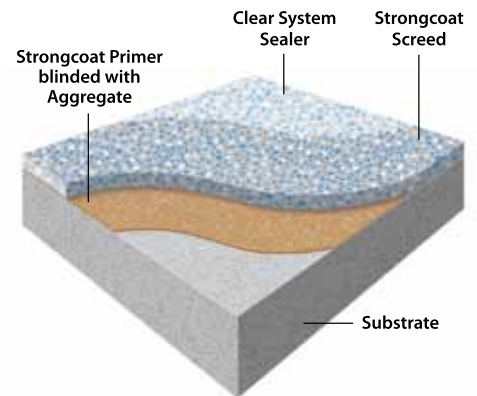

## SMOOTH COATING

## ANTI-SLIP COATING

## SCREED SYSTEM

DCP's Strongcoat range of epoxy resin floorings is highly comprehensive and comes in a range of colours.

It includes:

- **Strongcoat DPM:** a two pack solvent free damp-proof membrane.
- **Strongcoat WD:** a water based coating for floors and walls, to give a seamless, hygienic finish.
- **Strongcoat WD Clear:** a clear version of Strongcoat WD.
- **Strongcoat HB:** a high build, solvent free coating, providing a hard, semi-gloss coating with good chemical resistance.
- **Strongcoat SL:** a hard wearing, solvent free, epoxy based self-levelling topping.
- **Strongcoat FHB:** a flexible, hard wearing, high build coating which can be applied with or without an anti-slip finish.
- **Strongcoat Topping:** a solvent free, epoxy-based trowel applied topping for a hygienic and extremely hard wearing surface, with excellent impact resistance.
- **Strongcoat Quartz:** an attractive decorative topping, typically applied at 6mm depth. It offers good durability to pedestrian and vehicular traffic.
- **Strongcoat Matt:** a matt finish coating for use on top of a range of coatings and screeds.
- **Universal Linemarker:** this high build epoxy linemarker is suitable for use with DCP's Gripdeck, Griptop and Strongcoat product ranges.

## Key features and benefits

Fast installation, easy clean,  
hygienic surfaces, slip resistant  
finishes available, hard-wearing,  
low-hazard.

# Polyurethane Flooring Systems

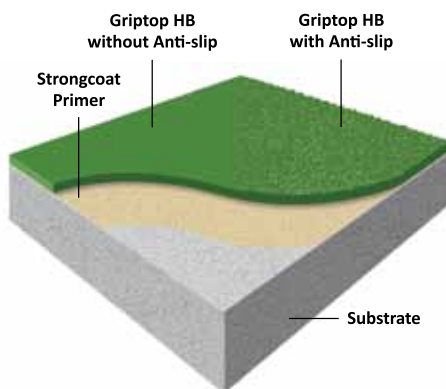

DCP's Griptop range of polyurethane coatings and screeds presents outstanding flooring technology when exceptional resistance and reliability are paramount.

Griptop floorcoverings present excellent resistance to chemicals. In addition the range has been developed with inherent non-tainting characteristics which make it an ideal solution in food processing and preparation areas.

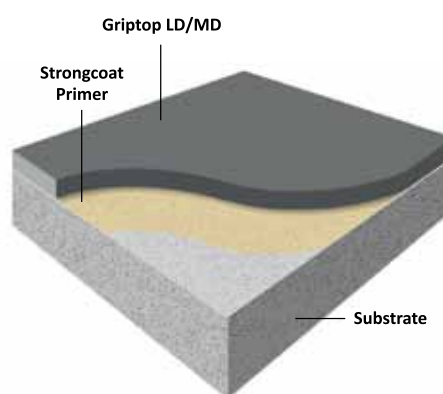

Where the highest levels of hygiene are essential, Griptop HD is able to provide steam-clean resistance.

The range is designed to withstand the light to heavy flow of both pedestrian and vehicular traffic.

