CLIMATE DESIGNERS

TEMPO LST /  
TEMPO LST DBE

# JAGA VALUES

Jaga is built on five core values which run through everything we do.

We are devoted to developing heating, cooling and ventilation solutions that use less energy and raw materials. The most environmentally-friendly way is the Jaga way!

## RESPECT NATURE

Striking the balance between man and the environment, we must respect our planet and work to preserve it for the future.

## RESPECT NATURE

## AWAKE THE ARTIST

We create technology to deliver high performance. Our products are also works of art, designed to compliment the surroundings of any room.

## AWAKE THE ARTIST

DREAM A  
FUTURE

### CREATE EMOTION

Life is about passion, emotions and experiences and we use all of these to create exciting and unique designs.

CREATE  
EMOTION

### BUILDING BRIDGES

We choose to work with like-minded people and companies to unite forces to build a better world.

BUILDING  
BRIDGES

# TEMPO LST

## SAFE, SUBTLE AND CLASSIC DESIGN

Jaga's Tempo LST is our most popular entry level LST with:

- The widest range of sizes in wall mounted, freestanding and continuous models available
- Energy savings of up to 15%\*
- Ease of handling and storage
- Dynamic boost effect (DBE) technology, meaning greater heat output and compact sizes even at low temperatures (see DBE page 10)

- Parts easily replaced if damaged without the cost of replacing the whole radiator
- Works with Jaga's ventilation solution 'Oxygen' to deliver combined ventilation and heating in one system.

Jaga's Tempo LST is a popular choice for low surface temperature heating solutions. Widely specified in care homes and retirement living for its safety features, energy efficiency, and having been designed to meet the NHS Estates guidelines for heat emitters.

\*As tested by BRE

**Award winning Low-H<sub>2</sub>O technology**

**Wide range of sizes with a choice of designs**

**Outstanding performance with low temperature systems**

**Valve options can be concealed in casing**

**No radiant heat loss to the wall**

**In stock, fast delivery**

**Split deliveries**

**BIM files available**

# LOW-H<sub>2</sub>O: LIGHTER, FASTER AND EFFICIENT

## THE LOW WATER CONTENT RADIATOR

Jaga's Low-H<sub>2</sub>O radiators contain 90% less water than that of a steel panel radiator, meaning they are faster to heat up and cool down. This means Low-H<sub>2</sub>O radiators react faster to the occupants' needs as well as changes to ambient temperature. This ensures better comfort with less energy consumption, no wasteful over-heating and reduced demand on the heating system itself. They also have no heavy steel panels that require pre-heating, are far lighter to install and remain much lighter when fully filled during usage. The ultra-modern aluminium and copper heat exchanger, which comes with a 30 year guarantee provides rapid energy efficient heat to any space.

