AF30

The AF30 range offers good quality entry level general purpose notice boards combining tried and tested construction with keenly competitive pricing. Boards are available in silver anodised finish or a choice of our 4 most popular RAL colours.
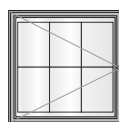

Back panels are galvanised steel with a white lacquerd finish allowing notices and posters to be easily and securely fixed with magnets. All doors are lockable, and fitted with plexichoc glazing, reversible hinges and seals.

A-Multi Aluminium

A-Multi Range

The A-Multi range comprises a suite of 2 and 3-bay, single or double-sided, aluminium notice boards in a number of popular sizes and offers an exceptional balance of economy and quality. Tried and tested construction methods are married with a wide variety of options and extremely competitive pricing to produce a range of boards guaranteed to appeal to a broad spectrum of users.

Boards are available in 2 styles, Contemporary with plain round posts and Decorative with ornate posts including base embellishers, collars and finials for a more traditional appearance. Both styles can be fitted with a choice of rectangular or bow-pattern header and all are available powder-coated in a choice of our 6 most popular RAL colours. For additional flexibility, all but the largest, 3-bay A1 boards are available in single and double-sided versions.

Each bay can be glazed or unglazed with glazed bays having back panels of galvanised steel with a white lacquered internal and grey external finish allowing notices and posters to be easily and securely fixed with magnets. All doors are lockable, and fitted with plexichoc glazing, reversible hinges and seals to ensure a weather-tight finish. All glazed bays also feature anti-condensation vents. Options for unglazed bays include signwritten panels for permanent information (contact details, service times etc.), self-healing rubber pinboard (creating an ideal space for public use without the need for a key), and g.r.p. encapsulated graphics panels for display of maps or interpretation panels.

Product Summary

The A-Multi range offers a tailor-made solution to the common requirement for budget-priced multi-bay aluminium notice boards and is particularly popular with clients such as local authorities and churches. In putting together this collection we have taken as the starting point, the AF30 range, our most popular budget range of aluminium boards, which offer an exceptional balance of quality and value for money. Numerous permutations can be built to suit your requirements. 3 bay sizes are available; A2, 6 x A4 and A1 (the latter equivalent to 9 x A4), with the majority being available in both single and double-sided versions. The A-Multi range has now been expanded to include 3 different types of unglazed bay including a choice of signwritten panels for permanent information, self-healing rubber pinboards suitable for laminated notices or g.r.p. encapsulated graphic panels, ideal for maps, information and interpretative panels.

When it comes to style, again the A-Multi offers something for every location, with a choice of Contemporary or Traditional models. The former offers a clean modern aesthetic of plain round posts, whilst the latter come with decorative posts including cast base embellishers, collars and finials. Both Contemporary and Decorative boards offer a choice of straight or bow-pattern headers.

Options available for glazed bays include self-healing rubber pinboard in lieu of the standard magnetic display back, graphic and sign-written panels. For an extra touch of finesse, single-sided boards can be specified with external back panels powder-coated to match frames and posts