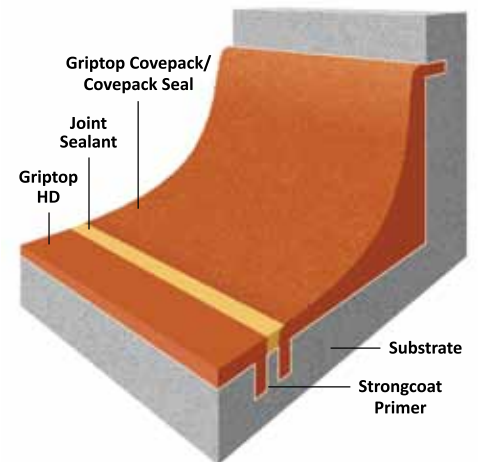

COATING WITH & WITHOUT ANTI-SLIP

SELF-SMOOTHING SCREED

GRIPTOP TROWELLED HD SCREED

## DCP's range of polyurethane flooring products includes:

- **Griptop HB:** a two-pack high build coating providing a seamless, hygienic and visually attractive finish for light to medium flow of pedestrian and vehicular traffic.
- **Griptop LD/MD:** a solvent free polyurethane-based topping for seamless, hygienic and cosmetically attractive matt finish.
- **Griptop HD:** a 6-9mm trowel applied topping for a seamless, hygienic and slip resistant finish, suitable for food and chemical processing and heavy-duty engineering areas.
- **Griptop Covepack:** a solvent free polyurethane based material which forms a joint between wall and floor surfaces.
- **Griptop Covepack Seal:** a polyurethane coating for use in conjunction with Griptop Cove Pack to provide a coloured seamless hygienic wall and floor system.

# Key features and benefits

Resistant to chemical spillage,  
non-tainting, steam-clean options,  
available in a range of colours.

## Cementitious Based Flooring Systems

DCP's range of Cemflow flooring solutions offer a variety of standard and fast drying products. Cemflow products are highly versatile and can be used for new-build projects as well as refurbishment where there are worn, damaged or uneven surfaces.

When time is at a premium, the Cemflow range is the ideal solution. It can be pump or hand applied, with options offering 'walk-on' hardness within three hours (at 20 degrees C).

Cemflow products are suitable for use over a wide range of subfloor types including sand/cement screeds, concrete, granolithic and terrazzo surfaces. It is also suitable to cover epoxy and polyurethane coatings as well as the Strongcoat surface damp-proof membrane.

### DCP's comprehensive range of cementitious-based flooring systems includes:

- **Cemflow Base:** ideal for large surface areas which require rapid levelling, prior to being covered.
- **Cemflow Topping:** a self-smoothing, fast-drying industrial grade topping for medium to heavy usage areas.
- **Cemflow Topping Pigmented:** a pigmented version of Cemflow Topping.
- **Cemflow Exterior Topping:** for internal and external use Cemflow Exterior will take foot traffic after three hours at 20°C.
- **Cemflow Sealer:** a clear water based polyurethane sealer for Cemflow Topping.

## Key features and benefits

Suitable for new-build and refurbishment projects, fast drying options, self-smoothing, economical, compatible with a wide range of subfloor types.

Effective car park surfaces must be highly durable to withstand the daily rigours of wheeled and pedestrian traffic and DCP has developed one of the most heavy-duty products in the industry.

Car park surfaces are prone to weathering and attack from many factors so need a robust solution. These areas also need to be slip and skid resistant and the structure as a whole must offer long service life with low maintenance.

Environmental considerations are also important in removing the intimidating atmosphere of dark and dimly lit car parks.

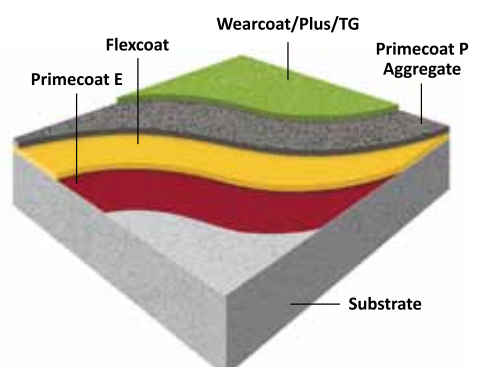

### Gripdeck Car Park Decking System:

is a state-of-the art polyurethane based system suitable for the most demanding situations – in both new and refurbished car parks. It combines effective long lasting surface barriers, protecting against water and other contaminants.

Standard and UV options available.

#### CAR PARK DECKING SYSTEM

DCP has developed an internationally renowned car park decking system. This hard-wearing surface covering has been developed to withstand de-icing salts, battery acid, petrol and diesel.

