

COLOURFUL TRANSFORMATIONS& **PROTECTION** THAT LASTS

We believe that protecting the outside of a building is just as important as protecting what's inside. Weathershield gives you confidence knowing that every wall and every trim has long lasting exterior protection. Weathershield delivers the ultimate protection for exterior masonry, wood and metal trim, so every finish can stay beautiful for longer.

Above: Masonry colours from left to right; Alpine, Burnt Brick, Primrose White and Wishing Well. **Cover:** Masonry; Mink White, Door; Deep Ocean Swell.

BEAUTIFULLY SIMPLE

COLOUR SCHEMES

When selecting a colour scheme for the outside of a building, the colours you choose need to be beautifully simple. That means using no more than three colours for the masonry, trim and accent areas. Take a good look at the surrounding properties too, before you start, as it's essential to compliment the colours within the local environment.

For the full Weathershield Colour range, Visit www.duluxtrade.co.uk/weathershield

START WITH THE MASONRY COLOUR

This is the biggest expanse of colour and with Weathershield you won't need to redecorate for many years, so you need a colour that will look smart and have a timeless appeal. Generally it is best to stick to one colour unless there are accent areas in other materials.

NOW FOR THE TRIM COLOUR

The right choice of trim colour adds definition and extra style to the exterior. Paler shades highlight features while darker options are perfect for period properties.

ADD AN ACCENT COLOUR

Doors are the main accent area. Because they are small relative to the whole facade they can take richer and brighter colours. When choosing an accent shade for metalwork and railings, make sure it's in keeping with the surrounding properties.

JOINERY & TIMBER CLADDING

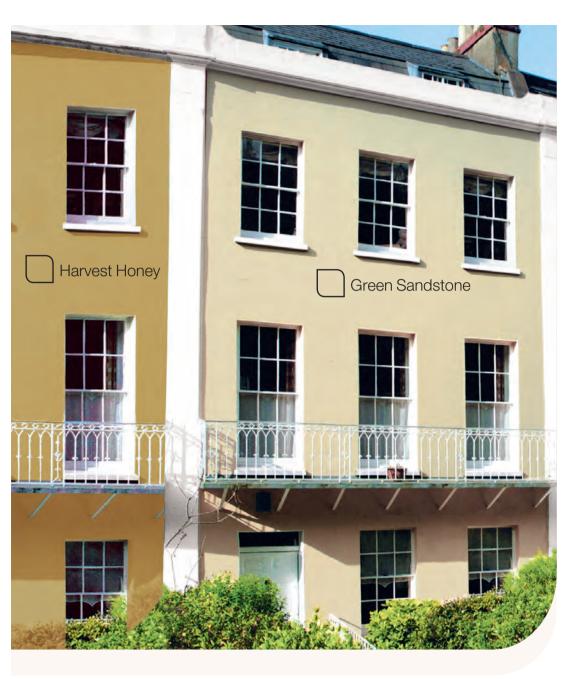

Woodwork and timber cladding are integral to many exteriors. In this guide there are carefully selected colours from the Dulux Trade Weathershield woodcare palettes that perfectly complement the masonry colours.

▼ TEST MASONRY COLOURS FIRST

Test a small patch of your chosen colour in situ, because different light conditions and surroundings can change how shades look.

CREAMS & GOLDS

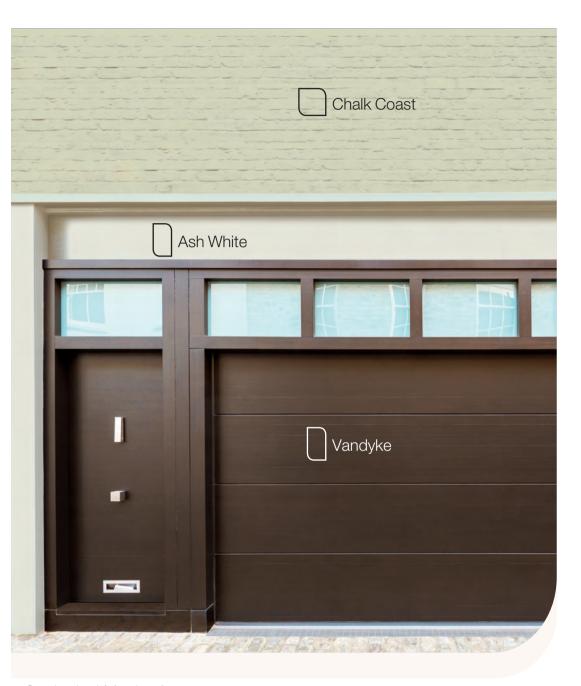

See colour chart, left, for colour reference.

Warm golden masonry colours have been used here along with a white trim. This is a harmonious colour palette with a little warmth to brighten any exterior within your surrounding environment.

