

Flooring Profiles

Introduction

Dear Customer,

Contained in this 2019 dedicated flooring profiles catalogue, are hundreds of transition and edging profiles for numerous flooring situations.

We trust you will find a suitable profile for your project and look forward to being of assistance in supplying you with "in flooring terms", the final detail.

We recognise the choice available could be time consuming to scan through all pages and we are more than happy to suggest suitable profiles upon request of a customer enquiry.

Since 1986, we maintain our objective to produce the finest quality flooring profiles and accessories.

Drawings & Illustrations

The profiles depicted in this catalogue are shown approximately 75% scale with every effort having been made to ensure accuracy of illustration and dimensions given. However, we recommend that samples be requested where critical sizing is required.

Similarly, where infilling colours and metal finishes are shown, these are representative only. Please request a sample for true colour/metal finish referencing.

C.A.T. reserves the right to alter or change, within reasonable limits, the published dimensions of its profiles, having regards to the nature of the product and its intended use.

C.A.T. Logos, Brands and Products

Please contact our marketing department should you wish to include C.A.T. logos, brands or products in your own marketing material or on your website.

C.A.T. and BIM (Building Information Modelling)

To assist designers and architects, C.A.T. are currently working towards producing product data sheets compatible with BIM Level 2 requirements. Please contact our office if you require these data-sheets for any of our profiles you wish to incorporate in your specification. 3D images will also be provided upon request.

Important Information

Orders for brass profiles are always supplied as 'Polished Brass' unless a special finish is specified at the time of ordering.

When selecting brass profiles, please consider that all brass will tarnish in the atmosphere over a period of time dependent upon the environment in which it has been installed.

The contact with fluids, including water and cleaning chemicals, will accelerate the tarnishing process causing staining which will be difficult to remove.

Antique Brass and Antique Bronze finishes are a chemically applied process and are hand finished with a variance from batch to batch. They are not foot-traffic resistant and are designed to create an aged, unpolished effect.

For maintenance instructions, please visit www.thecatweb.com or call our sales office for further assistance.

Recyclability is one property which helps to establish the 'green credentials' of a material, that is how 'environmentally friendly' it is.

We continue to make good progress in using our plastic waste stream. Looking forward we have new processes and equipment in place to allow us to use greater percentage of "factory process recycled waste stream material" across our plastic range. We are working with our suppliers and clients in education and implementing new green products and processes.

Brass consists of alloys predominantly copper with small amounts of zinc, lead, aluminium and manganese to provide improved properties.

The brass industry throughout the world depends on the recycling of brass scrap. Making brass from copper and zinc would be uneconomical and wasteful of raw materials so, since new brass products are made from recycled scrap, brass is said to be sustainable.

In the UK, brass manufacturers use almost 100% brass scrap.

Interesting Fact: Copper is naturally present in the Earth's crust and is the oldest metal used by man. The first copper coins date back to 8700BC.

This symbol appears throughout this catalogue to denote that certain products or supply variations are available 'TO SPECIAL ORDER'

Please check with the sales office for availability details prior to ordering.

Stick Fix

look for the Stick-Fix™ logo

Key Benefits

No drilling or mechanical fixing required

No risk to underfloor heating pipes

No risk to underfloor cables

Rapid install time

General

A solvent free, rubber resin bonding medium based on hot melt adhesive which is factory affixed to a selection of C.A.T. flooring and wall protection profiles to facilitate adhesive-only site fixing.

Key Properties

- Solvent free
- Very aggressive, pressure sensitive adhesion
- Non-hardening, permanently flexible bond
- Forms strong, waterproof bond
- Instant fix - no curing time required
- Service temperature 0°C to 40°C

Technical Properties

Description	Units	Nominal Value
Specific Gravity	g/cm ³	0.98
180° Peel Adhesion (23°C)	N/cm	25
Softening Point (Ring and Ball)	°C	85
Cohesion	Kgs/cm ²	6
Initial Tack (Rolling Ball)	mm	30

Floor Preparation

The floor/step surface to receive the adhesive only fixing must be completely free of dust, grease, paint or other contaminants likely to prevent or compromise the effective bonding of the profile to the substrate material.

