

SMARTstack

Simply the easiest and quickest chimney to install

Setting the Standards

SMARTstack

GRP Chimney

What if you could squeeze your budget?

Maintain design quality.

Choose products that are preferred on-site.

**Be low risk and environmentally responsible...
you'd keep everyone happy, finally.**

SMARTstack is an all-in-one solution that cuts the cost of labour and materials in one fell swoop. It takes just a little time to fix and requires no specialist skills. You won't need to provide wasteful bricks either: our GRP bricks look so real, you'll be pleased they last a lifetime.

Simply the easiest and quickest chimney to install

- No maintenance costs.
- No leaks, BBA certified.
- No brick supply or cutting.
- Anti-condensation, positive ventilation.
- Intricate GRP brick replicas to match your street scene.
- All flashings and lead apron incorporated into **SMARTstack**.
- Excellent drainage via concealed channel.
- Lightweight, no additional loading to roof structure.
- Consistently perfect aesthetics.

Convenient hook-eye for safe handling and fast installation.

Anti-condensation, proper ventilation to chimney top.

All flashings and lead apron incorporated into **SMARTstack**.

Looks so real you'll have to touch it to check

Latex moulds are gently peeled back to reveal the grain of natural brick in phenomenal GRP detail. From brick samples, we colour match precisely for consistency between walls and chimneys.

SMARTstack comes to life during the finishing stages, where we apply tints and colours by hand, creating the depth of colour found in natural brick.

Inspired by our R&D department, we've patented our unique design. Investment into development, technology and people enables us to capture every facet of a brick's surface. This level of detail simply can't be achieved through the traditional methods used by many of our competitors.

SMARTstack delivers consistently perfect aesthetics.

Regional support and on-site training

Technical Advisors are on-hand for comprehensive support that doesn't end once you've signed the cheque. From specification and ordering, to installation and beyond, you can draw on our specialist input, based on our experience since 1985. Technical advisors are just a phone-call away, and our customer service team are ready to visit you on-site to train your people in correct product installation, overcoming any issues on the spot.

Production capacity and tracked delivery

No matter how big or small your order, we have the capacity to produce the volume you need to ISO standards. Ensuring that products are delivered to your building schedule is paramount. Our fleet of tracked-vehicles are charged with the task and can meet your exact delivery requirements.

In-house Architects to share the workload

Work with our in-house architects early in the design process to allow you to focus where you're needed. We'll supply detailed CAD drawings for your convenience, as well as all documents to support your specification and planning application.

STORM KING

Doing the right things and doing things right:

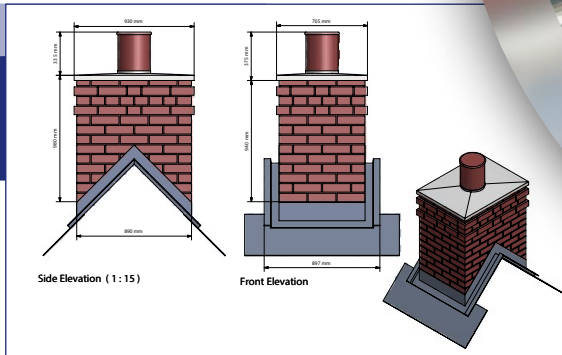

- Special colour options
- BBA Certified
- ISO 9001 Quality Management Systems
- Meets NHBC Technical Standards
- ISO 14001 Environmental Management Systems
