# GRP Roof Turrets

We manufacture a large range of GRP finials which are produced as standard in a Lead effect grey or Verdigris Copper finish, although we can produce them in virtually any BS colour where required, often at no extra cost.

Each of our standard finial designs can be adapted to turn them in to a bespoke solution to suit your requirements with the addition of spikes, extra balls and base skirts.

## Why GRP ?

GRP is a light weight but strong material which is colour impregnated and requires no painting.
