Twyford have led the way in bathroom design for over 160 years. With outstanding quality, great looks and innovative features, Twyford offer a comprehensive range of products to suit any application.

This specification manual is designed to guide you through our entire portfolio of products, making it simple to specify the right products for each job. It's divided into product section and on each page colour coded logos indicate which sector the product is suitable for (please refer to page 5 for details). Each page contains all the appropriate product information including approvals.

Clever thinking

Twyford are constantly introducing innovative, market leading ideas to make the bathroom experience even better - like the first ever Rimfree® toilet, Proclean glass coating and the water saving Flushwise® system.

Clever technology and smart design features.

Great experience

Twyford have been leaders in bathroom design for over 160 years with a reputation for guaranteed quality and superb performance along the way.

Experienced team

The Twyford team are on top of their game - from design and production to marketing and merchandising. From customer service to after sales, we're all dedicated to delivering the very best in products, service and support.

Good looks

Twyford bathroom ranges don't just perform superbly, they look terrific too. Form and function combine to create style statements for the modern bathroom. Practical and durable, smart and stunning. The perfect solution, every time.

Key to logos

Twyford's water saving dual flush 4/2.6 litre cistern system. **Please refer to pages 6 - 7.**

A toilet that has no rim meaning there is nowhere for germs to hide and making it easier to clean. **Please refer to pages 8 - 9.**

Our unique Total Install® system makes installation of toilets and bathroom fittings quicker and simpler than ever before. **Please refer to pages 10 - 11.**

A revolutionary development in waterless urinal technology to eliminate odours. **Please refer to page 12.**

Twyford's Proclean is a protective glass coating which aids easy cleaning of shower enclosures by preventing build-up of limescale, soap scum, stains and dirt.

The European Water Label (EWL) is designed to help easily identify water efficient products, which when installed and used correctly will use less water and save energy and money, compared to other products available in the market. Please visit the European Water Label website: **www.europeanwaterlabel.eu** for more information.

A range of Twyford products are registered for the DEFRA Enhanced Capital Allowance Schemes (ECA). Water technology list for efficient toilets. Please visit the DEFRA website: **www.eca-water.gov.uk** for more information.

TMV2 is an accreditation for thermostatic mixing valves that conform to BS-EN 1111 and 1287. Reliable thermal safety performance for domestic bath shower or bidet use.

TMV3 is a standard created for thermostatic mixing valves in healthcare and commercial areas that have enhanced thermal safety performance and comply with NHS Estates requirements specification DO8.

Residential

Co-operative Group HQ, Manchester

This landmark building was awarded the highest ever BREEAM rating and was officially opened by the Queen on 14th November 2013. Twyford are delighted to have been involved in this momentous development, constituting the World's most environmentally-friendly building.

Good looks & great water saving ideas

Twyford lead the way in water saving innovation throughout the bathroom. With us, it's not an afterthought - everything is designed with water use reduction in mind.

Outperforming the regulations

The problem of water scarcity is increasing globally. Current usage is unsustainable, and water saving is a key element in planning for new developments. At Twyford, we design with this in mind. It's not an afterthought, it's an inspiration. Our innovative, market leading products conform to and outperform regulations, reducing water consumption dramatically, with no compromise on functionality and style.

The European Water Label

All Twyford toilets and many other Twyford products are registered and therefore listed by the European Water Label (EWL). The European Water Label is designed to help easily identify water efficient products, which when installed and used correctly will use less water and save energy and money, compared to other products available in the market.

Please visit the European Water Label website: www.europeanwaterlabel.eu for more information.

Waterwise

Twyford were the pioneers of Flushwise®, the dual flush 4/2.6 litre technology for toilets that has since become widely adopted across the UK bathroom industry, it is for this product that Twyford received the Waterwise Marque back in 2007. The Waterwise Marque - the first scheme in the UK to highlight water efficient products. It is awarded annually to products which reduce water wastage or raise awareness of water efficiency. Please visit the Waterwise website: www.waterwise.org.uk for more information.

