

A photograph of a modern architectural building with a mix of dark, textured panels and large glass windows. The building is set against a bright, clear sky. In the foreground, there is a paved area with some outdoor furniture, including a wooden bench. The overall aesthetic is clean and contemporary.

LANDSCAPING

The drainage range for domestic use
and landscaping

Version 2.9.1

Our benefits with products from **HAURATON**:

„Corrosion-free channel systems from HAURATON provide for satisfied customers. Permanently resistant, effective installation and great design. Is there anything else you desire?“

Customer benefits

How you profit from HAURATON.

4

RECYFIX PRO

Corrosion-free drainage channels
for private and public areas.

10

RECYFIX PLUS

Drainage channels with sophisticated look
for public and commercial areas.

50

RECYFIX STANDARD

Drainage channel for domestic applications
around the house and garden.

86

Facade Drainage

Reliable water retention system for terraces,
facades and flat roofs.

116

SLOTTED CHANNELS NEW

Slotted channels for design-sensitive applications.

190

RECYFIX POINT NEW

FASERFIX POINT

Point drainage for yards, garages and patios.

228

RECYFIX GREEN

Turf honeycomb for infiltration of rainwater
in parking areas.

240

LINEFIX

Effective border edging for garden and park areas.

248

TOP X

The drainage channel for private driveways, courtyards,
patios and gardens.

„Security in design and material -
that's all I expect from a good
drainage channel.“

My benefit as an Architect with **HAURATON**:

**My benefit:
Quality assured**

Security during planning process

HAURATON offers architects as partners a maximum planning security. Products and processes are constantly monitored and are subject to stringent quality requirements.

Standards, approvals and warranties

- channels certified according to DIN EN 1433
- testing certificates from external institutes
- CE-Labels
- quality certification in accordance with DIN EN ISO 9001:2015

Planning support

- DWG drawings for all products on the internet for total planning security
- Specification assistant with detailed search function to find the optimal products for various applications

„There are plenty of activities happening on site. With the unbreakable channel, I am able to save costs and hassle.

Moreover, due to its extremely light weight, the channel is highly back-friendly.“

My benefit as Landscape Gardener with **HAURATON**:

quick installation

absolutely stable

**My benefit:
Cost savings**

Lightweight for easy, quick and cost-efficient installation.

- highest stability with minimised weight
- much lighter than conventional channels made of mineral materials. In comparison: one polymer channel weighs as much as 2.5 m RECYFIX 100
- very easy to transport and install

RECYFIX - stable and unbreakable:

- high-tech material developed by a well-known Research Institute for Recycling-Plastic
- durable resistance against frost, de-icing salt and UV radiation
- elastic and ultra-strong material
- stable already during installation, compacting of paved surfaces along the channel is possible - no breakage means that the construction schedule can be met
- withstands high traffic loads and temperature differences in daily use

„I can provide my customers a channel which is quickly and easily loaded into a car; and I profit from a higher stock turnover.“

My benefit as a Construction Material Dealer with **HAURATON**:

*My benefit:
Better gross margin*

Better gross margin through optimising stock handling and low transport costs.

- easy loading without staff and forklift
- pre-assembled, no spare parts on stock
- fewer pallet storage lots required

RECYFIX PRO

Corrosion-free drainage channels for private and public areas.

**European-quarter
in Frankfurt, Germany**

RECYFIX PRO

Corrosion-free drainage channels for private and public areas.

1 Requirements

Drainage channels for optically attractive areas have to

- be modern and unique in its design
- be extremely stable to guarantee long-term and permanent security
- be resistant to environmental influences (frost, heat and moisture)
- be dimensioned for high loading categories
- be designed in accordance with DIN EN 1433

3 Solutions

Therefore RECYFIX PRO channels are suitable for the drainage of sophisticated areas:

- channel and angle housing made of 100 % recycled composite
- secure and corrosion-free grating support
- loading capacity up to C 250
- hydraulically optimised FIBRETEC slotted grating

2 Application areas

- private and public areas
- squares and parks
- railway platforms
- driveways and parking lots
- reduced trafficked areas

100% corrosion-free, especially with frost and de-icing salt

Platform in Limburg, Germany

Car park Andritz group Vienna, Austria

EACT Academy in Oldham Manchester, UK

School in Sunderland, UK

-------	---------	----------------	--------------------------------	------------------	-------------------	---------------	--------------

YOUR BENEFITS WITH RECYFIX PRO

ANGLE HOUSING

- PP-angle housing 20 x 20 mm acc. to DIN 19580 for additional flexibility
- nibs to stop lateral movements
- inlaying gratings

= PERFORMANCE ASSURED

LOW WEIGHT ENSURES EASY HANDLING ON SITE

- much lighter than channels made of polymer/resin concrete
- easy transport and installation

= TIME & COST SAVINGS

HIGH RESISTANCE

- high resistance against frost, de-icing salt and UV-rays
- withstands high temperature differences
- for climate ranges from - 50 °C to + 80 °C and more

= QUALITY ASSURED /
LONGEVITY

HIGH-GRADE MATERIAL

- **RECYFIX** - stable and almost unbreakable
- elastic and especially robust material
- withstands high loads and temperature differences in daily use
- 100 % recycled composite body (and also 100 % recyclable) → 100 % environmentally friendly
- 0 % water absorption
- smooth inner surface for superior flow characteristics
- non-conductive
- PP channel body can be cut, drilled and worked easily on site

= QUALITY & PERFORMANCE ASSURED

PRE-ASSEMBLED READY FOR INSTALLATION

- channel and grating = one part
- no spare parts
- easy handling in stock and on construction site
- cost-efficient transport

= BETTER GROSS MARGIN

IDEAL FOR ...

applications with corrosion-free linear drainage for private and public areas, such as parks, driveways and parking lots.

100 % corrosion-free

RECYFIX PRO

Corrosion-free drainage channels for private and public areas.

