RECYFIX® SLOTTED

Slotted channels for design-sensitive applications

Discreet yet efficient drainage, that is easily installed into all surface finishes. Slotted components either stainless steel or galvanised with heelsafe options. Channel body made from 100% recycled polypropylene (PP). All channel components fully recyclable.

1 Requirements

For the drainage of areas with architectural demands:

- where the surface drainage has to be discreet
- where installation of all surfaces, including stone slabs, should be possible
- where surface water needs to be drained reliably

2 Application areas

For concourse areas and façades with high visual demands:

- especially in public and commercial areas

For other sizes and versions of SLOTTED Channel refer to the Customised Channel brochure. Other upstand sizes and loading category Class available on request.

3 Solutions

- only show narrowest of slots on the surface
- allows integrated uniform design
- drainage requirements are completely met
- easy access to channel run through access cover
- slot components made of galvanised steel or stainless steel

A selection of Hydraulic Performance tables for the most popular sizes of FASERFIX® and RECYFIX® channels including the RECYFIX® MONOTEC and RECYFIX® HICAP® ranges are available on request in an 8 page hard copy or PDF publication.

Hauraton channel drainage configurations are designed and sized using in-house **Hydraulic design software**. The accuracy of the software has been verified by physical testing of Hauraton systems within a hydraulic discharge test flume, replicating and evaluating hundreds of flow scenarios.

Hydraulic design software is also available free of charge to industry professionals. Intuitive and user friendly, **Hauraton Design Software** allows engineers to create drainage schemes for the company's range of civil engineering systems on tablets, desktop computers or through the internet (web-based application).

For smaller projects where a quick indication of the appropriate channel size and system is required for a given catchment area, Hauraton can provide their **Hydraulic Design App**.

For further details contact the Hauraton Technical Support Team

RECYFIX® SLOTTED

Channels for design-sensitive applications

Slotted Channels meet the requirements of DIN EN 1433 and are suitable for the following load categories:

Category A 15, Load class 15 kN

Trafficked areas, which are exclusively used by pedestrians and cyclists

Category B 125, Load class 125 kN

Sidewalks, pedestrian areas and comparable areas, car parks or car parking decks

CATEGORY C 250, Load class 250 kN

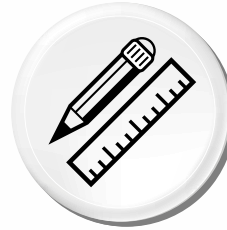

Sidewalk channel areas and parking bays or similar applications

CATEGORY D 400, Load class 400 kN

Carriageways of roads (including pedestrian streets), sidewalks and parking areas that are passable for all types of road vehicles

In case of doubts, the higher category should be used.

Individual solutions

- slotted components made of galvanised steel or stainless steel
- asymmetrical versions
- slotted components with modified neck height and crossbars in the slot, can be manufactured to bespoke order
- easy preparation of corner connections possible
- normal width of all slot openings 10mm

