

Fireborn®

Project: Aston Brain Centre, Aston University, Birmingham
Architect: RPS
Products: Fireborn Natural Blue & Fireborn Natural Cream 440 x 215mm

Wanting to use a rainscreen cladding effect to create an innovative and contemporary design, architects RPS chose Fireborn large format clay blocks on Aston Brain Centre at Aston University, Birmingham, to create the effect whilst keeping within budget constraints.

Fireborn Natural Blue and Fireborn Natural Cream in 440 x 215mm units were used. Because of the complexity of the project, Ibstock's Contract Management Service worked closely with both the architect and contractor throughout the design and build process to ensure the products were delivered efficiently and on time. The use of Fireborn has become increasingly popular on public buildings due to its ability to create a modern contemporary finish without compromising durability.

The Glazed Fireborn® range is only available in standard block size.

requirements

For normal elevations an M6 mortar [1:½:4 cement:lime:sand] will be suitable when used at a consistency appropriate for the weight of the units. For stack bonding, stainless steel ladder type bed joint reinforcement should be used at each course. For further information contact your local Design Advisor.