**Modern office complex in Düsseldorf
is drained with RECYFIX PRO.**

RECYFIX PRO

In the centre of Düsseldorf, Germany on the area of some old barracks a new business world - named after the artist couple Clara & Robert Schumann - has arisen. Two new seven-storey buildings were built with the historical Saarhaus where parts of the old facade were preserved and framed within the new facade of the modern office complex. The modern office complex offers a rental area of 16,500 square metres. Modern locations require modern drainage concepts. Around 300 metres of the RECYFIX PRO 100 type 010 have been installed with a ductile iron longitudinal grating in KTL.

The benefit for Landscaping Architects:

- Security in design and material
 - durable and reliable drainage system
 - fulfills all norms
- Harmonious architecture:
 - the filigree ductile iron longitudinal gratings blend in with the pavement and the anthracite-coloured windows

The benefit for Landscape Gardeners:

- Cost savings and back-friendly installation
 - low weight
 - easy installation and processing (cutting of fitting pieces and mitres)
 - easy transport to the construction site

Clara & Robert office complex, Düsseldorf, Germany

RECYFIX PRO

Corrosion-free drainage channels for private and public areas.

RECYFIX PRO channels meet the requirements of DIN EN 1433 and are suitable for the following load categories:

Category A 15, Load class 15 kN

Category B 125, Load class 125 kN

Category C 250, Load class 250 kN

Category D 400, Load class 400 kN

If in doubt, the higher category should be used.

The new style of drainage!

Artistically combined, uniquely attractive: coloured FIBRETEC gratings.

FIBRETEC®
Fern, Sand, Stone, Black

FIBRETEC

The art of drainage has many styles. With the coloured FIBRETEC gratings, HAURATON creates a completely new scope of design.

The unique channel gratings in the colours Fern, Sand and Stone can be combined with different materials. Thus, new compositions of colours and textures can always be created. As desired, the coloured FIBRETEC gratings can accentuate the colour composition of the surroundings or harmonise as a complete work of art.

Inspiration for the new gratings was the proven black FIBRETEC which has received various awards since its introduction in 2010. One of which is the International Design Award Baden-Württemberg Focus Open.

The production of the coloured FIBRETEC gratings in the colours Fern, Sand and Stone is done with coloured granulate. The result is uniformly coloured gratings which are particularly weather and UV-resistant. This was tested and approved in the laboratory according to DIN EN ISO 4892-2 as required by DIN 19580: The gratings were exposed to artificial weathering for a total of 1,600 hours in the form of xenon arc radiation and irrigation.

The subsequent mechanical tests were very successful - optical changes were hardly measurable. However, slight long-term colour changes in the material cannot be ruled out.

METROPOLIS

Inspired from history - Made for the future

**1927**

The movie 'Metropolis', by Fritz Lang, has influenced various genres since its creation in 1927. With the expressionist representation of a futuristic metropolis, the film producer developed a leitmotif that still inspires artists and designers today.

2015

The idea for the channel grating Metropolis comes from HAURATON France Sales Representative Jean-Christophe Turgné. His aim was, with a functional component such as the drainage channel, to set standards with respect to aesthetics and to impart specific construction projects with futuristic, decorative details.

2016

Designing, planning and building with METROPOLIS - the new design element provides plenty of room for new concepts. Planners and architects can round out trendsetting architecture or lend grown urban structures a decorative element flowing with the most lively ornamentation.

RECYFIX PLUS

Drainage channels with a sophisticated look for public and commercial areas.

A photograph of the Conference-Centre ICE Cracow, Poland, taken at dusk or night. The building features a large, curved glass facade with many lit windows, giving it a warm glow. A prominent feature is a tall, illuminated cylindrical tower on the left side. The foreground shows a paved walkway with black metal railings and some low walls. The sky is a soft blue/purple.

Conference-Centre ICE
Cracow, Poland

RECYFIX PLUS

Drainage channels with a sophisticated look for public and commercial areas.

1 Requirements

Drainage channels in commercial and public areas have to

- permanently withstand the daily stress of cars, trucks and pedestrians
- be optically attractive
- withstand weather influences (frost, heat, humidity)
- be in accordance with DIN EN 1433

3 Solutions

Therefore RECYFIX PLUS channels are suitable for the drainage of public and commercial areas:

- stable channels made of 100% recycled PE
- torsion-resistant ribs and steel frames for high stability
- corrosion-protected frames made of galvanised or stainless steel
- optical appreciation through visible steel frame

2 Application areas

- public and commercial areas
- trafficked areas with higher loadings

Congress-Centre in Cracow, Poland

ALLEE Shopping Centre in Budapest, Hungary

Scoresby Bunnings Markt in Australia

Mazda Car Dealer in Hobart, Tasmania, Australia

Shopping Centre MOLO in Stettin, Poland

-------	---------	----------------	--------------------------------	------------------	-------------------	---------------	--------------

YOUR BENEFITS WITH RECYFIX PLUS

FRAME SYSTEM

- integrated galvanised or stainless steel frames
- protection against longitudinal and lateral movements of gratings

= PERFORMANCE ASSURED

PRE-ASSEMBLED READY FOR INSTALLATION

- channel and grating = one part
- no spare parts
- easy handling in stock and on construction site
- cost-efficient transport

= BETTER GROSS MARGIN

HIGH RESISTANCE

- high resistance against frost, de-icing salt and UV rays
- withstands high temperature differences
- for climate ranges from - 50 °C to + 80 °C and more

= QUALITY ASSURED / LONGEVITY

LOW WEIGHT ENSURES EASY HANDLING ON SITE

- much lighter than channels made of polymer/resin concrete
- easy transport and installation

= COST SAVINGS

HIGH-GRADE MATERIAL

- **RECYFIX** - stable and almost unbreakable
- elastic and especially robust material
- withstands high loads and temperature differences in daily use
- 100 % recycled composite body (and also 100 % recyclable)
→ 100% environmentally friendly
- 0 % water absorption
- smooth inner surface for superior flow characteristics
- PP channel body can be cut, drilled and worked easily on site

= QUALITY & PERFORMANCE ASSURED

HIGH STABILITY

- proven structural design for superior resistance to dynamic forces and load class C 250
- various ductile iron gratings in loading classes from class A 15 to C 250 according to DIN EN 1433
- stable and durable drainage channel with protective edge

= PERFORMANCE ASSURED

IDEAL FOR ...

applications with higher traffic up to class C 250, such as car parks, industrial estates and sewage plants.

