

A modern, two-story house with a light-colored stucco exterior and a section with vertical wooden cladding. Large floor-to-ceiling windows and sliding glass doors offer a view into the interior, which includes a balcony with a white sofa and a view of a lake and trees. A large, leafy tree stands behind the house.

SKYFORCE Juliet Balcony

SKYFORCE is the juliet balcony that doesn't compromise on style. All the visible parts can be customised to match the finish of the windows and doors, so SKYFORCE fits perfectly and discreetly into the clean lines of modern homes, and because it's made of glass, you'll always have the best view in the house. The SKYFORCE juliet balcony is compatible with REHAU's TOTAL70, SYNEGO and GENE0 window systems.

Seamless integration

SKYFORCE system component parts are available in anodised aluminium, anthracite grey (RAL 7016) and white (RAL 9016). The balcony can also be powder-coated to match your windows in any RAL colour. Together with its concealed attachment system, it all makes for a thoroughly stylish appearance. SKYFORCE doesn't have to be fitted to face brickwork or render detail hence there's no obtrusive bracket details on the buildings facade.

Certified Safety

REHAU have developed a combined window, door and SKYFORCE juliet balcony solution with specially designed and dedicated reinforcements which are structurally engineered to be fully certified and building regulations compliant giving protection from falling, collision and impact.

It's all taken care of with SKYFORCE. Thanks to our 'all under one roof' principle, there's no need to spend time coordinating installation with multiple companies. Your juliet balcony will be professionally installed by a specially selected REHAU partner, ensuring it's a perfect fit for your REHAU windows and doors.

Versatile application

The SKYFORCE juliet balcony is compatible with REHAU's TOTAL70 system, extruded and manufactured in the United Kingdom, as well as our SYNEGO and GENEIO window systems.
