

Tilebrick™

Creating innovative & contemporary architecture

An extruded durable clay unit with clever profiled edges and a tile-shaped front face which replicates a tile-hung wall elevation when mortared together. Tile-hung elevations are frequently chosen between first floor level and eaves to create a decorative alternative to brickwork.

Project: Housing, Bermondsey Island, London SE1

Architect: Urban Salon

Product: Tilebrick™ Smooth Blue

Tilebrick™ is increasingly now being used in contemporary architecture to give a new dimension to facades in strong base colours, enhancing the design elements of the building whilst retaining the benefits of structural masonry.

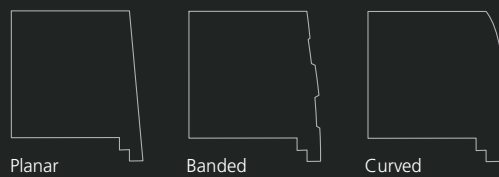

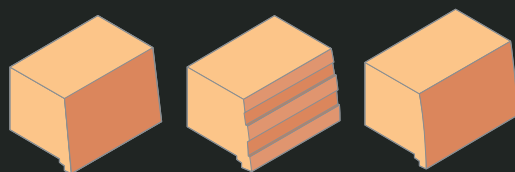

Project: Private House, Brockwell Park, London SE24

Architect: Zac Munro Architects

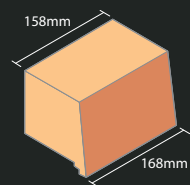

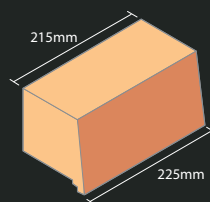

Product: Tilebrick™ Smooth Blue
