Wildflower Plug

Product Data Sheet

Product Data Sheet

General Information

Radmat Wildflower Plugs are ready to install plug plants grown in the UK to suit the environment climate. The range of species provides the opportunity to select plant mixes to achieve a variety of objectives including: extending the flowering season, managing degrees of shade or exposure, orientation and/or indigenous planting requirements.

The range of species provides the opportunity to select plant mixes to achieve a variety of objectives including: extending the flowering season, managing degrees of shade or exposure, orientation and/or indigenous planting requirements.

Installation instructions

Install by hand into a suitably prepared and irrigated Radmat growing medium at the specified rate per m². Insert so root ball is below the finished growing medium surface. Once installed irrigate for the prescribed period based on season.

Directions of applications

Delivery Form

Trays of plugs