NEUTRALS & STONES

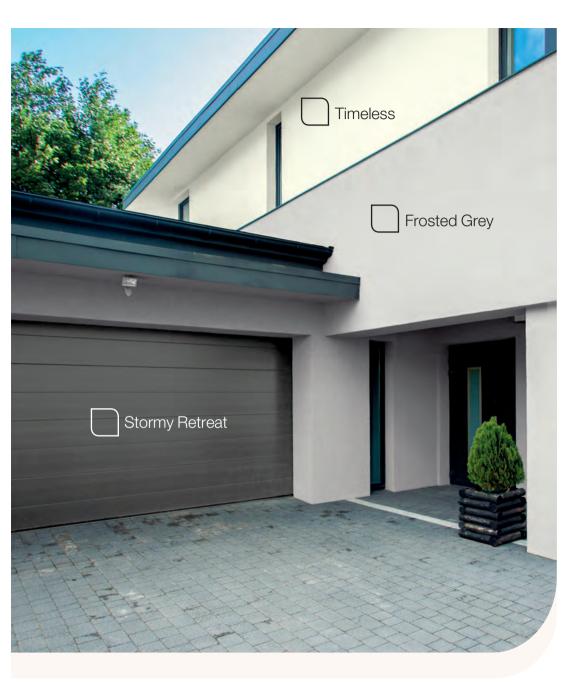

See colour chart, left, for colour reference.

A warm neutral masonry colour along with a lighter, subtle trim, gives the opportunity to introduce a striking accent colour, to give a stylish look to this modern home.

WHITES & GREYS

See colour chart, left, for colour reference.

Combining both a light and more striking shade of grey, gives a bold, clean finish to any exterior.

REDS & TERRACOTTAS

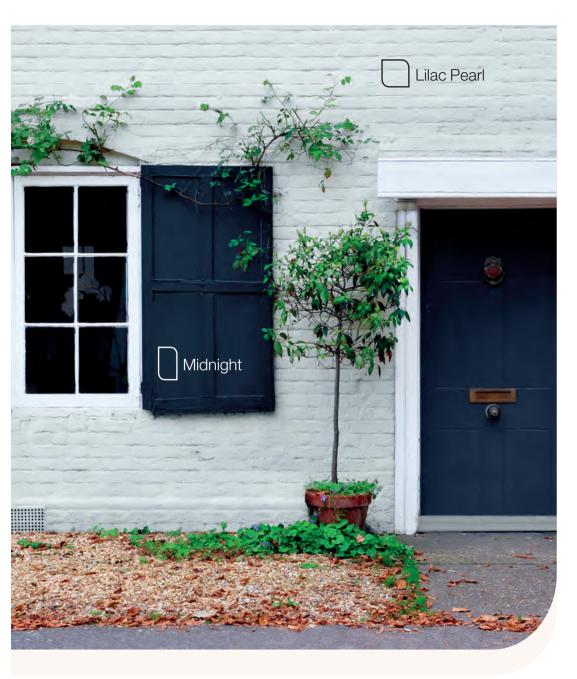

See colour chart, left, for colour reference.

Choosing a bold & bright accent colour for your front door along side a lighter masonry shade, gives a vibrant charm to liven up the outside of your home.

BLUES & LAVENDERS

See colour chart, left, for colour reference.

Delicate blue or lavender masonry colours create a homely exterior. Adding a deep blue accent colour for both shutters and doors, gives a unified contrast.

See colour chart, left, for colour reference.

Natural green masonry colours create a subtle exterior, and the use of a richer accent green for the front and garage door, give the perfect contrast.

GREENS & EMERALDS

PRODUCT INFORMATION

MASONRY & TRIM

Weathershield All Seasons Smooth Masonry

Shower resistant within 15 minutes and up to 15 years protection.

- A quick drying, solvent-based, smooth finish paint that helps to extend the outdoor decorating season on exterior masonry

Important instructions:

- Check the colour of the paint is correct before painting
- Paint for each area should be tinted at the same time or boxed together
- Use only paint from the original job for touching up

The colours contained within this colour card are a selection of those available in the Weathershield range. For an extended range of colours, please see the Weathershield Exterior Fandeck.

We have produced this colour card as accurately as printing will allow. Unfortunately we cannot guarantee an exact colour match, and the colours contained in this guide should not be relied on as such. Please ensure that you use a colour tester or sampler on the actual surface to be painted before decorating, as the substrate (and texture) of the surface can change the appearance of the final colour. Please note, colour testers indicate the colour of the product only and are not representative of the quality or sheen of the final product purchased.

Colour fading can be accelerated by a number of factors beyond our control and as such we cannot quarantee that any of the shades contained in this quide will not fade over time.

Dulux Trade Weathershield Quick Dry Preservative Basecoat+ (BP) contain propiconazole and IPBC. USE BIOCIDES SAFELY. ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.