RESPECT  
NATURE

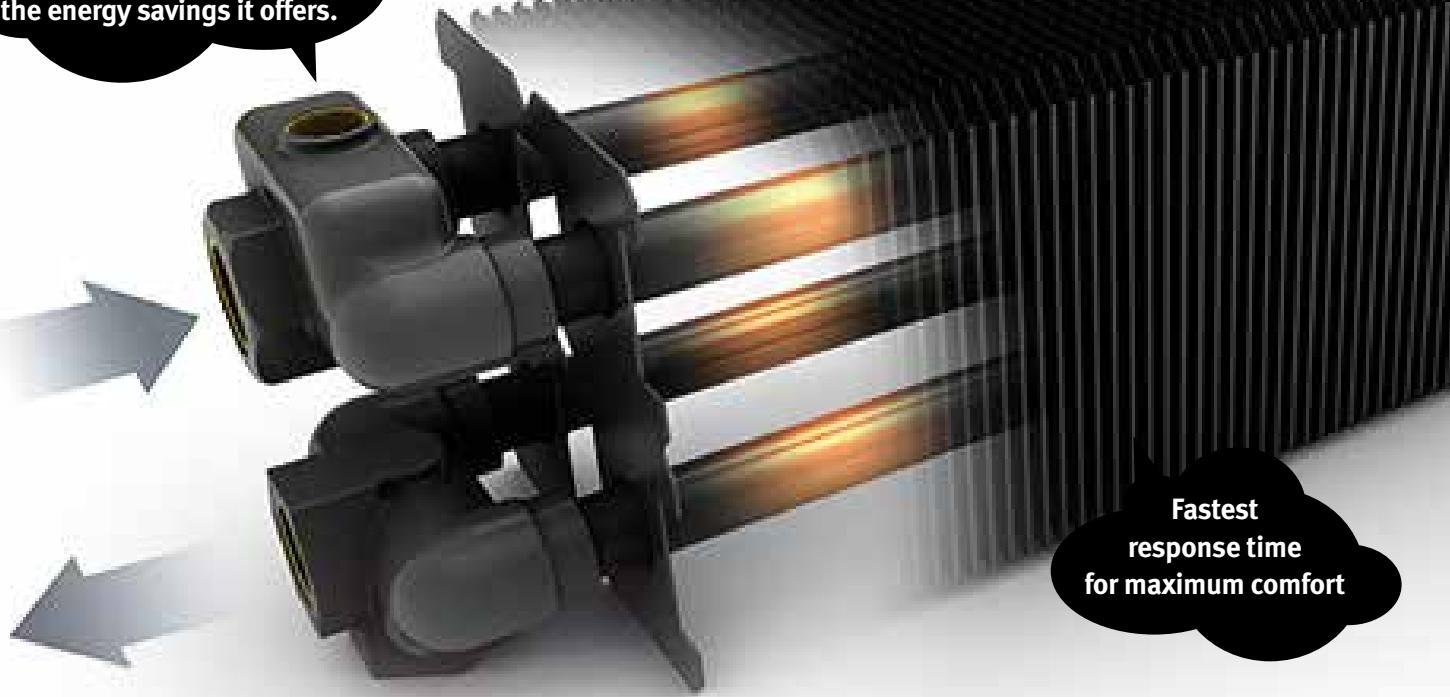

Research by KIWA show that Low-H<sub>2</sub>O radiators consume between 9 and 16%\* less energy than a system with steel panel radiators. They achieve the desired temperature faster with less heat wasted through unnecessary over-heating, common in heavier radiators.

### Comparison Low-H<sub>2</sub>O/panel radiators

|            | Water temp. > 50°C<br>Saving | Water temp. ≤ 50°C<br>Saving |
|------------|------------------------------|------------------------------|
| Renovation | 13%                          | 16%                          |
| New-builds | 9%                           | 10%                          |

There is a clear connection between the weight of the radiator, its reaction time and the energy savings it offers.

## COMPARISON OF RESPONSE TIME TO TEMPERATURE CHANGES

## PROVEN TO BE THE WORLD'S MOST ECONOMICAL RADIATOR

Jaga's Low-H<sub>2</sub>O technology has been thoroughly tested over the years by a variety of independent bodies, receiving the title of Most Economical Radiator following tests carried out by the Dutch testing body KIWA. Jaga's Low-H<sub>2</sub>O radiator achieves consistently high efficiency performance standards every time.

Low-H<sub>2</sub>O radiators are more efficient at all water temperatures, making them the perfect partner for renewable systems and boilers alike. In all conditions

Low-H<sub>2</sub>O radiators achieve the maximum scores set by ISSO. Without a maximum score\*, the Low-H<sub>2</sub>O exchanger would achieve even higher. KIWA found Low-H<sub>2</sub>O to be at least 5% more economical than underfloor heating.

*\*The minimum required score is 1.00 (100%) for Low-H<sub>2</sub>O as per the quality declaration, and average score of 0.05 (95%) for underfloor heating, according to NEN7120, Table 14.1, delivery efficiency up to 8m.*

# DYNAMIC BOOST EFFECT (DBE) TECHNOLOGY

RADIATORS THAT ACTUALLY WORK  
WITH HEAT PUMPS

Heat pumps and solar thermal energy generally require much larger radiators as they operate with very low water temperatures that often don't exceed 35°C. Low-H<sub>2</sub>O radiators do not need to increase in size when working with lower water temperatures.

With DBE technology the same heat output can be achieved from a similar size radiator compared to a radiator working with a gas or oil fired heating system, allowing the installation of renewable heating systems without compromising on comfort and aesthetics.

Jaga's innovative DBE technology is a self-regulating system which responds automatically to changes in room temperature. When in **comfort mode** the DBE system operates by measuring radiator water temperature and room air temperature to boost outputs as needed. DBE can also be manually triggered to further increase outputs for approximately 15 minutes in boost mode.

Low-H<sub>2</sub>O radiators still deliver effective heating even with DBE in standby mode. DBE however is not a standalone fan or air conditioner and needs to be partnered with the Low-H<sub>2</sub>O heat exchanger to be effective.

