Gallagher
Perimeter Security
Solutions

Do you want to be immediately alerted of disturbances on the perimeter?
Does your perimeter system actively deter potential intruders
with a safe, non-lethal electrical pulse?

Gallagher's Perimeter Security Solutions:

- Active deterrence to potential intruders, immediate detection and notification
- Instant location of disturbances on the perimeter
- Compliant to international electric fence safety standards and Gallagher Code of Practice
- Options in fence appearance to ensure perimeter is appropriate for surroundings
- Standalone system or direct interface with integrated security systems
- Single platform for managing perimeter security across multiple sites

First point for access control

- Stop unauthorized access to site using access control
- Prevent inadvertent access to ensure public safety and duty of care
- Protect against vandalism
- Provide a psychological deterrent and physical barrier to intrusions

Flexible and scalable system

- Standalone system or software controlled solutions
- Systems can be designed to be visually assertive, or subtly blend in with the surrounding environment
- Unlimited expandability and upgradable according to the site's needs
- Fence Integrity Monitor available as an intrusion detector with or without the deterrent electrical pulse
- Variety of disturbance sensors to enhance perimeter intrusion detection

Superior design and engineering

- Designed to minimize false alarms caused by weather or wildlife
- Gallagher's dual pulse feature provides twice the detection and deterrence
- High quality materials designed to withstand harsh environments and prevent corrosion
- Divided and monitored by zones to make locating disturbances immediate
- Gallagher Security Fence Keypad provides a user friendly on-site interface to control alarm zones

Worldwide, Gallagher delivers business integrated security management:

- Personnel workflow
- Security and risk management
- Business continuity

- *Single scalable platform*

Gallagher Command Centre allows central configuration and management of:

- Access control
- Intruder alarms
- Perimeter security
- Compliance
- Multiple zones within a single site
- Multiple facilities

- *Automatically execute business policy* by enforcing compliance with regulation

- *Fully integrated intruder alarm management* to channel alarms from integrated systems to Gallagher Command Centre

- *Perimeter security solutions* configurable for any type and size of site using multiple technologies

- *Networked perimeter security* system with full configuration, control and monitoring through Gallagher Command Centre

---

Gallagher is a global technology supplier of integrated access control and perimeter protection, encompassing both hardware and software systems, and professional services. Gallagher delivers electronic access control, intruder alarms management, perimeter security and compliance management through a single integration platform.
