

BAYroofs and balconies

Simply the safest bay roofs with extra design capabilities

GRP BAYroofs and balconies

design freedom

What if your project could incorporate clever design ideas, whilst being cost-effective and safe? Install authentic architectural features that are well-insulated and need little to no maintenance. If you could ensure quality fabrication assembled to ISO standards, too... you'd have something special up your sleeve.

There's no need to compromise on the way your designs have been interpreted, we fabricate to your exact specification, affording you full control over costs and aesthetics. With the proper internal structure and insulation, our roof products can be used to create design-led balconies that are secure and stable.

- BBA certified and independently assessed to UKAS standards
- Modern GRP technology for perfect recreation of natural materials
- Tight tolerances to your design specification
- Greater design flexibility that is repeatable in volume
- Hand-checked quality control by full-time quality managers
- Dry fit, requiring no specialist trades for installation
- Ideal for high strength to weight requirements

Our modern process means less harmful styrene emissions and less wastage

RTM Detail Moulding

Structural frames to engineered details

01827 311100 | stormking.co.uk

Why you'd never know our bay roofs and balconies are GRP

Male and female moulds are gently separated to reveal the phenomenal GRP detail of the soft grain of timber and the Earth's full spectrum of natural materials. Our in-house quality managers hand-check every inch of every piece, ensuring nothing but perfection from our ISO-controlled Resin Transfer Moulding all to BBA standards.

Inspired by the latest technology

Investment into RTM, technology and people enable us to create the dynamic detailing found on the surface of natural materials. This level of detail simply can't be achieved through the traditional methods used by our competitors.

Modern factory with highly skilled technicians and cutting-edge fabrication. Including over half a million square feet of manufacturing capacity.

Regional support and on-site training

Technical Advisors are on-hand for friendly support that doesn't end once you've signed the cheque. Our people can be on-site within 48 hours to train your team in correct product installation (for speed, safety and waste reduction). From specification and ordering to installation and beyond, you're welcome to draw on our specialist experience and support from **in-house architects who speak your language.**

Production capacity and tracked delivery

No matter how big or small your order, we have the capacity to produce the volume you need, to ISO standards. Ensuring that products are delivered to your building schedule is paramount, and our fleet of tracked-vehicles are primed to meet your exact delivery requirements.

Doing the right things and doing things right:

- /// BBA Certified with Building Regulations
- /// ISO 14001 Environmental Management Systems
- /// ISO 9001 Management Systems
- /// Meets NHBC Technical Standards
- /// 0.71 Eco-points per ton
- /// Sustainability - We only purchase timber from suppliers registered to a recognised FSC/PEFC scheme