RECYFIX PLUS

RECYFIX PLUS channels provide for state-of-the-art drainage at the Vodafone campus in Düsseldorf

Durable and free of corrosion:

Facade and terrace drainage using RECYFIX PLUS.

The Vodafone campus - a state-of-the-art office complex with workplaces for more than 5000 employees. More than 300 million euros have been invested in bringing different sites together at the new head office. The building was designed and implemented in accordance with the criteria of the seal of quality for sustainable construction LEED Gold (Leadership in Energy and Environmental Design).

Reasons for using nearly 700 metres of RECYFIX PLUS:

- Low construction costs
 - Ease of installation and processing polygonal laying rather than radial tailor-made channel
- Ecological material
 - Recycled PP
 - Extremely detailed specifications with regard to material origin, material composition and manufacturing procedure
- Elegant appearance
 - Continuous metal edge on surface
 - Mesh gratings with no interfering little plates containing manufacturer details and load specifications

Vodafone-Campus in Düsseldorf, Germany

RECYFIX PLUS

Drainage channels with a sophisticated look for public and commercial areas.

RECYFIX PLUS channels meet the requirements of DIN EN 1433 and are suitable for the following load categories:

Category A 15, Load class 15 kN

Trafficked areas, which are exclusively used by pedestrians and cyclists

Category B 125, Load class 125 kN

Sidewalks, pedestrian areas and comparable areas, car parks or car parking decks

Category C 250, Load class 250 kN

Sidewalk channel areas and untraveled side panels or similar

If in doubt, the higher category should be used.

Different grating options, i.e. GUGI-Ductile iron mesh gratings

End caps with or without outlet

Channels made of PP with integrated steel frame, according to DIN EN 1433, with sleeve and feather connection for exact installation, combined article with various grating possibilities

RECYFIX STANDARD

Drainage channel for domestic applications around the house and garden.

**Private estate,
Germany**

RECYFIX STANDARD

Drainage channel for domestic applications around the house and garden.

1 Requirements

Drainage channels in private areas have to

- permanently withstand the daily stress of cars and pedestrians
- be easy to transport and install
- withstand weather influences (frost, heat, humidity)
- be optically attractive
- be in accordance with DIN EN 1433

3 Solutions

Therefore RECYFIX STANDARD channels are suitable for the drainage of private areas

- high stability and functionality
- low weight
- preformed vertical and horizontal outlets
- nominal sizes from 100 to 300 mm with different heights
- stable gratings in loading classes A 15 up to C 250 according to DIN EN 1433

2 Application areas

- predominantly private areas
- driveways
- courtyards
- terraces
- gardens
- parks

Public area, Romania

Water fun park

Veszprem Arena in Hungary

Spa Fürthermare in Fürth, Germany

Private house

Street in Hungary

-------	---------	----------------	--------------------------------	------------------	-------------------	---------------	--------------

YOUR BENEFITS WITH RECYFIX STANDARD

FRAME SYSTEM

- PP frame to stop lateral movements
- enables flush connection with gratings which prevents injuries

= **QUALITY & PERFORMANCE ASSURED**

HIGH-GRADE MATERIAL

- **RECYFIX** - stable and almost unbreakable
- elastic and especially robust material
- withstands high loads and temperature differences in daily use
- 100 % recycled composite body (and also 100 % recyclable)
→ 100 % environmentally friendly
- 0 % water absorption
- smooth inner surface for superior flow characteristics
- PP channel body can be cut, drilled and worked easily on site

= **QUALITY & PERFORMANCE ASSURED**

LOW WEIGHT ENSURES EASY HANDLING ON SITE

- much lighter than channels made of polymer/resin concrete
- easy transport and installation

= **TIME & COST SAVINGS**

NUMEROUS GRATING OPTIONS

- made of ductile iron, galvanised or stainless steel
- narrow slot width for pedestrian areas available
- stable gratings in loading classes A 15 up to C 250 according to DIN EN 1433

= **DESIGN FLEXIBILITY**

PRE-ASSEMBLED READY FOR INSTALLATION

- channel and grating = one part
- no spare parts
- easy handling in stock and on construction site
- cost-efficient transport

= **BETTER GROSS MARGIN**

HIGH RESISTANCE

- high resistance against frost, de-icing salt and UV-rays
- withstands high temperature differences
- for climate ranges from - 50 °C to + 80 °C and more

= **QUALITY ASSURED / LONGEVITY**

IDEAL FOR ...

domestic applications around the house and garden, such as predominantly private areas, driveways, courtyards, gardens and parks.

**The Original**

RECYFIX STANDARD

Drainage channel for domestic applications around the house and garden.

RECYFIX STANDARD channels meet the requirements of DIN EN 1433 and are suitable for the following load categories:

Category A 15, Load class 15 kN

Trafficked areas, which are exclusively used by pedestrians and cyclists

Category B 125, Load class 125 kN

Sidewalks, pedestrian areas and comparable areas, car parks or car parking decks

Category C 250, Load class 250 kN

Sidewalk channel areas and untraveled side panels or similar

If in doubt, the higher category should be used.

Numerous grating options, for example GUGI-Ductile iron mesh gratings

End caps without outlet

Channels made of PP, according to DIN V 19580 / EN 1433, CE-conform, with tongue and groove connection for exact installation

The construction widths and heights of the **RECYFIX STANDARD**:

Your way to the tender text on hauraton.com

1 Go to the product page.

- Choose your item.