The Flushwise® dual flush system is now available on seven out of the company's 11 ranges covering all sectors of the market from entry level to top end with a choice of designs and price points. These are E100, E200, Moda and Alcona.

Toilets

More than half (63%) of our daily water consumption at home originates from the bathroom and toilet.

Twyford have been leading the way in reducing toilet flush volumes. We have revolutionised the field by pioneering the unique Flushwise® dual flush push button toilet. Flushwise® toilets use 4 or 2.6 litres each flush, that's 60% less water than a standard toilet and is also available on concealed cisterns.

Taps & mixers

X50, X52, X60, X62, X70, X120 taps, mixers and shower valves can be fitted with flow regulators to reduce the rate of water flow. Turn off the tap when cleaning your teeth, soaping hands and shaving. A running tap uses up to 9 litres of water per minute.

Baths

Twyford's Celtic steel bath has a capacity of just 140 litres, that's an estimated 35% water saving compared to a typical standard size bath. The Opal acrylic 1700 x 700mm bath is also available in a water saving option, with a low volume capacity of only 130 litres to overflow.

Urinals

Our waterless urinals are able to flush at 1 litre for an energy saving water efficient solution. They have an electronic times flush and are low maintenance and easy to care for.

Rimfree®

Clean, green & stylish

The revolutionary Rimfree® toilets are available across five best-selling Twyford collections. There's no rim so there's nowhere for germs and dirt to hide. Light on cleaning. Light on water usage. Good looking too. Simple. But brilliant.

Visit www.twyfordbathrooms.com for more details on Rimfree®

Clean

With no concealed rim, there's nowhere for germs to hide, so the toilet is not only hygienic, it's smarter and easier to clean, too.

Green

The Moda and E100 Rimfree® toilets are available with Twyford's unique Flushwise® 4 and 2.6 litre dual flush technology, using up to 60% less water than a standard toilet.

Stylish

Rimfree® toilets are available across five best-selling Twyford collections - all with cool, contemporary design and a wide range of options including washbasins, bidets and furniture, co-ordinating to create a complete look for every bathroom environment.

Getting your installation spot on

Total Install® from Twyford

Twyford have spent a lot of time over the years talking to and discussing bathroom installation with installer, developers, architects and specifiers, in fact with all professionals across the spectrum of sanitary ware fitting. This has resulted in an installation system called Total Install®. The Twyford Total Install® system enables bathrooms to be fitted through an array of ingenious factory-fitted professional fittings. A quick and easy high quality finish, can be achieved using fewer tools, whilst also providing products that can be easily maintained.

See listed here the Total Install® features that can be found on our products, all of which are designed to make installation quicker and simpler, every time!

Washbasins - Wall brackets

Twyford Total Install® washbasins are supplied complete with factory fitted wall brackets and wall fixings for use on plaster board walls only. The brackets for the washbasins can be adjusted for easy post-installation tiling without removal. Please note, the brackets are non-load bearing and are for positioning only, therefore must be used in conjunction with a full pedestal.

Available as standard on Moda 500, 550, 600 and 700mm washbasins.

Bath Panels

View and Refresh bath panels are both available with Total Install®

The full Total Install® feature can only be achieved with the View panel when used with the 1700 x 700mm Galerie bath. Threaded magnets are supplied with the panel which can be screwed into inserts on the bath leg set. The panel comes pre-assembled with mounting plates which will simply click into place, so there is no need to build your own frame or waste time getting accurate measurements.

The Refresh panel is supplied with a magnetic wooden mounting frame which must be assembled before the panel is fitted. The panel comes pre-assembled with mounting plates which will simply click into place.

Baths

Twyford's Galerie Total Install® baths are supplied with all the necessary screws and fixings which have been standardised to reduce the number of tools required. They come complete with a factory-fitted tubular leg set which simply flips into place.