## DIMENSIONS (in mm)

Tempo LST wall mounted

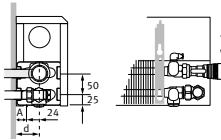

Tempo LST freestanding

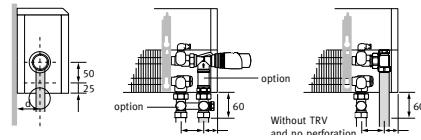

\* Max. when using Jaga TRV and Head

Example with Jaga valve:  
to the wall

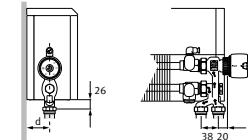

Totally concealed  
within the casing  
Without TRV  
and no perforation

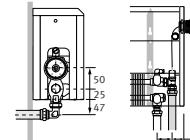

Example with Jaga valve:  
to the floor

Example with Jaga Pro valve:  
to the wall or to the floor

Example with  
Jaga top valve:

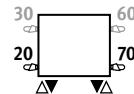

| Type  | Connection to floor d (mm) | Connection to wall A (mm) | Clearance h (mm) | B        | BS        |
|-------|----------------------------|---------------------------|------------------|----------|-----------|
| 10/11 | 53                         | 29                        | 100              |          |           |
| 15/16 | 78                         | 53                        | 120              |          |           |
| 20/21 | 103                        | 79                        | 150              |          |           |
|       |                            |                           |                  | <b>B</b> | <b>BS</b> |
| 10/11 | 119                        | 130                       |                  |          |           |
| 15/16 | 169                        | 180                       |                  |          |           |
| 20/21 | 219                        | 230                       |                  |          |           |

## CONNECTION

Jaga valves can be concealed within the standard casing. Other valves may be partially visible.

High level valve details:  
see "Valves and TRVs".

## COLOURS

Environmentally friendly, scratch-resistant, high UV resistant coating.

Colour:

- White RAL 9010 (101), soft touch satin finish

## ORDERING CODE

| code              | height     | length          | type | colour |
|-------------------|------------|-----------------|------|--------|
| <b>TEMW . 040</b> | <b>060</b> | <b>10 . 101</b> |      |        |

For example using ordering code TEMW 040 060 10 101 will result in a Tempo wall model with white casing, 400mm high, 600mm long and type 10.

## ORDERING CODE WITH DBE

| code              | height     | length          | type | colour | Option |
|-------------------|------------|-----------------|------|--------|--------|
| <b>TEMW . 040</b> | <b>080</b> | <b>10 . 101</b> |      |        | /DBE   |

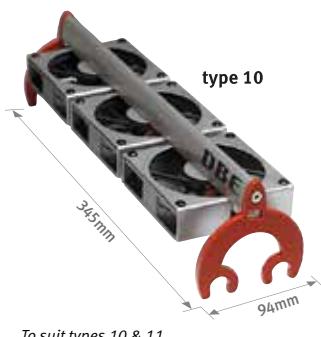

Products with DBE have outputs shown based on 'comfort' mode (see page 9).

For other outputs, please see [www.jaga.co.uk](http://www.jaga.co.uk)

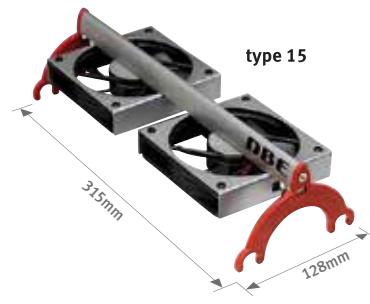

## OPTIONAL: DBE

### DBE UNIT DBEU.10

To suit types 10 & 11

### DBE UNIT DBEU.15

To suit types 15, 16, 20 & 21

## STOCK ITEMS

All wall mounted models up to 2000 long in all heights are held in stock, all other sizes are made to order.

All freestanding models are made to order.

Split delivery options available.

Please contact our customer service team to discuss your requirements and availability on large quantity orders.

Full Guarantee and Conditions of Sales available on request.

# DELIVERY

Our radiators are delivered in easy to handle compact packaging.

Standard delivery:

- Low-H<sub>2</sub>O heat exchanger with cutouts for valves, fixing kit, extended air vent 1/8" and drain plug 1/2"
- cover plate in white effect for the side panel at the opposite end from the valve

Delivery with (optional) DBE:

- number of DBE unit(s) varies according to the length
- operation, control and power supply 12VDC
- mounting instructions included
- fan units packed separately for ease of handling