Our highly durable surface is also skid and slip resistant. In addition, it provides an enhanced environment with bright colourways to improve the overall parking experience.

### Key features and benefits

Durable and flexible. Suitable for use on decks, ramps, balconies and walkways with concrete substrates. Excellent crack bridging properties and anti-slip properties when combined with an aggregate layer. Creates a bright and modern environment.

# Dry Shakes

DCP’s Dry Shake Systems have set an industry leading standard. Used worldwide in warehouses, factories and high-bay warehousing units, they provide an easily maintained, slip-resistant surface.

Available in a range of colours, they offer fast-track installation, with both the Tibmix and Monoshake systems suitable for laying and floating by hand or machine, before being sealed with one of DCP’s surface sealers. Tibmix also has anti-static properties.

## Tibmix:

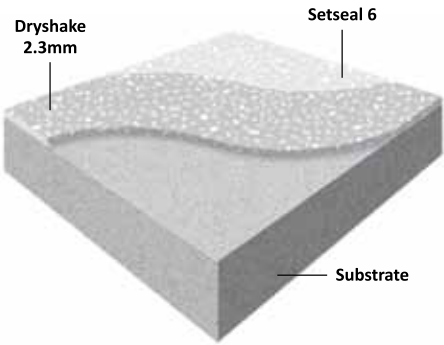

a non-oxidizing, chemically inert, metallic dry shake floor topping for monolithic floors.

## Monoshake:

a pre-blended, quartz based topping producing a dense, tough, abrasion resistant surface suitable for most industrial applications.

Monoshake	●	●	●	●	●	●	●	●	●	●	●

## DRYSHAKE

## Key features and benefits

Economical, highest levels of abrasion resistance, low maintenance, impact resistant.

## Sealers, Curing Aids & Hardeners

DCP has developed a series of sealers, curing aids and hardeners to provide specialist products for a range of surface treatment uses.

This ensures excellent specification and lasting results for a wide variety of situations.

### **Setseal 6:**

a single pack clear acrylic resin curing aid, sealer, dustproofer and hardener.

Suitable for application to new and old concrete and cures within 24 hours.

### **Setseal 8:**

a non-staining aqueous solution of metallic silicates.

When applied to fresh concrete, renders or screeds, it reduces shrinkage and hairline cracking.

### **Stopdust:**

a clear water-based acrylic-polymer emulsion used to seal cementitious wall and floor surfaces.

It can be applied to freshly hardened concrete and dries within 24 hours.

## Marine Flooring

DCP has built an excellent reputation in the specialist field of marine flooring. The Fildek marine systems have been developed over many years with successful installations in vessels and offshore platforms.

This high performance, Wheelmark Approved range features solvent free technology.

Tested in accordance with IMO standards and approved for use in marine floor applications by DNV.

### Fildek Decor System:

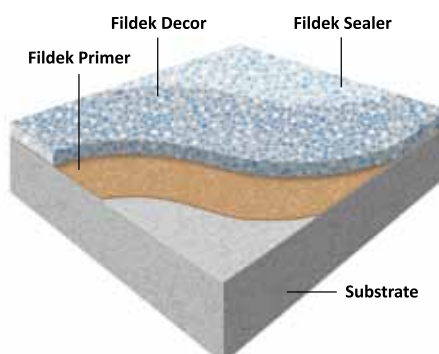

this solvent-free epoxy based 6mm decorative floor screed has excellent durability and slip-resistance. Applied by trowel it can be coved and laid to falls.

### Fildek 405:

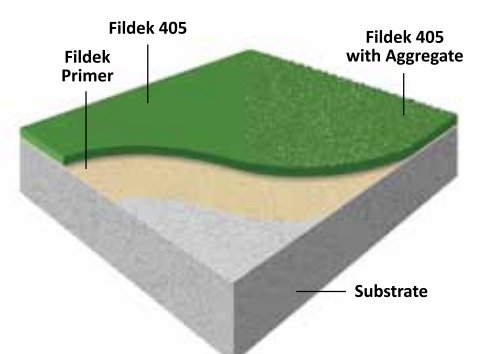

a solvent free, flexible, high build epoxy coating. It is resistant to weathering providing a tough, waterproof membrane with crack bridging properties.
