

BUILDING REFURBISHMENT PROTECTING YOUR CONCRETE ASSETS

BUILDING TRUST

INTRODUCTION

Sika building refurbishment is based on helping the owner protect their assets, and prolonging the life of the building, by rehabilitating and restoring the concrete surfaces back to their original quality. Where required, Sika provides structural strengthening solutions for concrete to take increased loads. Sika's solution and products are supplied in accordance with BS EN 1504.

THE REPAIR PROCESS

INVESTIGATION - carry out an assessment of the structure.

DIAGNOSIS - identify the root causes of damage.

OPTION - consider the various repair options to offer the client the best value to protect their concrete structure.

REPAIR - select the correct materials for the repair, corrosion-control and protection of the concrete structure.

MAINTENANCE - consider how, what and when future maintenance is required, and how it should be done.

SURVEY OFFERING

Sika can interpret concrete condition surveys, or work alongside you to process the results. This will give an understanding of the condition of the concrete, and the cause of any concrete defects, enabling Sika to offer the best remedial solution.
