Maximising Daylight and Ventilation

For projects requiring large expanses of glazing, we have three different linking options available for standard neo® and

Conservation Rooflights®. There is no limit to how many rooflights of the same length you can link.

The Conservation Rooflight® with linking bars.

neo® with Studio Designer Linking.

Things to Consider

Budget

The table below lists the linking options available and the difference in price.

Linking	Standard or Customised	Price
1. Linking Bars (Allows standard rooflights of the same length to be linked together)	Standard Range	£
2. Studio Designer (One baseplate with multiple casements)	Standard Range + Customised	££
3. Customised Linked Baseplates (Type A)	Customised	£££
Combinations of 2 and 3.	Customised	££££

Timescales

Establishing when the rooflights are required will rule in and rule out options. If the rooflights are required in a timescales greater than 3 months all options will remain open.

Lead Time	Model Availability	Linking Detail Available
<1 Week	Standard Conservation Models	Option one Linking
<2 Week	Standard neo® Models	Option one Linking
<6 Week	32 Standard Studio Conservation Sizes	Option two Linking
<8 Week	17 Standard Studio neo® Sizes	Option two Linking
<11 Week	Bespoke Conservation	Option two Linking
<11 Week	Bespoke neo®	Option two Linking
<11 Week	Unlimited Conservation array	Option three Linking
<11 Week	Unlimited neo® array	Option three Linking

Aesthetics

As linked rooflights utilise standard casements from neo®, the Conservation Rooflight® and the Conservation Plateau Rooflight, all linked rooflights benefit from:

- White linings
- A flexible choice of opening options
- Blinds

neo®.

The Conservation Rooflight®.