The screenshot shows the hauraton website interface. At the top, there's a navigation bar with links for CIVILS, LANDSCAPING, AQUA, and SPORT. Below the navigation is a search bar and a 'My documents' link. The main content area features a product card for 'RECYFIX® PRO 100'. The card includes a 'Combi article' section with a table showing dimensions (Length: 1000 mm, Width: 160 mm, Height: 150 mm), internal channel cross-section (92 cm²), weight (4,80 kg), and item number (47021). Below this is a 'Product image' section with a thumbnail of the product and a 'Tender text' link. Further down are sections for 'Installation instructions' and 'Product data sheet', each with several document formats listed (HTML, PDF, Text, XML, RTF, GAEB 81:90, GAEB 83, GAEB 81:2000, ÖNORM 2052, ÖNORM 2063). At the bottom of the card, there are two more product variants: 'Type 0105 with slotted grating SW 80/10 mm, locked' and 'Type 0110 with slotted grating SW 80/10 mm, locked'. A large green oval on the right side of the image highlights the 'Tender text' link in the product details section.

2 Choose required format and add it to your documents

Facade Drainage

Reliable water retention system for terraces, facades and flat roofs.

Facade Drainage

Reliable water retention system for terraces, facades and flat roofs.

1 Requirements

- fast and reliable removal of surface water on facades, flat roofs and terraces
- compliance with the guidelines and the flat roof relevant DIN standards
- backwater reserve for sudden accumulation of rainwater rainwater

3 Solutions

- powerful backwater reserve for abruptly accumulated water quantities
- horizontal and vertical drainage
- effective protection of walls, doors and windows elements
- open channel systems: channel bodies have drainage possibility on all sides
- barrier-free transitions on terraces
- easy assembling kit

2 Application areas

- flat roof green areas
- passable roof areas and terraces
- facade channels
- in front of entrances of balconies and terraces

system

Option for 100 % corrosion-free

DACHFIX RESIST

Reliable water retention system for terraces, facades and flat roofs.

Modern residential development featuring corrosion-free and durable DACHFIX drainage system

Durable and corrosion-free:

Facade and terrace drainage with DACHFIX RESIST. In Sindelfingen in Swabia, a new state-of-the-art project is being developed in a central location. The idea is that the development, with its 40 residential units ranging from exclusive penthouses to owner-occupied apartments, terraced and semi-detached houses through to sheltered housing for the elderly, will provide housing for a mix of age-groups living together. In line with the high-quality interior specification and the attractive architectural design, all materials - including those for the facade and terrace drainage - are reliable and durable.

DACHFIX RESIST features:

- channels and gratings made of high-quality PP - 100% corrosion-free
- long service life even under permanently wet conditions on roof terraces
- PP longitudinal grating in an attractive and elegant silver-grey design
- very suitable for contact with bare feet at terrace doors
- highly reduced installation costs due to easy installation and low weight

Housing estate in Sindelfingen, Germany

DACHFIX RESIST

Reliable water retention system for terraces, facades and flat roofs.

DACHFIX channels comply with the flat roof guidelines and are suitable for pedestrian traffic and wheelchair access.

DACHFIX Channels allow a barrier-free access on roof terraces. A height difference of 15 cm between doors or windows elements and sealing level, as prescribed in the flat roof guideline, is not required.

DACHFIX STEEL Channels

For standard facade drainage.

Facade drainage

The HAURATON DACHFIX channel range covers all installation situations with the best solutions. Moisture should never be allowed into a building through external areas such as doors and facades. HAURATON products ensure the protection. The channels meet all relevant regulations for facade drainage and provide the following benefits:

- large volumes of rainwater drained quickly and safely
- backflow reserve for sudden heavy rainfall
- avoidance of puddles forming around facade
- indoor areas safeguarded from heavy rainfall

Channels should not be lifted by strong winds and must prevent surface ponding. In many regions also snow, ice and slush require handling efficiently. Heat permeating through doorways can quickly melt snow and ice, creating high volumes of surface water. This may be contained by remaining snow and ice. The DACHFIX range of facade drainage meets all these challenges and more, providing continuous and efficient surface drainage. Correct channel sizing to accommodate for anticipated surface water volumes is provided through comprehensive technical support available from HAURATON.

High architectural standards are maintained through a wide variety of grating designs and combinations: in both galvanised and stainless steel.

Well-known practical requirements

Height differences from 15 to 0 cm are familiar in the area of building drainage. Without a drainage system a level difference of 15 cm is required. This can be reduced to 5 cm with the use of DACHFIX STEEL. For safety reasons, many buildings are planned with a 5-cm level difference between indoor areas and water-bearing levels. However, this means that these buildings are not barrier-free accessible.

Practical requirements for barrier-free entrances

In practice, a 2 cm-high threshold is often accepted as barrier-free. However, in many public buildings a totally level surface (zero level) is used for handicapped-accessible and barrier-free access. To achieve this, entrances, exits and adjacent surfaces must be precisely constructed with no height differences. DACHFIX STEEL channels can meet both installation scenarios.

Accessibility

Barrier-free entrance: Through precise height adjustment to the floor, DACHFIX STEEL can be fully adapted to suit any environment. HAURATON meets the regulations, high standards and expectations of architects and planners regarding design of barrier-free buildings.

Standard entrance

Particularly essential for people with disabilities

DACHFIX STEEL Channels

The right channel for every installation situation.

Typical on-site installation examples

The DACHFIX STEEL channel range covers all standard installation situations and provides the best solution for every purpose.

Important for all installation situations: special attention to height level

If the channels are not connected to the wastewater pipe (installation situations A + B), a level difference of 5 cm between indoor areas and water-bearing levels should be observed. These buildings are not barrier-free accessible. In order to make entrances with a 2-cm difference in level or barrier-free (0 cm), a direct connection to the wastewater drainage system ensures reliable drainage (see installation situations C - E).