Shorter bath feet thread into inserts and make for fast adjustment and levelling. The feet of the bath also act as extra protection for the rim of the bath during transit and storage. Tap holes are smaller making taps and mixers easier to fit and align, removing the risk of seepage and too close a fit to surrounding tiling. Galerie baths also include a self-adhesive upstand kit designed to solve the problem of leakage between tiles and the bath edge.

Total Install® Pack

If you wish to upgrade your purchase with our Total Install® system, then you can select from the complete pack or the basin pack.

The complete pack consists of, washbasin brackets and fixings, pan to floor fixings and isolation valve for the toilet.

The basin packs can be purchased for either small or large washbasins and consists of washbasin bracket and fixings.

Please ensure you check suitability before you place your order.

Twyford waterless systems

Twyford waterless systems

Urine passes through the replaceable Twyford waterless system Odourwise™ cartridge, where the malodour counteractant tackles smells immediately. Friendly bacteria in the cartridge break down the uric salts, preventing the build-ups that cause blockages and as there's no water, there's no lime scale build-up either. The valve also acts as a physical barrier to prevent odours coming back through the bowl.

With no odours, no blockages and no flooding, it creates a healthier, more hygienic and pleasant environment for the user, while saving water and money throughout the system.

1. Cartridge
2. Debris catcher
3. Hygiene seal
4. Plumbing system

Features and benefits:

- Combination of microbes penetrate uric salts (making them soluble)
- Lime scale inhibitors
- Malodour counteractants overcome unpleasant smells above the urinal bowl
- Valve is non porous
- Replaces trap with a closed system
- Speeds up continuity of the flow
- Valve also acts as a physical barrier to prevent odours coming back through the bowl
- Has anti-siphonic and natural air admittance properties
- Cartridge recyclable
- Made of virgin polypropylene
- Can be disposed of in standard waste bin

Waterless systems installation package includes:

- Waste, valve & trap
- Tap hole cover
- White cartridge
- Waste key
- Flexi hose
- Valve assembly key

Twyford website

www.twyfordbathrooms.com

The Twyford Website has a dedicated area for industry professionals, including the innovative SpecMaster online product specification tool www.specmasteronline.com for use by architects, designers, specifiers and contractors.

A central download area www.twyfordbathrooms.com/professionals-area/downloads allows users to access and download Twyford technical files including:

- Product sheets (these are the pages in this document)
- Technical drawings
- 2D Files
- 3D Files
- Certificates (approvals)
- BIM Files

Multiple filters are also available to further refine downloads.

Twyford Professionals area also includes links to information on DOP and CE Marking and lists key strategic partners.

SpecMaster online

The ultimate online sanitaryware specification tool

Design and innovation are key to Twyford Bathrooms in enabling the company to meet the evolving demands of its customers and the wider market.

As a leading global bathroom manufacturer, Twyford, Part of the Geberit Group, continues to invest a significant level of resources in research and development, and this venture is a collaborative partnership with the National Building Specification (NBS), part of RIBA Enterprises. Together we have created SpecMaster, an online specification tool for architects, designers, specifiers and contractors.

Summary of key features and benefits:

- An intuitive and user-friendly tool that allows users to create and manage projects online with no software installation required
- Free registration www.specmasteronline.com
- Opportunity to share projects with colleagues securely from any internet access point
- Improved browsing and search functionality that enables accurate product choices as well as complete and compatible specifications
- Easy access to Twyford and Geberit Ceramics product portfolio, backed and powered by NBS
- Opportunity to produce and download essential specification documents and material
- Compatible with NBS standards

Twyford media library

Twyford have an online Media Library where users can browse, search and download the following:

- Product (single product images on a plain background)
- Series (roomset images)
- Logos
- Publications (brochures/leaflets)
- Inspirational (lifestyle and branding support images)

To register, please visit **<http://medialibrary.sanitec.com/twyford>** and complete the registration form. Once users have registered and been successfully verified, login details (user name and password) will be sent by email.

When using images from the Twyford Media Library, user discretion is advised and the source '**Twyford**' must always be mentioned.

