

# Indian Natural Stone Paving Range

Heaton 550 mm x Random paving

Bingley Stone's natural Indian stone paving range is held with the same regard as that of our more expensive range of traditional Yorkstone pavings due to its appearance and high specification, yet is more versatile as it is available in a wide range of colours & uniform sizes. Due to the nature of the stone, experienced masons and our strict quality control process the products supplied are of an extremely high standard.

Not only is this paving range aesthetically pleasing, but extremely flexible as it can be an asset not only to gardens, but for internal floor applications.

The natural Indian stone paving is an attractive, durable paving flag, which is split into two product categories. The first being Indian Sandstone which consists of Staveley (brown), Heaton (grey), Moorcroft (varying shades of buff), Langley (yellow/buff) and Calverley (varying shades of yellow/buff). The Second range being Indian Limestone including Belmont (black/blue) and Pendle (blue/green/grey).
