## CONTRACTORS TRAINING COURSES

### TAP INTO SOME OF THE BEST TECHNICAL ADVICE IN THE COUNTRY

The Wykamol Group like to ensure that contractors are installing our products to the highest possible standard and to achieve this, we arrange regular and well attended Contractor's Training Courses throughout the country. Please ask in branch or contact Head Office for information on course availability in your area.

### TRAINING COURSE CONTENT

Wykamol Contractor's Training Courses are suitable for start-up contractors and established contractors who would like to become a Wykamol Registered Installer\* and apply to become a member of CGS - Construction Guarantee Solutions.

\*Becoming a Wykamol Registered Installer is a process which begins with attending a Contractor's Training Course and includes inspection of at least 3 on-site projects. Contractors are then entered into our database against their chosen Merchant Partner and Branch. The awarding of Registered Installer status is at the discretion of the Wykamol Group's Technical Department. The Wykamol Group Limited are not responsible for any work completed by a Registered Installer.

## WHAT IS CGS?

CGS or Construction Guarantee Solutions issue insurance backed guarantees to homeowners when a member of CGS completes a project on their home.

Homeowners are insisting on insurance backed guarantees more and more, as the guarantee is valid in every eventually, even if the contractor is no longer trading. Considering that 70% of all companies go out of business within 20 years, why would you take the chance?

Sticking a pin into a phone book gives you a 20-1 chance of finding a contractor good enough to be backed by an insurance company authorised and regulated by the FSA.

When comparing, quotes ask competing contractors which of these they can offer (if any):

1. Actual insurance period of 10 years (with the option of extending this period when it expires)
2. Independent checking for technical competence
3. Health and safety competence and financial stability
4. Underwriter that is authorised and regulated by the FCA
5. Access to the Financial Ombudsman Service
6. Insurance certificate for each property
7. Security of the Financial Services Compensation Scheme
8. NHBC and Zurich Approved
9. Insurance Premium Tax (IPT) applied (as required by law for all genuine insurance)
10. Automatic free assignment on sale of property
11. Protection against contractor failure for any reason

For more information on becoming a member of CGS and issuing insurance backed guarantees, contact your Area Technical Manager.

Ask in Branch for a list of Contractors who can offer CGS Guarantees.