Additional Information

Stick-Fix should not be used where good chemical or UV resistance is required.

The specifier/installer should determine the suitability of adhesive-only fixing having taken into account the nature of the application and the type and condition of the substrate.

In determining that adhesive-only is appropriate, the specifier/installer shall assume all risk and liability connected therewith, including correct site preparation.

Fabrication And Special Services

Flooring Profile Curving

FABRICATION CASE STUDY

Project:	Luxury apartment development, London
C.A.T. profile specified:	Kliks End Stop with KB2 Base
Application:	Wall perimeter expansion trim detail
Special finish:	Powder coat to RAL 7037 30% Gloss

LOCATION

PLAN OF CURVE

PROFILES BEING FORMED TO SHAPE

CURVED PROFILE AGAINST PLAN TEMPLATE

PROFILES ARE POWDER COATED

When selecting powder coat finishes on floor trims, please consider the project and where products are to be installed. In this case study, the profile was used as a perimeter detail.

Important Note: we would not advise powder coating on floor profiles where high footfall is anticipated and consider low footfall environments are most suitable for this finish.

3D Printing

The benefits of having a 3D print include:

- Have a bespoke sample of a proposed solution modelled and made that can be put to the test physically and aesthetically as being fit for purpose.
- 3D print items up to 22.3cm x 22.3cm x 20.5cm using industry standard 3D printer.
- Create high-resolution 3D prints down to layer resolutions of 50 microns using Fused Deposition Modelling.
- Print strong parts with new Tough PLA from Ultimaker.
- Choose from a standard range of material types and colours. Rigid and flexible prints are possible with many more materials/colours able to be utilised upon request.

The Process

The 3D printing process exists for the purpose of making three dimensional solid objects from digital files. It is often referred to as 'additive manufacturing' because the object is created by laying down successive layers of material until the required three-dimensional shape is created. The time needed and the necessary initial investment required to produce a prototype part compared to traditional methods is dramatically reduced by this method.

The ability to rapidly prototype a design lends itself very well to the 'bottom-up' approach to solution creation. The designer can trial and error a design quickly in the real world to decide upon its efficacy before either making more tweaks or committing to the final form with confidence.

Required Information

We would be able to produce finished models from a sketch with a few key dimensions, a 2D CAD file of concept, or a 3D Model of the design. Common file types accepted are DWG, DXF, STL, STEP, IGES, OBJ.

Flexible or rigid filament can be specified, along with material type and colour.

If a specified level of detail is required, the layer thickness can also be specified (microns).

Lead Times

Lead times will always depend upon complexity, size and quality. We will always endeavour to supply our 3D printed samples within 7 days of a request.

The Cost

Due to the bespoke nature of 3D printing, the variety of complexity and build times is great. Therefore we can only provide a quote based on your eventual STL file. To get a quote, please send a file or drawing to us, stating what quality, material and colour you require and how many samples you need printing.

Fabrication And Special Services

Submitting Plans & Drawings

Where it is impractical to supply a template of the required curve, a copy of the project drawing should be submitted. This must indicate radius, overall length (arc and any adjoining straight) and all other information necessary to effect an accurate supply. It is the responsibility of the customer to scale from architect's drawings.

The length of this straight varies dependent upon the radius dimensions. An allowance should always be made when ordering formed profiles, particularly with this type of curve.

Plan drawings must include all relevant information such as whether the curve is to be concave or convex, the overall length of the arc and of any straight sections.

Where a concave curve is to adjoin a convex curve, they must be separated by a short straight section.

Whatever the fabrication or modification, please check with the C.A.T. sales department or technical representative to determine that the chosen profile is suitable for the purpose.

Fabrication And Special Services

Bespoke Profile Extrusion

At C.A.T. we work closely with specifiers and flooring contractors to provide profiles specifically for their project floor transition needs.

This close association has resulted in C.A.T. producing and stocking a truly comprehensive range of floor edgings and trims with new products being designed continually.

We are happy to initially work from a sketch of the desired section and give advice on manufacturing processes and lead times in brass, aluminium, stainless steel and PVC.

Following discussions, final drawings can be produced for client approval and from information supplied provide costings and production lead times.

