

Global leaders in flexible couplings,
drainage & plumbing systems

Universal Adaptors

D95/D96

Universal Adaptors are products that will allow different sized pipes to be connected to 110mm underground drainage. The D95 and D96 adaptors are both made from an EPDM Rubber.

Universal Waste Adaptor (D95)

D95 Universal Waste Adaptor will allow waste water pipes of 32mm, 40mm and 50mm to be connected directly into 110mm underground drainage pipe. Simply cut off at the correct size to give a tight seal around the pipe.

32mm

40mm

50mm

Universal Rainwater Adaptor (D96)

The D96 Universal Rainwater Adaptor will accept 65mm square and 68mm round downpipe. External rainwater downpipes can be connected directly to a surface water drain or, depending on the design, via a gully trap to the underground drainage system.

68mm Round

65mm Square