# OXYGEN

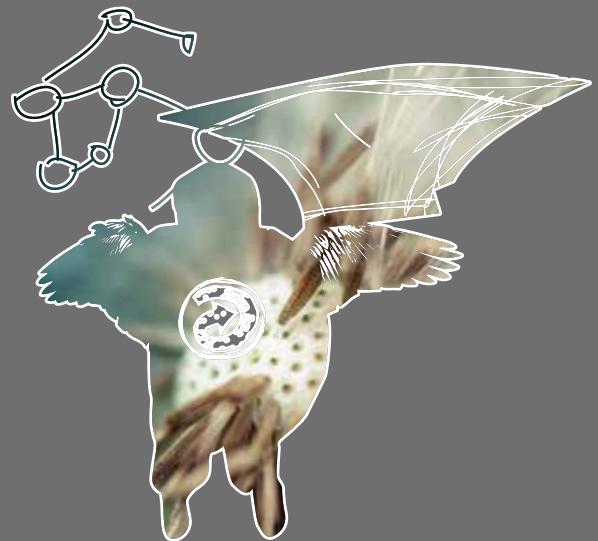

## DEMAND CONTROLLED HEATING & MECHANICAL VENTILATION

Jaga Oxygen works alongside our Low-H<sub>2</sub>O radiators to deliver an energy-efficient, intelligent and fully programmable heating and ventilation solution.