Installation situation A - Drainage via cross-intersection channel and DACHFIX POINT

- Minimal overall construction, eg. roof terraces (no permeability).
- Drainage of water over a damp-proof-membrane through DACHFIX POINT.
- DACHFIX STEEL channel is connected to DACHFIX POINT via the cross-intersection channel. This ensures continuous drainage even when the roof structure is obstructed by fine particles and infiltration is reduced.

Installation situation B - Drainage without pipe connection to channel, 5 cm threshold

- Solution for reveal area with exit threshold.
- Channels are perforated without pipe connection.
- The water percolates underground.
- Channels installed with permeable concrete.

DACHFIX STEEL Channels

The right channel for every installation situation.

Installation situation C - Drainage via channel with vertical pipe connection, level entrance (0 cm)

- Solution for reveal area without substructure.
- Channels are perforated. Some of the water is percolated underground.
- Channels installed with permeable concrete.
- Direct connection of channel to wastewater drainage system.

Installation situations D + E - Drainage via drain box, horizontal & vertical connection

- Solutions for a connection at the substructure reveal area with minimal overall construction.
- Channels are perforated. Some of the water percolates underground.
- Channels installed with permeable concrete.
- Direct connection of DACHFIX drain box to wastewater drainage system.

DACHFIX STEEL Channels

The right channel for every installation situation.

Always the right channel for every installation application

DACHFIX STEEL channels were specifically developed for all practical installation applications. A wide range, with 5 widths each in 4 heights, covers project requirements and provides reliable drainage and effective splash-water protection in every case.

- 5 widths (115, 135, 155, 205, 255 mm) each in 4 heights (45, 75, 100, 150 mm)
- the right channel for every application
- large channel widths to capture splash water
- solution for reveal area without substructure
- perforations in channel base for percolation of subsurface water
- channels installed with permeable concrete
- wastewater pipe connection direct to channel
- channels are perforated and connected to DACHFIX drain box via vertical connection

The scope of design is created by the wide range of different grating options.

Whether a slotted, mesh, perforated or longitudinal grating - the product range always provides the right solution.

Unique: The DACHFIX drain box

Reveals are provided with thermal insulation and therefore require drainage channels with shallow inverts. In this case there is no possibility for a positive pipe connection (vertical or horizontal).

The DACHFIX drain box sits on top of the protruding insulation board to provide positive connection to the channel and carry water to a discharge point beyond the structure; with the option for vertical or horizontal pipe connection at least 15 cm lower than the channel invert.

- allows a vertical or horizontal connection with substructure areas (reveal, thermal insulation)
- can be installed with 25 x 25 cm standard tiles without being cut
- 2 drain box designs are compatible with all DACHFIX STEEL channels
- matching gratings provide uniform appearance with DACHFIX STEEL channels

DACHFIX STEEL Channels

Application areas for DACHFIX STEEL Channels.

Security in planning and implementation

DACHFIX STEEL channels are especially developed for reliable and safe drainage of facades and flat roofs. The channels permanently protect buildings from standing or pressurised water while enabling entrances and passages to be made accessible.

- wide variety of channels with different widths and heights
- cover all standard installation situations
- implementation in accordance with standards and guidelines
- wide range of gratings for design flexibility
- hydraulic calculation provided by HAURATON Project Management Team

Application areas

- facades
- roof terraces
- flat roofs

SLOTTED CHANNELS NEW

SLOTTED CHANNELS for design-sensitive applications.

Killesberghöhe in Stuttgart, Germany

SLOTTED CHANNELS

SLOTTED CHANNELS for design-sensitive applications.

1 Requirements

- For the drainage of areas with architectural demands
- the surface drainage has to be discreetly hidden
 - processing of all standard surface layers and stone slabs should be possible
 - the surface water needs to be drained reliably

2 Application areas

- for areas and facades with high optical demands
- especially in public and commercial areas

3 Solutions

Therefore SLOTTED CHANNELS are suitable for the drainage of areas with architectural demands:

- only with the visible slot (narrow line) on the surface the clear elegance and significance is reached
- for all common surface layers and even asphalt
- allows to design a project in an uniform design
- functional requirements are completely met
- easy access to channel run through access cover
- slotted gratings made of galvanised or stainless steel

-------	---------	----------------	--------------------------------	------------------	-------------------	---------------	--------------

YOUR BENEFITS WITH SLOTTED CHANNELS

DIVERSE AND VARIABLE SOLUTIONS

- channels and covers can be combined in various ways
- slot covers made of galvanised or stainless steel (several stainless steel qualities)
- individual slot covers with numerous neck heights for different load classes
- a duo slotted cover with 2 x 6 mm slot width for class C 250
- many channel systems, also with built-in fall, can be used
- the channel bodies of the **FASERFIX KS** and **RECYFIX PRO** systems offer → optimised water inlet into the channel body
- locking option if required

= DESIGN FLEXIBILITY

HIGH COVER STABILITY

- constructive reinforcements under the cover and the thickness of the material ensure a high quality → perfect balance between weight and stability
- class E 600: material thickness 4 mm
- extremely dimensionally stable → slot on the surface resistant to mechanical influences
- surface water is reliably drained
- the use of pure materials guarantees corrosion protection and the recyclability of the individual components

= LONGEVITY / PERFORMANCE ASSURED

HIGH-LEVEL FUNCTIONALITY AND EASY INSTALLATION

- easy handling and installation
- removable access covers → quick access to the channel run for maintenance and cleaning
- integrated tongue and groove connection of the channels **and** covers - simple installation without complicated alignment
- permanently straight slot without waviness or misalignment

= TIME & COST SAVINGS

UNIQUE CONNECTION TECHNOLOGY

- interlocking connection at the joints of the cover (push connector)
 - ideal connection for aligned installation
 - prevents bedding material from trickling into the channel
- high stability through additional strengthening of the neck in the joint area
- compensation of installation tolerances and material expansion with push connector
- removable, e.g. to be able to attach end caps

= PERFORMANCE ASSURED / TIME & COST SAVINGS

SEPARATE END CAP FOR SLOTTED COVER

- prevents bedding material from trickling into the channel
- freely positionable if required

= PERFORMANCE ASSURED

ATTRACTIVE DRAINAGE SOLUTION

- sophisticated drainage line blends harmoniously into the architecture of the site - slot widths 10 - 18 mm for classes A 15, C 250, D 400 and E 600

= UNIQUENESS

CONNECTION POSSIBILITIES

- simple production of corner connections
- access covers, can be positioned as required, fit on channels and trash boxes
- access covers with pavable cover - all common surfaces and stone slabs possible

= DESIGN FLEXIBILITY

IDEAL FOR ...

design-sensitive applications, such as areas and facades with high optical demands especially in public and commercial areas.