It should be noted that the production and viability of bespoke sections is largely dependent upon anticipated volumes. C.A.T. are always happy to assist customers in producing profiles in the most cost effective way.

Fabrication And Special Services

Flooring Profile Curving

The curving of flooring profiles is an area of fabrication that we have pioneered in the flooring industry, as we recognised that specification of floor areas with curved designs were becoming in vogue.

Each year our fabrication department form thousands of profiles for one off residential installations and commercial projects requiring hundreds of curves.

From our extensive range of joining and transition profiles we have a solution for all types of installations where a curved trim detail is required.

From customer templates and plan drawings (where possible) we form in aluminium and brass metals and a number of stainless steel sections.

Lead times for individual curves are typically 14 working days with additional 7 working days if special finishes are to be applied. For multiple curve orders please contact our sales office for current production lead times.

Our sales office and technical sales representatives are happy to assist customers with most suitable product selection having considered effect required, installation environment and manufacturing possibilities.

Fabrication And Special Services

Flooring Profile Curving

Fabrication And Special Services

Powder Coating

Increasing our range of special finishes on offer, we can now provide aluminium trim profiles and stair nosings in powder coat finish.

The facility is subject to minimum order quantities dependent upon colour specification.

When considering powder coat finishes, please consider the project and where the products are to be installed. We would not advise powder coating on floor profiles where high footfall is anticipated and consider low footfall environments are most suitable for this finish.

Powder coat is a type of coating that is applied as a free-flowing, dry powder. The coating is typically applied electrostatically and is cured under heat to allow it to flow and form a 'skin' which is a hard finish that is tougher than conventional paint.

Whatever the fabrication or modification, please check with the C.A.T. sales department or technical representative to determine that the chosen profile is suitable for the purpose.

Special Finishes

A selection of C.A.T. products are available with special finishes.

For information on the availability of a finish on a particular product please refer the relevant product page in this catalogue.

Should you require further assistance, please contact the C.A.T. sales office.

Finishes depicted in this catalogue are representative only and are subject to print interpretation. For accurate referencing, please request a sample from the C.A.T. sales office.

Brass Finishes

Antique Brass and Antique Bronze finishes are a chemically applied process to Brass products and are hand finished with a variance from batch to batch. Antique finishes are not foot traffic resistant and are designed to create an aged, unpolished effect.

Angles & Tag Trim™ Formable Angles

The Original Since 1999

Angles and Tag Trim™ Formable Angles

A fine line between a straight floor and a great floor.

General

The Angles section of this catalogue has angles in Aluminium, Brass and Stainless Steel.

Angles create a defining line between floor coverings from 4.5mm to 25mm in height.

For Straight Runs

Standard angles are supplied with pre-punched bases for fixing.

For Curved Runs

Tag Trim angles have pre-drilled fixing tags at 80mm centres for forming curves on site.

The minimum radius to which Tag Trim angles can be formed is depicted with this symbol above which is shown against each angle:

Budget Aluminium Angles For Straights

To create a neat, straight edge between floor coverings.
Supplied with unpunched bases.
Available in full tubes only.

CLIP IN SYSTEMS

Clip In Systems

In this section you will find information on flooring profiles with a system where the base is fixed to the subfloor prior to the flooring being laid and finally the top profile being fitted into the base finishing the installation.

Kliks™ Primary Application: Commercial Environments

Comprising twin, ramp and end-stop profiles in a variety of metals and finishes

- including:
- Brass
 - Aluminium
 - Chrome
 - Antique
- Suitable with:
- Timber
 - Stone
 - Ceramics
 - Carpet

Height adjustable uPVC bases.

Kliks Slim™ Primary Application: High-End Residential and Light Commercial Environments

Comprising slim style twin, ramp and stop-end profiles in a variety of metals and finishes

- including:
- Brass
 - Aluminium
 - Chrome
 - Antique
- Suitable with:
- Laminates
 - Stone
 - Ceramics
 - Carpet

Aluminium and uPVC bases.