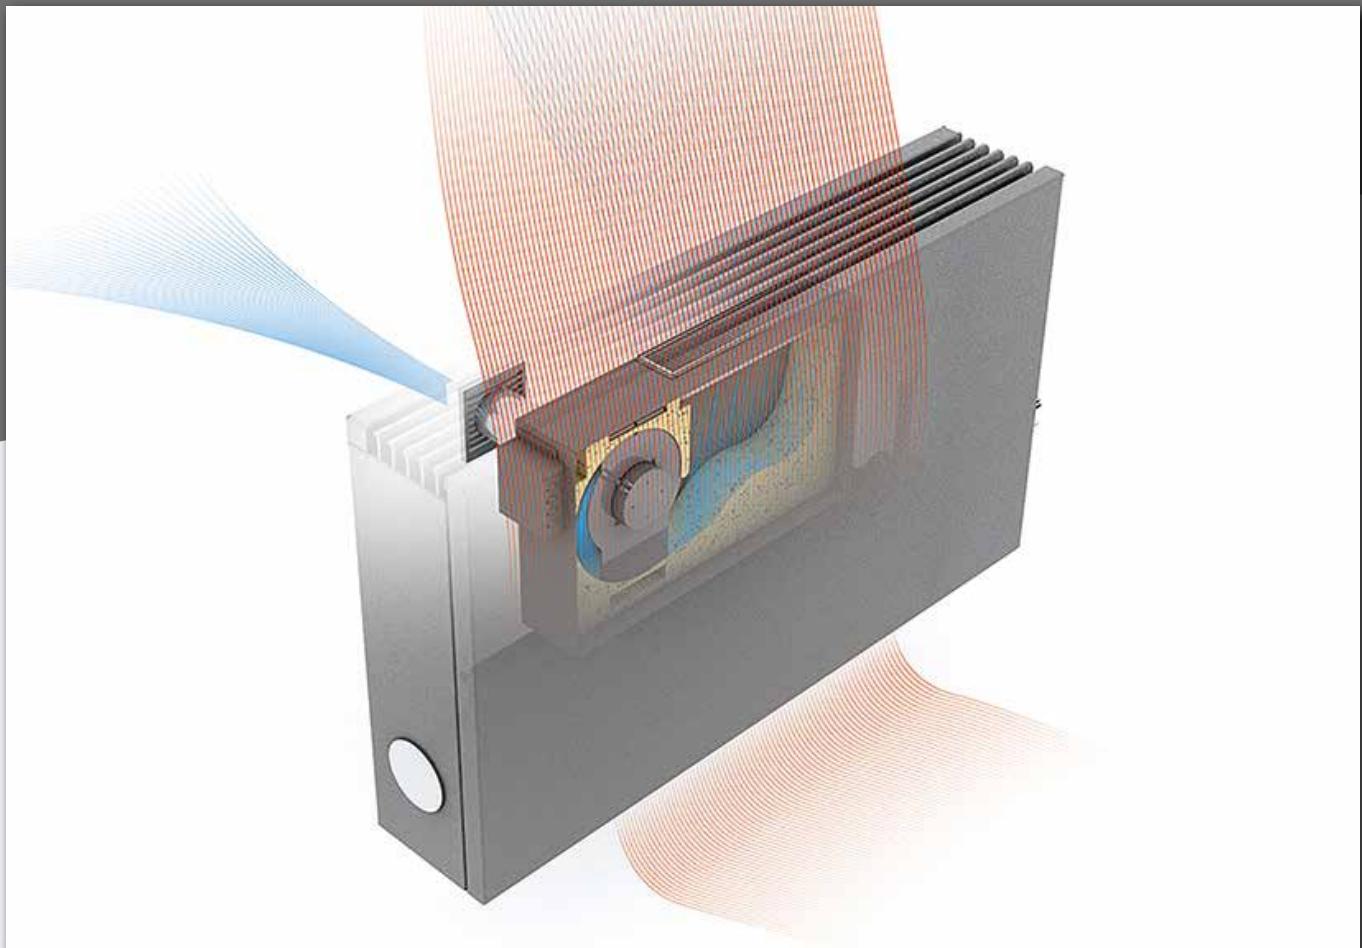

This supply and extract system brings in fresh air at low-levels and extracts stale room air at high-levels creating optimal air movement, ensuring optimum indoor air quality (IAQ).

Due to its modular design this system is particularly effective for rooms with high occupancy such as classrooms, and rooms of lower occupancy such as offices and care homes.

Oxygen delivers clean, filtered, fresh air on demand and efficiently, in buildings of any age or type.

BUILDING  
BRIDGES

## WHY CHOOSE DEMAND CONTROLLED MECHANICAL VENTILATION?

Demand Controlled Mechanical Ventilation only vents fresh filtered air when required, meaning that it is the most energy efficient method of ventilation whilst also eliminating the drawbacks of draughts and noise pollution. CO<sub>2</sub> levels are constantly monitored meaning that if occupancy levels rise or fall the system will draw in more or less fresh air, ensuring good indoor air quality is always present.

This control method also allows the system to react to other parameters such as temperature, thus also increasing comfort.

Jaga Oxygen is an energy efficient, innovative and highly responsive heating and ventilation solution providing automated:

- CO<sub>2</sub> monitoring
- Clean, fresh air on demand – adapting to the changing requirements of the room
- Heating even at low water temperatures
- Free night-time 'cooling' for energy efficient secure summer time cooling

# TEMPO LST CONTINUOUS

## CONTINUOUS CASING **FROM WALL-TO-WALL** BASED ON THE TEMPO LST CASING.

Jaga's innovative 'click' system allows for assembly of all components without tools. Suitable for a range of applications no matter how large or small.

With Jaga Continuous Tempo LST heights start from 200mm increasing in 100mm increments up to a recommended maximum height of 700mm. Lengths are made up of standard Tempo casings ranging from 400mm up to 3000mm with joining strips to make bespoke runs, that can include sections with no elements going into the casings for aesthetic or heat load requirements.

## JAGA TEMPO LST CONTINUOUS OPTIONS & FEATURES:

- Brackets with cut outs for pipe work (subject to height and element type)
- Wall to wall casings for aesthetic appearance.
- Can be made up of active and inactive units.
- Internal & external corner sections
- Split deliveries available of elements & brackets with casings to follow
- A full site survey by a Jaga product specialist to site measure and offer advice can be arranged.

The indicated outputs with  $\Delta T$  50 are the exact outputs, measured in accordance with EN 442. An average correction factor is given in this table for all other  $\Delta T$  outputs, applicable for all dimensions.

These correction factors are to be used for guidance only.

