Notes on GREEN GUIDE rating

In the case of Renderplas Ltd products, the BRE's Green Guide to Specifications (fourth edition) does not directly cover the rendering or its components on exterior and interior walls. Considering the low impacts and Ecopoint scores achieved by Renderplas Ltd, the use of its products should not adversely affect the scores of complete walls systems. Taken separately and in view of the processes and impacts, Renderplas Ltd products could reach A or A+ in a comparative scale that would include the results of its competitors, mainly due to the use of recycled PVC which represents 98% of the product weight.