If you have any questions about registration, the use of the material, or need further information, please email: **medialibrary@twyfordbathrooms.com** or call **01926 516800**.

Regulations & Standards

The following information gives references and sources for UK Regulations and Standards for sanitary provision in commercial and domestic buildings.

These may not be applicable in countries and regions other than the UK and may differ between England, Wales, Scotland & Northern Ireland.

The requirements for the provision of sanitary fittings are, in general, governed by the UK Building Regulations. These, in turn, relate to British and European standards. For some applications specific guidance documents may be relevant e.g. Healthcare.

Twyford has invested heavily in product development and can guarantee that the sanitary ware it supplies fully complies with regulations. All Twyford WCs pass the UK flush test (EN997 Class 2), one of the most stringent flush tests in Europe.

Building Regulations, England and Wales

The Building Regulations for England and Wales exist principally to ensure the health and safety of people in and around buildings. They also provide for access to and around buildings.

The regulations apply to most new buildings and many alterations of existing buildings, whether domestic, commercial or industrial.

The following building regulations refer to sanitary ware, further information is available at:

www.planningportal.gov.uk

- Building Regulations Part G - Sanitation, Hot water safety & Water efficiency
- Building Regulations Part H - Drainage and waste disposal
- Building Regulations Part M - Access and use of buildings

Building Regulations, Scotland

The following website is a useful source for the details of the regulations:

www.gov.scot/Topics/Built-Environment/Building/Building-standards

Building Control Northern Ireland

The following website is a useful source for the details of the regulations:

www.buildingcontrol-ni.com/regulations

Water Regulations

The Water Supply (Water Fittings) Regulations 1999 are applicable to England and Wales. In Scotland they are known as The Water Byelaws and are there to protect the public water supply from waste, misuse, undue consumption and contamination.

LABC (Local Authority Building Control)

LABC represents all local authority building control teams in England and Wales. Members work cooperatively with building owners, home owners, architects, plan drawers, developers, building contractors and other professionals to ensure buildings are safe, healthy and efficient to meet the standards set by the building regulations.

Twyford utilises the LABC registration scheme for approval and compliance of our disabled washroom facilities according to Part M of the building regulations. This ensures acceptance by all local authorities and makes the building approval process easier.

Healthcare (Health Building Notes)

Issued by the Department of Health, Health Building Notes give best practice guidance on the design and planning of new healthcare buildings and on the adaptation/extension of existing facilities.

They provide information to support the briefing and design processes for individual projects in the NHS building programme.

HBN 00-10 Part C / HTM64

This Health Building Note (HBN) outlines the policy and performance requirements for sanitary assemblies used in healthcare facilities. These requirements are a set of essential standards of quality and safety that sanitary assemblies must comply with. It supersedes Health Technical Memorandum 64 (England only).

For further information visit: www.gov.uk/dh and search for 'health building notes' and 'health technical memoranda' to open the full series.

Code for sustainable homes

Following the technical housing standards review, in March 2015 the government issued a written ministerial statement withdrawing the code for sustainable homes, aside from the management of legacy cases.

Legacy cases are:

- those where residential developments are legally contracted to apply a code policy (e.g. affordable housing funded through the National Affordable Housing Programme 2015 to 2018, or earlier programme)
- where planning permission has been granted subject to a condition stipulating discharge of a code level, and developers are not appealing the condition nor seeking to have it removed or varied

In these instances only it is possible to continue to register code cases and conduct code assessments.

The code for sustainable homes was the national standard for the sustainable design and construction of new homes. It aimed to reduce carbon emissions and promote higher standards of sustainable design above the current minimum standards set out by the building regulations

The code used a 1 to 6 star system to rate the overall sustainability performance of a new home against 9 different categories of sustainability.

BREEAM (Building Research Establishment Environmental Assessment Methodology)

First published by the Building Research Establishment (BRE) in 1990, BREEAM is the world's longest established method of assessing, rating, and certifying the sustainability of buildings.