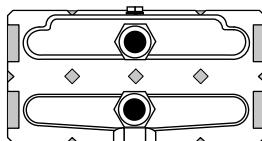

# TEMPO LST • HEAT EXCHANGERS OVERVIEW & PRESSURE DROP

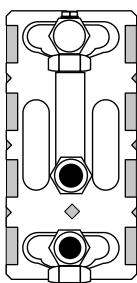

Type 10

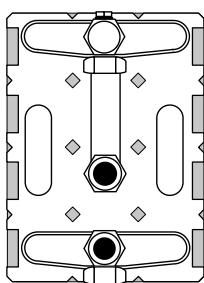

Type 15

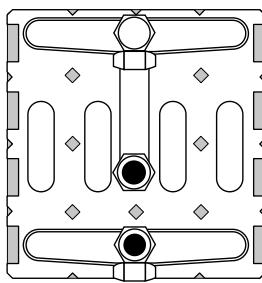

Type 20

Type 11

Type 16

Type 21

## TO CALCULATE FLOW RATE:

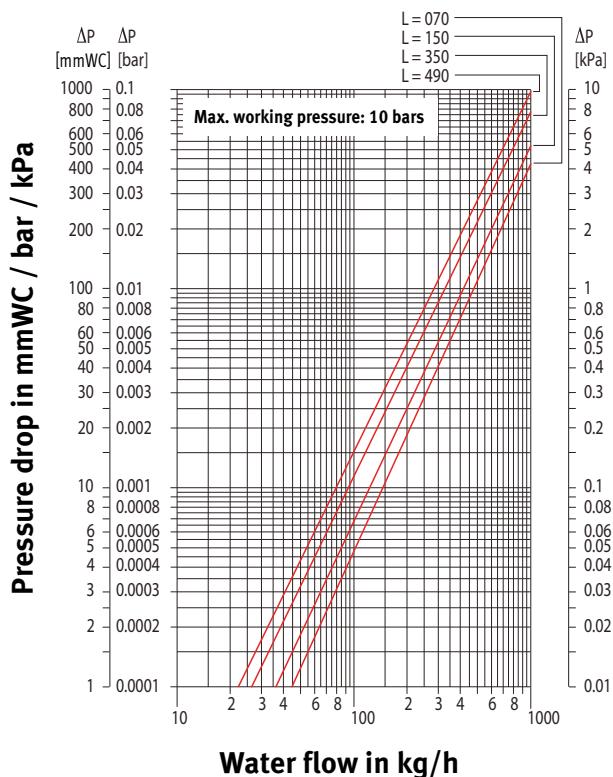

$$\text{Corrected output [Watts]} \times 3600$$

$$\text{Specific heat capacity [J/kg.}^{\circ}\text{C}] \times [\text{flow temp} - \text{return temp}]$$

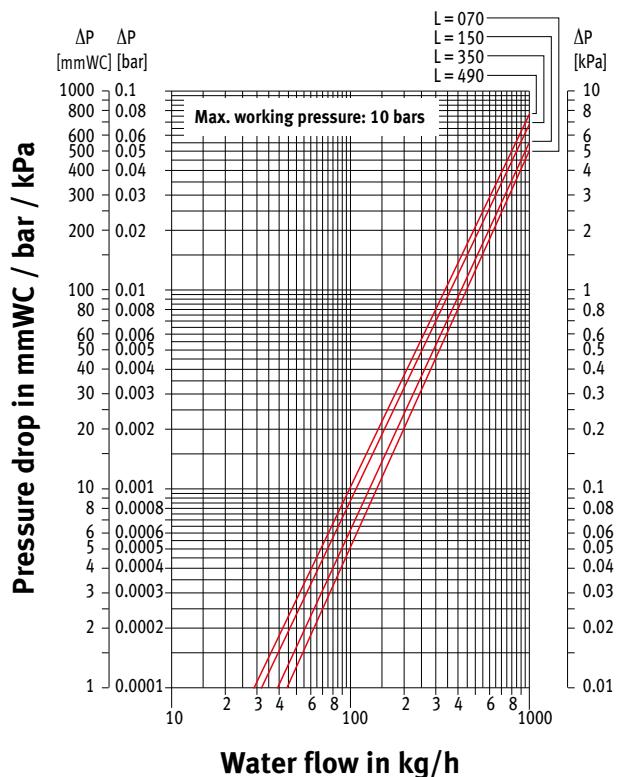

For central heating hot water systems  
the specific heat capacity of 4187 can be used:  
e.g. for a radiator with a 1000 Watt output with  
a flow temp of 70°C and a return temp of 50°C.

$$\text{Mass flow} = \frac{1000 \times 3600}{4187 \times (70-50)} \\ = \mathbf{42.99 \text{ kg/hr}}$$

# VALVES, TRV HEADS AND ACCESSORIES

OUR SPECIALLY SHORTENED VALVES CAN BE CONCEALED WITHIN THE STANDARD CASING. OTHER VALVES MAY BE PARTIALLY VISIBLE.

## SLEEVE COUPLING M24

### Copper Tube

| CODE     | Tube Ø |
|----------|--------|
| 5094.110 | 10/1   |
| 5094.115 | 15/1   |

### Steel Tube for C.H

| CODE     | Tube Ø |
|----------|--------|
| 5094.501 | 1/2"   |

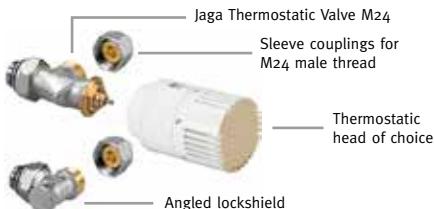

Please note other couplings are available on request.

