**500**  
MILLION YEARS  
IN THE MAKING

WELSH SLATE LTD IS THE WORLD'S LEADING SUPPLIER OF HIGH QUALITY SLATE FOR A PEERLESS RANGE OF EXTERIOR AND INTERIOR DESIGN APPLICATIONS.

## CONSTRUCTION AGGREGATES

Welsh Slate provides a wide range of products for precast and ready mixed concrete, civil engineering, house building and the water industry.

These include:

### Granular Sub-Base Type 1

When compacted this provides excellent load bearing qualities, used in road construction, car parks, footpaths and driveways.

### Pipe Bedding

Can be supplied in various sizes to suit all pipe diameters, larger sizes are suitable for French Drains and beneath foundations.

### Washed Sand

For use in precast and ready mixed concrete and other manufactured construction products.

### Slate Sand

Compacts well to create a solid base making it ideal for laying block paving.

### Capping Layers / Crusher Run

Used in road construction between drainage layer and sub base. Can also be used as bulk fill to bring up levels on site.

### As Dug / Fill

Primarily used for filling large voids, tends to be 500mm down.

All certificates of compliance are available on request.

If you have a specific requirement or are unsure of the material you require then please call and our experts will advise you.

**Blue** 50-30mm

**Blue** 30-10mm

**Plum** 50-30mm

**Plum** 30-10mm

**Green** 50-30mm

**Green** 30-10mm

## DECORATIVE SLATE CHIPPINGS

A feature of Welsh Slate is that it does not oxidise and keeps its natural colour forever. A further benefit when compared to other aggregates is the natural flat shape which provides better coverage per tonne and therefore value for money.

Welsh Slate chippings provide an attractive practical mulch for gardeners and landscapers. Available in four colours, Plum, Blue, Green and Grey from our quarries in North Wales.

Welsh Slate's aggregates are suitable for domestic and commercial applications including garden footpaths, flower / shrub beds, weed suppression, pond lining, municipal car parks and footpaths, caravan parks, golf courses and cycle and forest tracks.

Chippings are available in two sizes 30-10mm and 50-30mm.

## TOP SOILS

Our topsoil is blended with sterilised PAS100 Compost, it provides the vital nutrients needed to establish vegetation. It is multipurpose topsoil and is suitable for all landscaping requirements including grass sowing, trees, shrubs, turfing, herbaceous borders and other plantings.

This is high quality topsoil compliant to British Standard BS 3882. The composition of the soil helps retain moisture in dry weather and the soils natural free draining properties, without the loss of vital nutrients, are ideal during the winter months.

Our topsoil helps create good quality soils with the required properties, so that green areas can be introduced.

Welsh Slate topsoil can be used on brownfield land development to help improve previously contaminated sites.

PAS100 Compost can be supplied separately to mix with existing soil on site, to improve its quality.