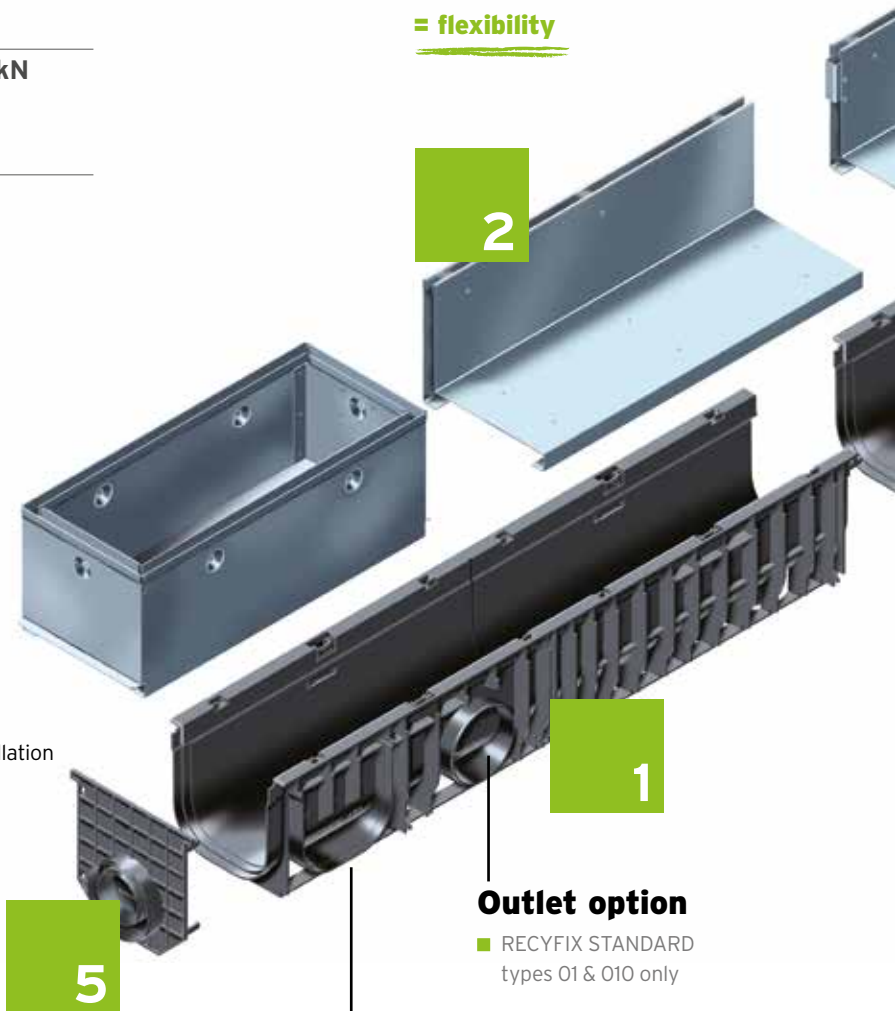

= **flexibility**

Easy installation

- easy handling and installation
- integrated tongue and groove connection of channels and slot components allows an easy installation