BREEAM works to raise awareness amongst owners, occupiers, designers and operators of the benefits of taking a sustainability approach. It helps them to successfully cost and effectively adopt sustainable solutions, and provides market recognition of their achievements.

BREEAM assessment covers a range of criteria including Energy and Water.

Regarding water the aim of the assessment is to reduce the consumption of potable water for sanitary use in new buildings from all sources through the use of water efficient components and water recycling systems including WCs, Urinals, Taps & Showers.

For more information visit: www.breeam.com

Our guarantee

Lifetime Shower enclosures and bath screens, Twyford shower trays.

25 years Ceramic products (excluding accessories and fittings), steel and acrylic baths.

5 years Taps and mixers from the following ranges: X50, X52, X60, X62, X70 and X120.

2 years Accessories and fittings, all wooden products, bath panels, plastic and metal fittings including seats, taps (excluding those listed under 5 year guarantee), cistern fittings, electronic components and ceramic bathroom accessories.

This guarantee covers products manufactured or supplied by Twyford Bathrooms under the Twyford brand name and installed in the United Kingdom and the Republic of Ireland. Should a claim be made, under the guarantee, we ask that the following conditions are met:

- Proof of purchase should be supplied at the time of the claim, if there is no proof of purchase supplied then the claim will be refused.
- Product should have been fitted in accordance with our installation instructions, UK Water Regulations 1999 and general good plumbing practice.
- We need to ensure that the product has been maintained and cared for in accordance with our Cleaning and Maintenance Instructions. Note mildew, limescale effects and corrosion are not covered under the guarantee.
- We cannot accept responsibility for the failure of a product if it has been modified, misused, neglected or wilfully or accidentally damaged. This also includes the general effects of wear and tear through usage.

- We must be given reasonable opportunity to inspect the product in the installed situation, if removed the product must not be destroyed but should be retained for inspection. Photographic evidence of the product in the installed situation may be requested.
- If our on-site investigation determines the reported issue is not a manufacturing fault or a materials defect, a call out charge may be applied. This will be advised at the time of your claim.
- Our policy is one of continuous improvement. If the product has failed under the terms of the guarantee and a replacement is offered, but identical goods are no longer available, a mutual agreement will be sought.
- This guarantee applies only to the single product in question and not to the whole bathroom suite. This guarantee does not extend to cover consequential loss or damage which could not be reasonably foreseen at the time the product was purchased.

For further information contact our Customer Services Team on:

T: 01926 516 800

E: enquiries@geberit.co.uk

F: 01926 400 101

This guarantee is effective for all our products under the aforementioned parameters and is non-transferable. It is offered to customers acquiring our products as consumers, not in the course of a trade or business. This guarantee does not in any way affect the statutory or other rights of a consumer.

Please use the product reference shown below.

X120 thermostatic shower bar valve

X120 Thermostatic Shower Bar Valve **X205012CP**

8 LPM Flow regulator **XS9008XX**

shower rail

Sola shower rail, hose & head **SF1261CP**

finish

Chrome plated CP.

approvals

WRAS Approved

standards

Chrome plated to BS EN248

system requirements

Gravity fed hot & cold (equal pressures)
Gravity fed hot & mains cold
(Differential pressure, max ratio 5:1)
Unvented systems
Instantaneous water heater (Combination boiler)
Pumped system

Minimum cold water supply temp = 5°C
Maximum cold water supply temp = 25°C
Maximum Hot water supply temp = 80°C

recommended operating pressure

Minimum operating pressure 0.5 bar.
Maximum operating pressure 5 bar.

note

Temperature pre set to 38°C. With push button override to 46°C. Will fit a standard 1/2" BSP hose connector. Includes a water saving eco feature, to control flow.

