

MPRT

## MPRT

### PROGRAMMABLE ROOM THERMOSTAT

MPRT is an easy to use programmable room thermostat. It utilises Smart Start technology which can give the user considerable savings on heating bills by varying start-up times. The Smart Start system is continually learning the temperature rise requirement, delaying the startup of the system, therefore saving energy during milder weather. A radio frequency version is also available.

#### PRODUCT SUMMARY

- Uses Smart Start technology
- 24 hour or 7 day programming
- 3 temperature settings - comfort, economy (set back) and frost
- 4 programmes (3 preset, 1 adjustable) with manual override
- Clear, accurate LCD display
- Compatible with MYSON FLOORTEC underfloor heating systems and connects to a 24V hard wired wiring centre. One thermostat can control several loops
- Also available in chrome and black
