

ARMOUR FX

TIMBER EFFECT

HomeAway Inc | lauckgroup | ©Paul Bardagjy

Created from natural wooden planks with an exposed grain detail, ArmourFX 'Timber Effect' panels are designed for decorative wall cladding. The panels are ideal for a shuttered concrete look for interior theming and branding. Available in two metre lengths, four standard colours and four textures, 'Timber Effect' panels can also be custom colour matched. The panels are tough and durable, cast from a polymer modified gypsum mix with post-consumer recycled material.

When ready, the panels are delivered direct from a single source workshop in custom-made packaging to ensure safe arrival on site. The panels are then simply applied directly to the wall using high grade gypsum adhesive, and can be cut on-site as required.

Timber Effect Range

Original

Rugged

Cinder

Shuttered

Colours and patterns illustrated are for guidance only. Due to print limitations, the exact patterns, colours and shades may vary from those shown. Please request a sample for accurate colour representation.