## JAGA PRO THERMOSTATIC VALVE

- with pre-setting
- for two pipe
- for connection to the floor
- complies to European standard EN 215.1

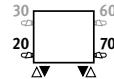

## JAGA THERMOSTATIC VALVE – WALL

Consists of the following :

- 5090.407 type 06 angled TRV
- 5090.111 type 06 angled lockshield valve
- 5090.1125 white TRV head
- Adaptors to suit 15mm copper pipe as standard

To suit pipework to wall  
(Same end 20/70 connections).

## SLEEVE COUPLING 1/2"

### Copper Tube

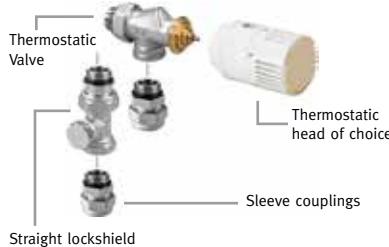

| CODE     | Tube Ø |
|----------|--------|
| 5098.110 | 10/1   |
| 5098.115 | 15/1   |

### Steel Tube for C.H

| CODE     | Tube Ø |
|----------|--------|
| 5094.502 | 1/2"   |

Please note other couplings are available on request.

## JAGA THERMOSTATIC VALVE – FLOOR

Consists of the following :

- 5090.405 angled TRV
- 5090.109 straight lockshield valve
- 5090.1125 white TRV head
- Adaptors to suit 15mm copper pipe as standard

To suit pipework from the floor  
(Same end 20/70 connections).

## HIGH LEVEL JAGA TOP VALVE

Consists of the following :

- 5090.13001 High Level TRV set (including valve, capillary & head).
- 5090.109 straight lockshield valve
- 5090.110 angled lockshield valve
- Adaptors to suit 15mm copper pipe as standard

To suit pipework from the floor  
(Same end 30/60 connections).

## TRV HEADS

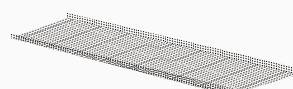

| CODE      | CODE      |
|-----------|-----------|
| 5090.1125 | 5090.1151 |

| CODE      | CODE      |
|-----------|-----------|
| 5090.1150 | 5090.1152 |

## PENCIL PROOF GRILLE

Same colour as casing.

| CODE | Height | Length | Type |
|------|--------|--------|------|
| 5606 | 000    | 050*   | 10*  |

\*to suit casing length and type

## ARTHritic AID

| CODE      |
|-----------|
| 5090.ARTH |

# WHAT MAKES JAGA SUSTAINABLE?

Sustainability does not just start when the product is in use, but from the sourcing of the materials and throughout the product life cycle. Being sustainable and reducing our impact on the environment is what we do. There is no Planet B\*. The values are the ethos on which the company bases everything.

## HIGHEST EFFICIENCY RATINGS

Jaga's Low-H<sub>2</sub>O uses less energy than any other radiator and contains 90% less water than that of an equivalent steel panel. Meaning faster response times and no wasteful over-heating.

## BUILT TO LAST

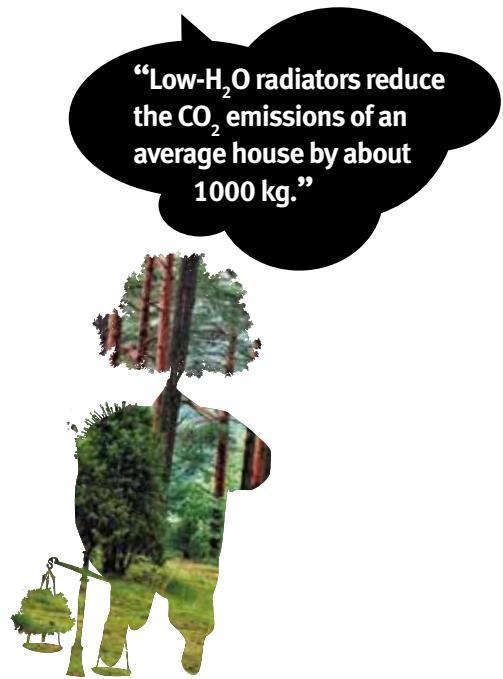

The heat exchanger consists of aluminium heating fins, copper and brass irrigation tubes and brass collectors. Totally rust-free, resistant to very high working pressures and with a 30-year guarantee. A long life means lower environmental impact.

## EFFICIENT USE OF MATERIALS

Since copper and aluminium are such efficient heat conductors, only a relatively small quantity of these materials are required, this includes the casing. A Low-H<sub>2</sub>O radiator weighs much less and uses a lot less materials than a steel panel radiator.