 Kliks Spectrum Zip™

Kliks Spectrum Zip KSP6 installation

uPVC Colour Option Clip In System Formable Profiles

Installation

Kliks profiles have been designed for simple installation. With versatile height adjustment and pre-drilled bases, the Spectrum Zip range is quick and easy to install.

Stage 1:

Bases are secured to the sub-floor with *adhesive and No.6 countersunk screws.

Stage 2:

Once the base is firmly secured to the sub-floor, the flooring can be laid up to the base section.

Stage 3:

The top section may then be fitted by hand or using a soft mallet if necessary.

Formable On Site

The following table shows the minimum radii of Kliks Spectrum Zip curves when tops are fitted in a KB1 base at normal room temperature.

Radius

Profile	Radius (m)	Tail Position
KSP5 Zip	1.5m	
KSP7 Zip	1.5m	
KSP6 Zip KSP73 Zip	1.5m	tail of ramp on the outer edge of circle
KSP6 Zip KSP73 Zip	1.7m	tail of ramp on the inside of circle
KSP2 Zip KSP3 Zip	1.5m 1.7m	tail of ramp on the outer edge of circle

Maintenance

PVC flooring profiles should be cleaned with a mild detergent with water on a damp - not wet - cloth, ensuring that the profile is wiped dry before allowing traffic to return to the area.

Polishes and industrial cleaning agents should not be used on PVC flooring profiles.

*C.A.T. recommend the use of STYCCO FLEX by F. Ball and Co Ltd, subject to following their product technical data sheet, safety data sheet and installation guidelines, available in full from: www.f-ball.com

Installation Environment

Care should be taken that the profiles are not fitted or stored, prior to fitting, in extreme conditions of cold or warmth.

The ideal conditions for fitting are with temperatures in the range of 15°C to 25°C. Allowing a period of acclimatisation will assist in achieving a satisfactory result.

Ensure when fitting the tops into the bases, the profile section is not heated with hot air guns/hot water which can lead to material being inadvertently stretched whilst being fitted into position.

If the profiles are stretched during installation they will, over time, revert to their original size, leaving gaps at the joints and ends.

Joints

The base profiles joints should be staggered with a minimum overlap of 150mm.

Wherever possible, position the joints away from the main traffic areas.

When using the profiles in curved situations, it is recommended that an adhesive fix be also applied into the base (50mm along) at the joints.

 Kliks™ Spectrum Zip

uPVC Colour Option Clip In Flooring Profiles System

Typical Applications

Carpet to ceramic and timber, timber to timber.

Spectrum Zip is curvable on site when installed with uPVC bases.

Catwalk™ PVC Clip In Flooring Profile System

Catwalk is an installation friendly PVC system designed for fast, easy curving of transition profiles on site.

Curvable to a minimum of 750mm.

Material must not be stretched when installing as this may cause the tops to contract and cause shrinkage.

When installing runs over 2.715m, always overlap top joints by a minimum of 150mm over base joints.

ReflexTM

Movement Joints

Brass

Aluminium

Stainless Steel

Reflex™ Movement Joints

General

Reflex profiles are a range of expansion and movement joints which are designed for use with all hard flooring, eliminating cracking and protecting edges against erosion. Reflex has good acid and alkali resistance and has good stain resistance properties. The joints will readily compress by 20% helping to eliminate cracking and de-lamination of the floor finish caused by building movement or thermal expansion and contraction.

Installation Guide

Movement joints should be provided in accordance with BS5385-3:1989, clauses 19 and 23.6 for floors. Movement joints should be fitted around the perimeter of the floor and where floor tiles abut fixed machinery and structural fixtures such as columns, bases, etc.

Immediate movement joints should be incorporated in large floor areas as described in BS5385-3:1989, clauses 19 and 23.6.

Terms & Conditions

Definitions:

Company: Carpet Accessory Trims Ltd (CAT Ltd).
Units 24a,b, & c, Park Avenue Estate, Sundon Park, Luton LU3 3BP

Customer: Any firm, company or person who purchases products from the Company.

Goods: Any goods or products offered for sale by the Company.

Contract: Any agreement between the Company and the Customer for the supply of goods incorporating these Terms and Conditions.