= **cost reduction**

Outlet option

- RECYFIX STANDARD types 01 & 010 only

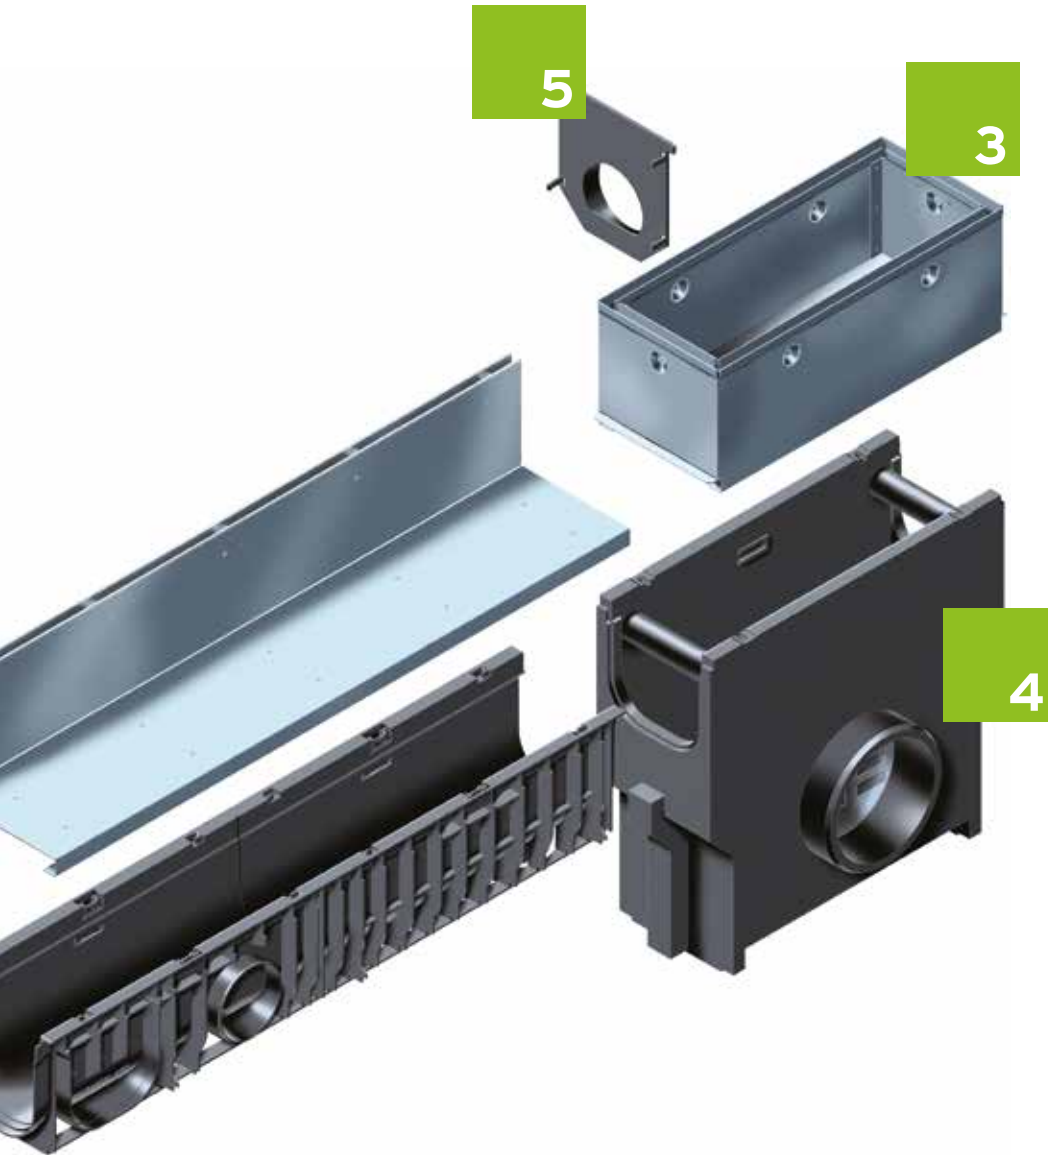

Connection option

- RECYFIX STANDARD types 01 & 010 only

Intake Capacity Values for 10mm wide slot

Grating Design	Slot Width (mm)	Intake Area (cm ² /m)	Max. Flow Rate (l/s/m)	*Area Drained/1m (m ²)
Longitudinal Slotted Cover	10.0	100	6.7	482

*Area drained in square metres (per linear metre of channel) at a rainfall intensity rate of 50mm/hour. Further information regarding Intake Capacity can be provided on request.

Technical features of the slot components

- strengthened slot edge
- reinforcements and material thickness provide perfect balance between weight and stability

= **quality / security**

Connection possibilities

- access covers fit on channels or trash boxes
- connection to outlet pipes are possible from trash box and channels (from the side or bottom)

= **flexibility**

- 1**
- RECYFIX channels made of PP in nominal sizes 100, 150 and 200 with tongue and groove connection.

- 2**
- Asymmetrical covers made of galvanised or stainless steel.

- 3**
- Access cover normally fitted on top of trash box but can also be fitted directly on channel component.

- 4**
- Trash box with pipe connection points..

- 5**
- End caps with or without outlets.

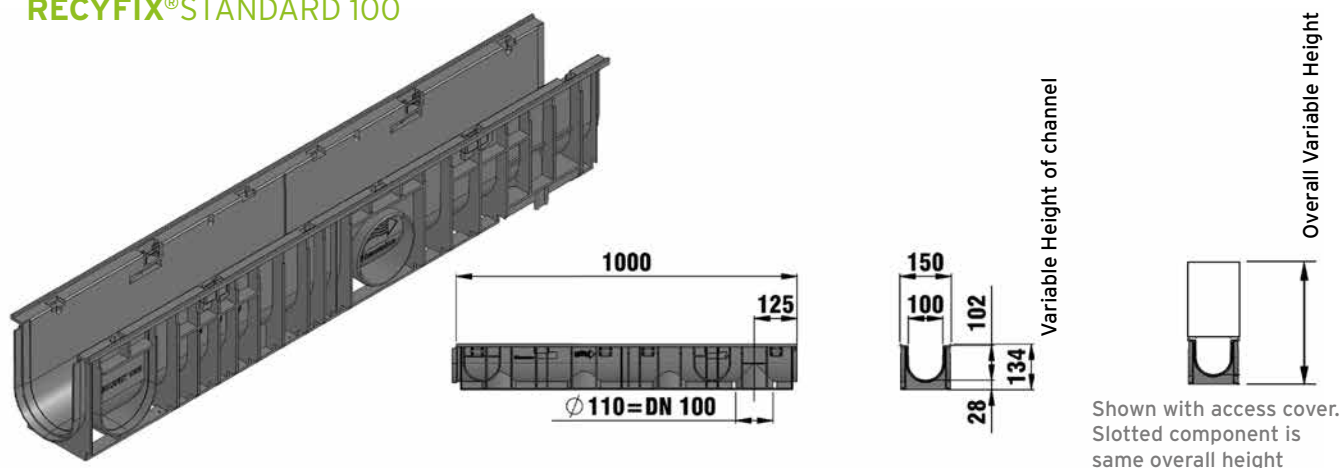

Standard asymmetrical slotted channel

NOTES

The 10mm slot openings are not the limiting factor regarding system capacity.

The size, type, configuration and design of the channel system along with its location, the number and size of the outlet pipes will generally determine the systems capacity.

For intake capacity data for all slot configurations and general technical support please email technical@hauraton.co.uk

Bigger nominal sizes and individual neck heights as tailor-made production possible for more than 30m.

Stainless steel covers also available - details on request
