# Sika® ComfortFloor® Marble FX

The solution is where the design desire is

**EXTEND YOUR CREATIVITY** on the floor with different application tools and Sika® ComfortFloor® Marble FX system.

## Sika® ComfortFloor® Marble FX SYSTEM

### CREATIVITY

Sika® ComfortFloor® Marble FX is the latest PU coating system from the Sika® ComfortFloor® range. Through a newly developed colouring method of the base material Sikafloor®-3000 FX, it is possible to create various structures and patterns during installation. Depending on the tool used, fine structures or marble-like patterns can be created. The professional applicator is able to design tailor-made floors for your object in a variety of basic colours. In addition, Sika® ComfortFloor® Marble FX meets the highest standards of underfoot comfort as well as abrasion resistance and resistance to mechanical damage.

### SUSTAINABILITY

In the development process we made sure that the system meets the strictest emission requirements of various green labels in order to protect the applicator and later on, the users of the buildings, in terms of ecology, health and safety.

### MATT LOOKING FLOOR SURFACE

Part of the Sika® ComfortFloor® Marble FX is the new Sikafloor®-306 W top coat, which gives the floor surface a elegant matt look and makes the seamless coating system easy to clean.

### Sikafloor®-3000 FX - THE BASE COAT OF Sika® ComfortFloor® Marble FX SYSTEM

The newly developed base coat offers many advantages for the user as well as for the professional applicator during the application process:

- Two part, aliphatic PU
- Solvent free
- Self smoothing
- Very low VOC emission
- Comfortable
- Foot warm
- Permanently elastic
- Good mechanical resistance
- Very high yellowing resistance
- Decorative designs due to the special blend of pigments
- Easy to apply

Layer	Product
1. Primer	Sikafloor®--150/-151
2. Base coat	Sikafloor®-3000 FX
3. Top coat	Sikafloor®-306 W

### Sikafloor®-306 W - THE TOP COAT OF Sika® ComfortFloor® Marble FX SYSTEM

Sikafloor®-306 W is the result of the latest sealer development and an extension of the Sika® ComfortFloor® range. Its appearance is more matt than existing sealers, which results in an extra elegant looking surface and makes Sika® ComfortFloor® Marble FX outstanding. Additionally it is elastic and can therefore very well withstand point loads.

Key advantages:

- Two part, aliphatic PU
- Very low VOC and odor
- Water based
- Easy to apply
- Good UV and yellowing resistance
- Elastic, resistant against point loads
- Easy to clean

Inspiration from our environment and from everywhere.

# THE VISUAL EFFECTS COME FROM APPLICATION

Sikafloor®-3000 FX is distributed on the surface and then reworked with different tools. Depending on the tool used, the floor gets its individual look.

If you use a special notched trowel you can create an effect which looks similar to wood.

Specific marble effect achieved with a trowel or with a soft and flexible blade.

Or just use different kind of rollers, which can create a more uniform structured pattern.

# COLOUR SCHEMES BRIMMING WITH CHARACTER

For a meaningful floor design

**A WELL-CRAFTED COLOUR PALETTE** can do wonders for an interior space.

The use of colour and graphic images can align to the existing logo and symbolic colour of the building type to achieve an overall visual aesthetic, while it can also elicit emotions and unique perceptions of space. It has an ability to calm or excite, can make a room appear smaller or more grandiose, or even trigger subconscious reactions. Colour is the most vital, impactful and expressive design element in a designer's toolbox.

The colour examples shown on page 3 and 7 illustrate how the visual effect appears in different colour shades. For the Sika® ComfortFloor® range we supply 72 standard colours. Out of this range most colours are also available with Sikafloor®-3000 FX.

## FOR MORE INFORMATION:

### WHO WE ARE

Sika Limited and Sika Ireland Limited are part of the global Sika Group, specialising in the manufacture and supply of chemical based products. Sika has a leading position in the development and production of systems and products for bonding, sealing, dampening, reinforcing, and protecting in the building sector and the motor vehicle industry. Sika has subsidiaries in 101 countries around the world and manufactures in over 300 factories. With more than 24,000 employees Sika generates annual sales of CHF 7.09 billion (£5.45bn). We are also committed to providing quality, service, safety and environmental care.

In the UK and Ireland, we provide market-leading solutions for concrete, waterproofing, roofing, flooring, refurbishment, sealing & bonding, and industry, and have manufacturing sites in Welwyn Garden City, Preston, Leeds, Atherstone, Wishaw and Dublin with more than 950 employees and a turnover of more than £260 million.

The information, and, in particular, the recommendations relating to the application and end use of Sika® products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The proprietary rights of third parties must be observed. Please refer to our homepage [www.sika.co.uk](http://www.sika.co.uk) for our current standard terms & conditions applicable to all orders. Users should always refer to the most recent issue of the Product Data Sheet for the product concerned, copies of which will be supplied on request.