General

- 1.1 All quotations are made and all orders are accepted subject to the following conditions. All other terms, conditions or warranties whatsoever are excluded from the contract or any variation thereof unless expressly accepted by the Company in writing. Any quotation issued by the Company shall not constitute an offer and shall not be binding on the Company. Each order or acceptance of a quotation for Goods by the Customer to purchase the Goods shall be deemed to be an offer by the Customer to purchase Goods from the Company and is entirely at the discretion of the Company and is subject to these conditions.
- 1.2 If any provision of the Contract is held by a court or other competent authority to be invalid or unenforceable in whole or in part, the validity of the other provisions of the Contract and the remainder of the provision in question shall not be affected.
- 1.3 Acceptance of delivery of Goods shall constitute acceptance of these conditions where acceptance has not previously been communicated by the Customer to the Company.
- 1.4 Orders are accepted (save where the contrary is expressed in writing in the acceptance) subject to the availability of stocks of the Goods ordered at the time specified for the delivery.
- 1.5 The Customer shall not be entitled to rely on any typographical, clerical or other error or omission in any sales literature, quotation, price list, web site, acceptance of offer, invoice or other document or information issued by the Company and the Customer acknowledges that any such error or omission shall not form part of or be incorporated by reference into the Contract. Any such error or omission shall be subject to correction without any liability on the part of the Company.
- 1.6 If any Statement or representation has been made to the Customer by the Company, its servants or agents, upon which the Customer relies, other than the documents enclosed with the Company's quotation or acknowledgement or order, then the Customer must set out that Statement or representation in a document to be attached to or endorsed on the order and in any such case the Company may confirm, reject or clarify the point and submit a new quotation.
 - 1.6.1 The Company shall not be liable for any loss or damage whatsoever arising from failure by the Company to perform the Contract, whether wholly or in part, which is caused by:
 - (1) default by our suppliers, or
 - (2) any cause whatsoever beyond our control.
 - 1.6.2 Our inclusive liability for failure to perform the Contract, whether wholly or in part and for negligence (other than for negligence resulting in personal injury or death) shall be limited to:
 - (1) in cases in which Goods are returned complete and in the condition in which they were dispatched, the supply of replacement Goods.
 - (2) in all other cases, the payment of a sum not exceeding the proportion of the net invoice price which is attributable to the goods which are the subject of the claim.
 - 1.6.3 In no circumstances will the Company be liable for indirect or consequential loss or loss of profits.

Delivery

- 2.1 Time for delivery is given as accurately as possible but is not guaranteed. The Customer shall have no right to damages or to cancel the order for failure for any cause to meet any delivery times stated.
- 2.2 The date of the delivery shall in every case be dependent upon prompt receipt of all necessary information, final instructions or approvals from the Customer. Alterations by the Customer in design specifications or quantities required may result in delay to the delivery.

- 2.3 Failure by the Customer to take delivery of or to make payment in respect of any one or more instalments of Goods delivered hereunder shall entitle the Company to treat the Contract as repudiated by the Customer.
- 2.4 At the discretion of the Company deliveries to site may be made upon receipt of the Customers written instructions. The Customer must ensure that there is someone available at the delivery site address, aware that the delivery is due and is ready to receive the Goods from the delivering vehicle. If delivery cannot be made due to these conditions not being met and the consignment is returned to the factory, the Company may impose a reasonable charge for storage and re-delivery.
- 2.5 The Company shall endeavour to comply with reasonable requests by the Customer for postponement of delivery but shall be under no obligation to do so. Where delivery is postponed otherwise than due to default by the Company, the Customer shall pay all costs for storage and transportation occasioned thereby and payment for the Goods shall be made in accordance with these conditions.
- 2.6 Any packaging supplied by the Company unless otherwise expressly agreed is intended to provide adequate protection throughout normal conditions of transit of usual duration.
- 2.7 The Customer is responsible for unloading the delivery and shall be responsible for loss of or damage to the Goods during the course of such unloading. It is the responsibility of the Customer to inspect the Goods on delivery in respect of design, colour, condition, quantity and quality. The Company shall not be obliged to replace Goods once they have been cut and installed.
- 2.8 A delivery note or noted document for the Company must be signed on receipt of the Goods.