NEW

Integrated tongue and groove connection of the channels and covers - easy and fast installation. Channel sealable according to DIN EN 1433

SLOTTED CHANNELS

SLOTTED CHANNELS for design-sensitive applications.

**World champion surface drainage
for German football.**

FASERFIX SLOTTED CHANNELS

DFB Football Museum in Dortmund with a modern drainage system. The impressive architecture shows that the theme of football is given a central place with this museum in the urban backdrop of Dortmund. The overall architectural concept of the architects of HPP Henrich-Petschnigg & Partner placed high demands on the individual components in advance, also for the drainage technology installed. For this area, slotted channels were planned from the very beginning. Running underground, they integrate themselves into the overall visual impression.

The efficiency of this channel:

- FASERFIX STANDARD 150 Channels:
stable and secure
- Slotted Cover:
 - Class D 400: ideally suited for high traffic loads
 - Material: galvanised steel
 - Optics blend harmoniously into the appearance of the area
- Trash boxes with visually unobtrusive inspection chambers for access to the channel run

SLOTTED CHANNELS

SLOTTED CHANNELS for design-sensitive applications.

SLOTTED CHANNELS meet the requirements of DIN EN 1433 and are suitable for the following load categories:

Category A 15, Load class 15 kN

Trafficked areas, which are exclusively used by pedestrians and cyclists

Category B 125, Load class 125 kN

Sidewalks, pedestrian areas and comparable areas, car parks or car parking decks

Category C 250, Load class 250 kN

Sidewalk channel areas and untraveled side panels or similar

Category D 400, Load class 400 kN

Carriageways of roads (including pedestrian streets), sideways of roads and parking areas that are passable for all types of road vehicles.

Class E 600, Load class 600 kN

Surfaces exposed to heavy wheel loads, e. g. ports and docks

If in doubt, the higher category should be used.

Asymmetrical covers made of galvanised or stainless steel. With integrated push connector for precise slot guidance on the surface.

End caps with or without outlets

Channels made of PP or fibre-reinforced concrete in nominal sizes 100 and 150, with tongue and groove connection for exact installation

Easy opening of access cover by means of extraction bail

YOUR BENEFITS WITH SLOTTED CHANNELS FLAT

PRODUCT RANGE

- monolithic slotted channel with flat channel body
- ideally suited for low installation heights
- two different neck heights for standard slab/paving thicknesses

= FLEXIBILITY / COST SAVINGS

CLOSED OR PERFORATED CHANNEL BODY

- variable versions according to requirements
- as closed or perforated version for surface water drainage or for onsite infiltration

= DESIGN FLEXIBILITY

CORNER ELEMENT

- 90 ° inner and outer corner available
- can be used at any point on the channel run, even when shortening the channel elements

= DESIGN FLEXIBILITY / COST SAVINGS

CONNECTOR

- guaranteed flush-mounted installation
- secures the channel against displacement
- can be used at any point on the channel run, also when shortening the channel elements

= PERFORMANCE ASSURED / DESIGN FLEXIBILITY

END CAP

- unique end cap
- no penetration of foundation material
- permanently fixed via clip function

= COST SAVINGS

INSPECTION BOX

- serves for cleaning and maintenance of the channel run
- enables vertical connection to the drainage pipe
- removable cover can be filled with the surrounding surface coating
- homogeneous appearance
- can be placed variably in the channel run, also on shortened channel elements
- slot continues to run seamlessly

= QUALITY & PERFORMANCE ASSURED

SLUDGE TRAP INLAY FOR CHANNEL SLOT

- keeps away coarse dirt
- reduces the slot width for pedestrian areas
- can be retrofitted if required
- clippable

= QUALITY & PERFORMANCE ASSURED

MATERIAL

- galvanised or stainless steel
- can be selected according to requirements

= DESIGN FLEXIBILITY / LONGEVITY

IDEAL FOR ...

spaces and surfaces with high aesthetic demands, in particular flat installation situations.

1

Slotted channels with two different neck heights for all standard slab/paving thicknesses

**2**

Channels in closed or perforated designs

3

Flat channel body with two different neck heights

SLOTTED CHANNEL FLAT 100

RECYFIX POINT NEW FASERFIX POINT STANDARD

Point drainage for yards, garages and patios.

RECYFIX POINT **NEW** FASERFIX POINT STANDARD

Point drainage for yards, garages and patios.