Thermostatic Bar Shower Valve – X205012CP

Flow Rate (Litres per minute)	0.5 Bar	1 Bar	2 Bar	3 Bar	4 Bar	5 Bar
Without Flow Regulator Fitted	7.3	11.3	16.4	20.4	24.0	27.0
Flow Limiter Fitted (Part No:XS9008XX)	4.9	6.8	7.3	7.5	7.8	8.0

All measurements shown are in millimetres. Drawing sizes are not to scale.

Concealed valve	SF1137CP
Concealed valve inc. elbow	SF1555CP
Exposed valve bottom outlet	SF1136CP

shower rail

Sola Shower rail, hose & head - single function, smooth hose	SF1256CP
Sola Shower rail, hose & head - single function, smooth hose	SF1261CP

finish

Chrome plated CP.

approvals

HBN 00-10 C, code TM1
(concealed only)

system requirements

Suitable for use with unvented supplies, combi boilers, gravity and mains pressure systems.

recommended operating pressure

Max Inlet pressure static 10 Bar.
Max recommended dynamic pressure 5 Bar.
Min operating pressure dynamic 0.2 Bar.
Max unbalanced pressure ratio 5:1.
Inlet connections 15mm.
Outlet connections 1/2".
Max inlet temperature 85°C.
Min Temp differential to ensure failsafe between hot and cold supplies 10°C.

note

Pre-set factory temperature setting 38°C.
Suitable for use with unvented supplies, combi boilers, gravity and mains pressure systems.

Sola TMV3 Shower Valve, Concealed - SF1137CP & SF1555CP

Standard Doc.M layout

The area shown is the minimum required. It must be clear of all obstructions (eg plumbing / drainage fittings and heat emitting devices).

AR: Alarm Reset Button
TP: Toilet Paper Dispenser
PT: Paper Towel Dispenser
SD: Soap Dispenser
HD: Possible position for Automatic Hand Dryer

The drawing above shows a Left Hand installation. A Right Hand installation is the mirror image of above.

All measurements shown are in millimetres. Drawing sizes are not to scale.

This technical diagram illustrates the required dimensions and features for a wheelchair accessible toilet stall. The diagram shows a side view of the stall with a toilet, a sink, and a mirror. Key dimensions and features include:

- Alternative Door Position:** Indicated by a dashed line and arrow, showing the door can swing inward or outward.
- Sanitary Dispenser:** Located on the wall above the sink.
- Disposal Bin:** Located on the wall above the sink.
- Shelf:** Located on the wall above the sink.
- Wall A:** The wall containing the sink and mirror.
- Finger Rinse Basin:** Located on the wall above the sink.
- Vertical Grab Rails:** Located on the side wall, with a height of 60-85mm from the floor to the top rail.
- Alarm Pull Cord:** Located on the side wall, with a height of 250mm from the floor to the cord.
- Drop-down Rail:** Located on the side wall, with a height of 750mm from the floor to the rail.
- Clothes Hook:** Located on the side wall, with a height of 2200mm min from the floor to the hook.
- Alternative Position For Alarm Pull Cord:** Indicated by a dashed line and arrow, showing the cord can be positioned at a different height.
- Sanitary Disposal Unit:** Located on the floor next to the toilet.
- Zone For Shelf For Standing Users:** Indicated by a dashed line and arrow, showing the area for a shelf for standing users.
- Dimensions:**
 - Overall width: 1500mm Min
 - Overall depth: 1000mm Min
 - Toilet width: 320mm
 - Toilet height: 500mm
 - Clearance from toilet to side wall: 150mm
 - Clearance from toilet to front wall: 970mm
 - Clearance from toilet to side wall (to grab rail): 140-160mm
 - Clearance from toilet to side wall (to alarm pull cord): 60-85mm
 - Clearance from toilet to side wall (to drop-down rail): 750mm
 - Clearance from toilet to side wall (to clothes hook): 2200mm min
 - Clearance from toilet to side wall (to alternative door position): 1500mm x 1500mm Wheelchair Turning Space

Flushing Mechanism to be Positioned on Open or Transfer side of the Space, Irrespective of Handing

All measurements shown are in millimeters. Drawing sizes are not to scale.