Risk and Title

- 3.1 Risk shall pass to the Customer so that the Customer is responsible for all loss, damage or deterioration to the Goods:
 - 3.1.1 If the Company delivers Goods by its own transport or in accordance with a specific contractual obligation arranges for transport of the Goods at the time when the Goods or relevant part thereof arrive at the place of delivery, or
 - 3.1.2 in all other circumstance at the time when the Goods or a consignment or other part thereof leave the premises of the Company.
- 3.2 Title to the Goods or any relevant part thereof shall only pass to the Customer upon the happening of any of the following events:
 - 3.2.1 The Customer has paid the Company all sums due and payable by it to the Company under the Contract and all other prior Contracts between the Company and the Customer, or
 - 3.2.2 when the Company serves the Customer notice in writing that the title in the Goods or such part thereof has been passed.
- 3.3 The Company may receive goods in respect of which title has passed to the Customer at any time and the Customer hereby licenses the Company, its office, employees and agents to enter upon any premises of the Customer for the purpose of satisfying itself that the condition 3.4 below is being complied with by the Customer or of the recovery of any Goods in respect of which property has not passed to the Customer.
- 3.4 Until title to the Goods has passed to the Customer pursuant to the terms hereof it shall possess the Goods as a bailee. If the Company so requires the Customer shall store the Goods separately from other Goods and shall ensure they are clearly identifiable as belonging to the Company.

Cancellation

- 4.1 Cancellation will only be agreed to by the Company on the conditions that all costs and expenses incurred by the Company up to the time of cancellation and all loss of profits and other loss or damage resulting to the Company by reason of such cancellation will be paid forthwith by the Customer.

Prices

- 5.1 All prices are, unless otherwise stated, quoted net ex-works exclusive of V.A.T. and are subject to fluctuation in the event of any increase in such costs of labour due to local or national awards or increases in costs of materials and overheads. Any increase in such costs during the period of the Contract will be added to the quoted price.

Terms & Conditions

- 5.2** In the event of any alteration being requested by the Customer and agreed by the Company in design or specification, the Company shall be entitled to make an adjustment of the Contract price corresponding to such alteration.
- 5.3** Prices quoted are for total quantities shown and the Company may not offer the rates or prices quoted for smaller quantities.
- 5.4** All deliveries are free other than orders or part orders below the minimum carriage paid order value currently applicable, as specified in a current quotation or, in the absence thereof, the Company's prevailing price list.

Terms Of Payment

- 6.1** Unless otherwise agreed by the Company in writing the terms of payment shall be net monthly account due and payable on the last day of the month following the month in which the Goods were dispatched or would have been dispatched save for the postponement otherwise due to default on the part of the Company. The Company shall be entitled to submit its invoice with its delivery advice note at any time thereafter save that where the delivery has been postponed at the request of or by default of the Customer, then the Company may submit its invoice at any time after the goods are ready for delivery or would have been ready in the ordinary course but for the request or default as aforesaid.
- 6.2** Where Goods are delivered by instalments the Company may invoice each instalment separately and the Customer shall pay such invoices in accordance with these conditions.
- 6.3** No disputes arising under the Contract, nor delays beyond reasonable control of the Company, shall interfere with prompt payment in full by the Customer.
- 6.4** In the event of default in payment by the Customer, the Company shall be entitled without prejudice to any other right or remedy suspend all further deliveries on any Contract or Contracts between the Company and the Customer without notice and to charge interest on any amount outstanding at the rate of 4% per annum above the Base Rate of National Westminster PLC in force at the time when payment was due.
- 6.5** The Customer acknowledges and by submitting an Order consents to processing and disclosure by the Company of personal or financial data relating to the Customer relevant to any credit which may from time to time be afforded by the Company to credit reference agencies, banks and credit insurers and that such organisations may process the data provided or relevant to any other matter which the Company considers reasonable including, without limitation, any commercial relationship which the Company has with any third party.

Dimensions

- 7.1** The Company reserves the right to alter or change dimensions of the Goods supplied within reasonable limits having regard to the nature of the Goods. Dimensions specified by the Company are to be treated as approximate only unless the Customer specifically states in writing that exact measurements are required.
- 7.2** The Company reserves the right to make design changes to profiles and accessories in the Company literature for reasons including improvement of performance and other factors dictated by market forces.

