

Case Study

THE BRAYBROOKE BEER COMPANY

www.aco.co.uk

THE PROJECT

Braybrooke brewery is a small privately owned micro-brewery which was recently constructed at Lower Lodge Farm near the village of Braybrooke in Northamptonshire. Founded by Cameron Emirali and Luke Wilson, formally of Soho restaurant '10 Greek Street', and beer distributor Nick Trower, the brewery is focused on brewing lager and German styles of beer.

THE BRIEF

ACO Building Drainage was approached by Ben Skinner of contracting firm, Skinner Brothers, to provide advice about the type of drainage required for the project. The drainage system needed to cope with high flow rates, be easy-to-clean, capable of dealing with heavy loads caused by on site traffic and be fully compatible with the brewery's tiled flooring.

THE SOLUTION

Following extensive consultations with Skinner Brothers and the brewery owners along with numerous on-site visits, ACO Building Drainage specified its popular Modular 125 channel with gully tops and gully 218 bodies, C250 ladder gratings which could cope with loads caused by on site traffic, and sediment baskets. The specification of removable ladder gratings also minimised cleaning costs and optimised hygiene for the brewery.

Having never previously completed a brewery installation, Ben Skinner and his team relied heavily upon the experience and expertise of the ACO Building Drainage team who provided technical support at every stage of the project from system design through to installation. The project was successfully completed on budget and on time.

ACO. The future of drainage

DRAINAGE FOR FOOD & DRINK MANUFACTURING

Drainage is critical to the success of any food and drink manufacturing facility whether you're an international brewer or a manufacturer of ready meals for a major supermarket. It impacts upon hygienic performance, sustainability and profitability, and ultimately upon public health.

We design and manufacture drainage products that deliver the ultimate hygienic performance and our HygieneFirst philosophy underpins our entire approach to product development.

This includes a commitment to making ongoing and significant investments in R&D, working in partnership with every part of the industry to improve our own knowledge and adhering to the very highest manufacturing and design standards. We were also the first drainage company to become members of the European Hygienic Engineering and Design Group (EHEDG).

Our products are used by a wide variety of food and drink businesses including breweries, dairies, meat and fish processors, and cheese makers in applications including high risk areas, food preparation areas, delivery areas and refrigeration facilities.

IN WHICH SECTORS DO WE OPERATE?

ACO Building Drainage specialises in the development and manufacture of high performance drainage systems for a wide range of sectors

Food & Drink
Manufacture

Commercial kitchens

Hotels

Infrastructure

Commercial &
Industrial

Healthcare

Education

Sport & Leisure

Residential