1 Requirements

- discharge of heavy rain or large melting water quantities at one point
- the system has to permanently withstand all expected traffic loads
- the point drainage gullies can be integrated harmoniously in the surface

3 Solutions

- high stability due to materials used: polypropylene or fibre-reinforced concrete
- low weight (RECYFIX POINT) for easy transport and installation
- connection possibilities to every kind of sewage pipe
- high quality ductile iron gratings in star design and galvanised mesh gratings
- mud bucket as well as baffle as foul air trap included

2 Application areas

- courts
- garage forecourts
- places and parking areas
- ways

YOUR BENEFITS WITH RECYFIX POINT

HIGHLY ADAPTABLE

- side connection options DN/OD 110 and DN/OD 160
- vertical connection options DN/OD 160 and DN/OD 200
- extension frame for height adjustment
- central connection to sewage system = minimal installation effort

= DESIGN FLEXIBILITY / PERFORMANCE ASSURED

HIGH RESISTANCE

- high UV resistance
- withstands high temperature differences
- suitable for temperatures from - 50 °C to + 80 °C and higher

= QUALITY ASSURED / LONGEVITY

HIGH-GRADE MATERIAL

- **RECYFIX** - particularly robust and impact-resistant material
- **RECYFIX** = 100 % recycled and recyclable

= QUALITY ASSURED / PERFORMANCE ASSURED

PRE-ASSEMBLED READY FOR INSTALLATION

- complete point inlet = one component
- easy handling in storage and on construction site

= COST SAVINGS

EASY HANDLING ON SITE

- considerably lighter than point drainage made of mineral material
- easy transport and installation
- can be easily processed on site

= TIME SAVINGS / COST SAVINGS

EASY CLEANING AND MAINTENANCE

- removable sludge trap bucket enables optimum debris retention and unobstructed drainage
- integrated foul air trap

= PERFORMANCE ASSURED / COST SAVINGS

IDEAL FOR ...

point drainage of paved areas such as courtyards, walkways and squares.

NEW

RECYFIX material
= 100 % recycled composite

YOUR BENEFITS WITH **FASERFIX** POINT STANDARD

HIGH-GRADE MATERIAL

- „Made in Germany“
- optimal stability through fibre-reinforced concrete (polypropylene fibres) with low weight
- adheres well to the foundation concrete (same coefficient of thermal expansion)
- installation without grating possible
- fire resistance class A1 (non-combustible) according to DIN 4102

= **QUALITY ASSURED /
PERFORMANCE ASSURED**

IDEAL FOR ...

point drainage made of fibre-reinforced concrete for applications such as yards, driveways and squares.

RECYFIX GREEN

Turf honeycomb for infiltration of rainwater in parking areas.

RECYFIX GREEN

Turf honeycomb for infiltration of rainwater in parking areas.

1 Requirements

- preserve natural seepage areas during the progressive sealing of land or create new ones
- high drainage capacity and stability at the same time - depending on the exposure to traffic
- passable even for large vehicles loads, such as HGVs, coaches or agricultural vehicles
- possible application of mineral-based fill materials, such as chipping

3 Solutions

- 100% recycled material with very high flexibility
- stable and breakproof
- extremely lightweight and hence easy to transport and lay
- integrated anchors and mutual latching keep the blocks together
- can be additionally fastened with anchoring pegs
- weather-resistant and durable

2 Application areas

- occasionally frequented parking areas
- exhibition areas
- parking lots for passenger cars
- pedestrian pathways
- holiday resorts
- reinforcements for embankments and river banks

RECYFIX GREEN SUPER

- camping places
- trailer home parks
- driveways on golf courses
- access ways for fire fighting vehicles and rescue vehicles

RECYFIX GREEN STANDARD

- terraces
- urban green spaces around trees
- lawns and pathways in sports grounds

4 Versions

RECYFIX GREEN SUPER

- massive construction for higher dynamic load
- different materials (gravel, chippings, stone, earth, turf) can be used for filling

RECYFIX GREEN STANDARD

- for parking areas with low dynamic loads
- turf planted areas
- protection against erosion, stable turf

Application examples **RECYFIX® GREEN SUPER**

Millpark Residential area in Dublin, Ireland

Application examples **RECYFIX® GREEN STANDARD**

Terra Botanica in Angers, France

Company parking area Rabomatik in Györ, Hungary

YOUR BENEFITS WITH **RECYFIX GREEN**

DIVERSE APPLICATIONS WITH NATURAL INFILTRATION

• **RECYFIX GREEN SUPER:**

- massive construction for higher dynamic load
- tested surface load in installation: max. 4.000 kN/m²
- Parking areas with low frequency of use for cars, trucks or buses
- loads such as: camping sites, parking spaces for motorhomes, pathways on golf courses and fire & rescue access roads

• **RECYFIX GREEN STANDARD:**

- for loads with low dynamic forces
- tested surface load in installation: max. 2,000 kN/m²
- Parking areas with low frequency of use for cars
- loads such as: terraces, green spaces in the city area around trees, lawns and paths on sports grounds

= DESIGN FLEXIBILITY / STABILITY

ADDITIONAL SECURITY WITH RECYFIX ANCHORING PEG

• **RECYFIX anchoring peg** =

- for additional anchoring on sloping ground
- material: 100 % pure **RECYFIX** recycled composite
- highly impact-resistant

= PERFORMANCE ASSURED

HIGH-GRADE MATERIAL

• **RECYFIX GREEN SUPER:**

- material: 100 % industrial recycled PE
- highly impact-resistant
- UV-stabilised

• **RECYFIX GREEN STANDARD:**

- material: 100 % pure recycled HD-PE
- highly impact-resistant
- UV-stabilised

= QUALITY ASSURED / PERFORMANCE ASSURED

IDEAL FOR ...

natural infiltration of rainwater on paved traffic areas such as parking places with occasional traffic, exhibition areas, parking spaces for cars, pedestrian walkways, holiday resorts and reinforcements for embankments and river banks.

RECYFIX GREEN SUPER

Technical data

■ RECYFIX GREEN SUPER

Material: 100 % industrial recycled PE,
highly impact-resistant, UV-stabilised,

Colour: black

The recycling process may result in variations in colour.

Openings for root penetration: > 50 %

Load-bearing capacity:

tested distributed load when installed: max. 4,000 kN/m²

Dimensions: L 600 x W 400 x H 75 mm

Coverage: approx. 4 blocks per m², including joints

Weight: approx. 2.5 kg/block Item No.: 40060

■ RECYFIX Anchoring Pegs

for additional anchoring on sloping ground

Material: 100 % pure recycled ABS-plastic,
highly impact-resistant

Colour: black

Length: 250 mm

Weight: approx. 20 g/peg

Item No.: 40020

RECYFIX GREEN STANDARD

Technical data

RECYFIX GREEN STANDARD

Material: 100 % pure recycled HD-PE,
highly impact-resistant, UV-stabilised

Colour: green

The recycling process may result in variations in colour.