Loss and Damages

- 8.1** In the event of any loss or damage or delay to any Goods delivered at our risk to a Customer or to his agent or otherwise to his order, notice of the same shall be given by the Customer forthwith upon delivery (or, in case of the loss of any Goods at the time the Goods should have been delivered) and the Customer shall at the same time take all necessary steps to notify the carrier in writing within 24 hours of such loss, damage or delay and where practicable shall enter a note of the same upon the carrier's receipt. If by reason of the failure by the Customer to give any notice as provided above we are precluded from making a recovery from the carrier in respect of the loss or damage or delay complained of, then we shall not be liable by the Customer in respect thereof and the Customer shall be liable to pay for the Goods as though no such loss or damage has occurred.
- 8.2** Terms and conditions proposed by a Customer cannot be accepted by our staff without express written sanction. It is a Customer's responsibility to ensure that such sanction has been given.

Confidential Information

- 9.1** All drawings, confidential records, computer software and other information supplied by the Company are supplied on the express understanding that copyright is reserved by the Company and the Customer will not, without written consent of the Company, either give away, loan, exhibit or sell any such drawings, documents, records, software or other information or extracts here from or copies thereof or use them in any connection with the Goods in respect of which they are issued.
- 9.2** Prior written permission must be sought before displaying the Company brands or logos on a Customer's website. No other brands or logos shall be used to market, display or sell the Company's products.

Customer's Drawings

- 10.1** The Customer shall be solely responsible for ensuring that drawings, information, advice and recommendations given to the Company either directly or indirectly by the Customer or by the Customer's agents, servants, consultants or advisers, are accurate, correct and suitable. Examination or consideration by the Company of such drawings, information, advice or recommendations shall in no way limit the Customer's responsibility hereunder unless the Company specifically agrees in writing to accept responsibility.
- 10.2** The Customer shall indemnify the Company from and against all actions, claims, costs and proceedings which arise due to manufacture of Goods to drawings or specifications of the Customer where such drawings or specification are at fault or where it is alleged that they involve an infringement of a Patent, Copyright, Registered Design or Design Copyright or other exclusive right.

Data and Technical Information

- 11.1** The information contained in the advertising, sale and technical literature issued by the Company may be relied upon as accurate in the exact circumstance in which it is express. Otherwise any illustrations, performance details, examples of installations and methods of assembly and all other technical data in such literature are based on experience and upon trials under test conditions and are provided for general guidance only.

Insolvency

- 12.1** The risk in all Goods supplied by the Company shall pass immediately to the Customer or his agent or otherwise to his order. The Company shall retain sole and absolute property in such Goods as beneficial owner until such time as the monies due to the Company from the Customer have been paid in full. Until that time, a Customer shall be in possession of the Goods as bailee only and shall be deemed to have so acknowledged.
- 12.2** The Customer's rights to possession of any Goods supplied by the Company shall cease if, being an individual, he commits an available act of bankruptcy or, being a company, a receiver becomes entitled to take possession of any of its assets, or any person become entitled to present a petition for its winding up, or it is resolved that it will be wound up. Under any circumstance where monies due to the Company are not forthcoming, the Company shall be entitled in these events to enter at any time with or without vehicles upon the premises at which it is believed such Goods to be stored and to repossess them.
- 12.3** A Customer shall be at liberty in the ordinary course of business, to process and make product from and as our agent, to sell the Company's Goods, whether paid for or not. The proceeds of any such sale shall be for our accounts and shall be held in trust for us to the extent of the full price of the Goods.

Force Majeure

- 13.1** Neither party shall be under any liability for any delay, loss or damage caused wholly or in part by act of God, governmental restriction, conditions or control, or by any reason of an act done or not done pursuant of a trade dispute involves its employees, or not by reason of any other act, matter or things beyond its reasonable control including failure by the other party to carry out provision for these conditions.

Legal

- 14.1** The Contract shall be governed and interpreted exclusively according to the Law of England and shall be subject to jurisdiction of the English Courts only.
