Our verbal and written advice with regard to usage is based on years of experience and standardised assumptions and is provided to the best of our knowledge. The intended use of REHAU products is described comprehensively in the technical product information. The latest version can be viewed at www.rehau.com/TI. We have no control over the application, use or processing of the products. Responsibility for these activities therefore remains entirely with the respective user/processor. Where claims for liability nonetheless arise, they shall be governed exclusively according to our terms and conditions, available at www.rehau.com/conditions, insofar as nothing else has been agreed upon with REHAU in writing. This shall also apply for all warranty claims, with the warranty applying to the consistent quality of our products in accordance with our specifications. Subject to technical changes.

Two-part Retrofit Window Sill

Windows. Reinvented for modern life.

The REHAU Two-Part Retrofit Window Sill

Today's housebuilders and commercial developers are under mounting pressure to deliver projects quicker than ever. As a result, modular buildings, offsite construction methods, and the need to avoid snagging issues have grown in importance.

For the perfect finishing touch

In response, REHAU has developed the Two-Part Retrofit Window Sill; a window sill designed to be installed at the very end of a build, once the risk of any on-site damage has passed.

Offering vital flexibility to fabricators, installers, and builders alike, REHAU's Two-Part Retrofit Window Sill boasts a host of features designed to add a finishing touch to any new window – and indeed any residential or commercial build project.

Description	Length m	Article No.	Pack Quantity m
Sill	6	330555-701	24m
150mm Sill Nose	6	330565-701	24m
180mm Sill Nose	6	330575-701	24m

Quick and easy clip-on system

- 1 Base unit
- 2 Clip-on sill

Keeps water out and brickwork dry

A simple and effective built-in drainage channel ensures any water that does get into the window can drain away easily without risking damage to the property's brickwork.

Avoids expensive replacement work

The two-part retrofit window sill is REHAU's response to the number of traditional one-piece window sills which are damaged on-site by construction work.

Completely secure

Once clipped into place, the window sill is completely secure, which reduces the risk of snapping.

Easy to replace

In the event of damage occurring, the nose of the two-part sill can be easily replaced without the need to disturb the window itself.

Supplied in protective tape

Every two-part retrofit window sill arrives wrapped in a protective tape to keep it in pristine condition on-site until it is ready to be revealed.

Perfect for offsite construction

For walls built offsite, the prominent window sill nose can be clipped on after delivery and assembly, at the closing stages of a project – ultimately avoiding the risk of any damage in transit.

Easy to install

The two-part make-up of the product ensures the nose of the window sill can be added at the closing stage of a project, once all other work is complete.
