

HIGH PERFORMANCE ANTISLIP INSERT BAR

DATA SHEET: ARB SERIES

DATE: Oct 2013

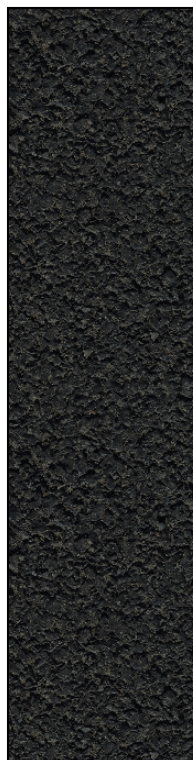

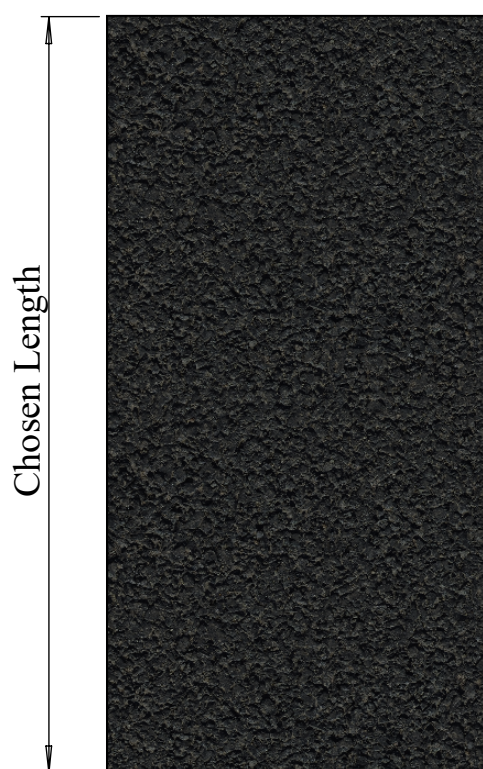

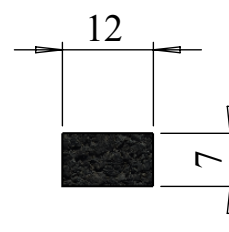

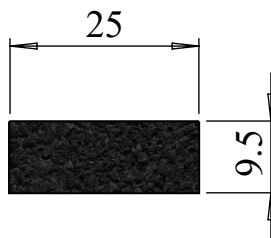

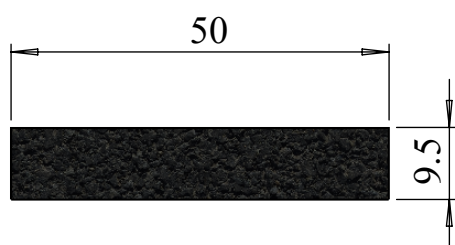

ISSUE: 2

ITEM: Insert Bar

Item: AATi™ Resin-based Carburaati™
Insert Bar with antislip particles bonded into the foot contact surface.

Application: For use on most stair and walkway surfaces, particularly smooth/polished wood, marble, stone etc which can be unacceptably slippery, particularly when wet.

Materials: MMA Resin Base. The standard colour is black but other RAL Colours are available. The finished colour required influences whether silicon carbide, aluminium oxide or quartz particles are used as the antislip ingredient.

Special attention should be given to installation of this product. For further advice please speak to a member of AATi's technical department.

Dimensions shown are nominal and subject to AATi manufacturing tolerances.