Openings for root penetration: over 50 %

Size 1 dimensions: approx. 387 mm x 334 mm x 38 mm

Coverage: approx. 5.9 mats per m²

installation with fixed expansion joint (to compensate
for longitudinal expansion)

Weight: approx. 610 g/piece Item No.: 40000

Size 2 dimensions: approx. 387 mm x 555 mm x 38 mm

coverage: approx. 3.8 mats per m²

installation with fixed expansion joint (to compensate
for longitudinal expansion)

Weight: approx. 1000 g/piece Item No.: 40005

RECYFIX Marking Dots

to provide a visual demarcation between parking lots etc.

Material: 100 % HD-PE,

highly impact-resistant,UV-stabilised

Colour: white

Height: 38 mm

Weight: approx. 20 g/piece

Item No.: 40015

RECYFIX Anchoring Pegs

for additional anchoring on sloping ground

Material: 100 % unmixed recycled ABS-plastic,

highly impact-resistant

Colour: black

Length: 250 mm

Weight: approx. 20 g/piece

Item No.: 40020

LINEFIX

LINEFIX

Effective border edging for garden and park areas.

LINEFIX

Effective border edging for garden and park areas.

1 Requirements

- effective and visually unobtrusive edging for pathways, flowerbeds and lawn areas
- adapt to the shapes of pathways and borders
- barrier against root spread at transitional areas, such as between lawn and paved areas or lawn and tamped areas

2 Application areas

- pathways
- squares
- lawn
- sport grounds

3 Solutions

- easy to install, without digging a trench and foundations
- can be installed much easier than concrete edgings
- visually unobtrusive and yet very effective edging
- can be installed in straight lines or in curves and bends
- can be made in different materials: PP, galvanised steel or stainless steel
- different radii, also close to borders 1 m radius

TOP X

The drainage channel for private driveways, courtyards, patios and gardens.

TOP X

The drainage channel for private driveways, courtyards, patios and gardens.

1 Requirements

Drainage channels in private areas must

- continually withstand daily loads
- be easy to transport and simple to install
- be resistant to environmental effects (frost, heat and moisture)
- be visually pleasing

3 Solution

Because of this the new TOP X channels are very suitable for the drainage of private areas

- high stability and functionality
- low weight
- preformed supports for simple pipe connection
- gratings made of recycled composite, galvanised steel or stainless steel

2 Application areas

- predominately private areas
- garage entrances
- courtyard areas
- terraces
- gardens
- parks

Quick and easy installation

Produce trench in which to lay channel with frost resistant sub base.

Fill with concrete and compress to foundation.

Produce connection openings.

Fit accessories.

Lay channels.

Haunch the concrete.

Install surface coating.

TOP X installation videos.

Your way to the tender text on hauraton.com

1 Go to the product page.

- Choose your item.

The screenshot shows the hauraton website interface. At the top, there's a navigation bar with links for CIVILS, LANDSCAPING, AQUA, and SPORT. Below the navigation is a search bar and a 'My documents' link. The main content area is titled 'RECYFIX® PRO 100'. It features a 'Combi article' section with a table showing dimensions (Length: 1000 mm, Width: 160 mm, Height: 150 mm), internal channel cross-section (92 cm²), and weight (4,80 kg). There are also links for 'Product image', 'Technical drawing', 'Top view', 'Declaration of Performance', and the highlighted 'Tender text'. Below this, there are sections for 'Installation instructions' and 'Product data sheet'. At the bottom of the page, there are two more tables for 'Type 0105' and 'Type 0110'.

	Length mm	Width mm	Height mm	Internal channel cross-sect. cm ²	Inlet cross-sect. cm ^{2/m}	Weight kg	Item No.	Item No. Stainless steel
Type 01 with slotted grating SW 80/10 mm, locked	1000	160	150	92	278	4,80	47021	47026
Type 0105 with slotted grating SW 80/10 mm, locked	500	160	150	92	278	2,40	47022	47027
Type 0110 with slotted grating SW 80/10 mm, locked	1000	160	200	142	278	5,40	47023	47028
ZM 80/10 mm* recessed	700	160	500	145	518	2,80	41053	41058

/ = temporarily resistant

- = not resistant

g. w. L.= saturated aqueous solution
max. 72 h each exposure, then cleaning

The information on the chemical resistance of HAURATON products is valid for non-displaced media and average expected outside temperatures in Central Europe. Temperature, concentration and exposure time are highly relevant for chemical resistance. Please note our (temperature) specifications in the table. In case of uncertainty, we recommend checking the suitability of the materials by means of samples within the scope of application. Further information is available on request from our technical department.

HAURATON drainage channels made of polypropylene (PP) described above are highly resistant to diluted acids and alkalis. They are also resistant to de-icing salt used in winter maintenance operations. If necessary, the suitability of the grating and angle housing material in contact with corrosive media should be checked. Gratings and angle housings made of stainless steel, made of CNS 1.4301 or CNS 1.4571, are generally resistant to corrosion.

All information on application technology which we pass on personally, in writing or as part of tests is given to the best of our knowledge. In reality, however, the complexity of the use or the complete transmission of information by the customer is not within our sphere of influence. Therefore, we cannot assume any liability. Of course, we assure you that the high quality of our products fully complies with our General Terms and Conditions.

* Supplement to the resistance with respect to chemicals containing chlorine:
HAURATON products are generally not suitable for use as flow-off channels in swimming pools.
We do not produce (flanged) sealed channel systems that are suitable as flow-off channels or liquid-tight channels.

Resistance list FIBRETEC

	Medium	Concentration	FIBRETEC at 20° C		Medium	Concentration	FIBRETEC at 20° C