## FULLY RECYCLABLE

Copper and aluminium may not seem like the most ecological choice, but due to their high efficiency, long life, and the fact that these valuable materials are always fully recyclable. It will ultimately result in an improved LCA score.

*RESPECT  
NATURE*

\*Ban Ki-Moon,  
Former Secretary General  
of the UN

## JAGA LOW-H<sub>2</sub>O RADIATORS REDUCE WASTE

Life cycle analysis (LCA) according to the Ovam Ecolizer database and weight.

Example for a 10 kW heating system, 45/35/20 temperature profile.

BEST LCA - SCORE

|                               | underfloor heating | cast iron radiator | steel panel radiator | Jaga Low-H <sub>2</sub> O radiator |
|-------------------------------|--------------------|--------------------|----------------------|------------------------------------|
| LCA Score                     | 248700             | 248744             | 185853               | 66517                              |
| Total weight incl. water (kg) | 6252               | 360                | 216.7                | 48.8                               |

### What is an LCA score?

LCA or 'Life Cycle Assessment' is a system designed to compare products and their overall impact on the environment. This looks at all processes from design, materials sourced, manufacturing, energy usage until the product is ultimately 'retired'. Governments are trying to standardise LCA systems and to integrate them into the legislation. Jaga uses Ovam's Ecoliser 2.0 based on the Eco-Indicator EI-99 database. The lower the LCA score, the less adverse impact on the environment. Jaga Low-H<sub>2</sub>O radiators score significantly better than other radiators or heating systems.

CLIMATE DESIGNERS

## VENTILATION IN SCHOOLS

Jaga UK's one-hour Ventilation in Schools CPD seminar certified by RIBA and CIBSE is designed to keep HVAC professionals abreast of recent advances and compliance in educational based environments.

This includes the techniques and challenges faced by specifiers in designing the most appropriate solutions.

Each seminar addresses current practices whilst helping designers to identify technical solutions and harness the benefits of various systems.

Jaga UK CPD seminars can be held at a venue of your choice.

### CONTENT OF CPD:

- How to meet BB101 requirements
- How to maintain acceptable indoor air quality (IAQ)
- Effects of poor IAQ
- The importance of maintaining ideal CO<sub>2</sub> levels
- Relevant regulatory requirements
- Natural and powered solutions
- How to achieve effective ventilation

To arrange a CPD or to request more information please contact CPD Coordinator on the details below:  
✉ Jaga House, Orchard Business Park, Ledbury, HR8 1LG - ☎ 01531 631 533 - email us @ [cpd@jaga.co.uk](mailto:cpd@jaga.co.uk)  
You can also register online at [www.jaga.co.uk/technical-support/cpd-seminar-request](http://www.jaga.co.uk/technical-support/cpd-seminar-request)

BUILDING  
BRIDGES

# THE END OF THE LINE... AT EMMITTER SELECTION TERIA

one-hour Heat Emitter CPD seminar is designed to keep professionals up-to-date with the choice of heat emitters. We look at their effect on the energy performance and costs of the building before exploring in-depth the faced in designing the most appropriate heating

ms to address some of the issues that building service and designers can face when looking at heat emitters back on effect of the chosen selection.

seminars are accredited by CIBSE, and can be held at your choice.

## CONTENT OF CPD:

The basics covering heat sources & distribution

Regulations: building and specific regulations for different buildings

The types of heat emitters available

Looking at combined approaches

Designing the best solution

CPD Coordinator on the details below:

## TRENCH & PERIMETER HEATING

Jaga UK's one-hour Facade Heating CPD-certified seminars is designed to keep HVAC professionals abreast of recent advances in facade heating techniques before exploring, in depth, the challenges faced by building services engineers in designing the most appropriate solution.

The seminar addresses current practices whilst helping design engineers to identify technical solutions and harness the benefits of the latest natural and fan-assisted trench and perimeter heating systems.

Jaga UK CPD seminars are accredited by CIBSE, and can be held at a venue of your choice.

## CONTENT OF CPD:

Design considerations for trench heating

Influences of trench configuration

When to use low level floor mounted heating

Working with renewable energy sources

Calculating heat outputs

Case studies of recent facade heating projects

EN16430 legislation

Design & performance criteria

To arrange a CPD or to request more information please contact CPD Coordinator on the details below:

#### About Jaga

Jaga manufactures a wide range of energy-efficient, heating, ventilation and cooling solutions.

Originally founded in Belgium in 1962 and established in the UK in 1991, Jaga UK is now one of the UK's leading distributors of award-winning, energy-saving, low-water content and designer products.
