**EJOT**  
**Opti**core

PATENT No: 08017503.7-2424

The total, innovative  
fastening solution  
for membrane faced  
composite panel systems

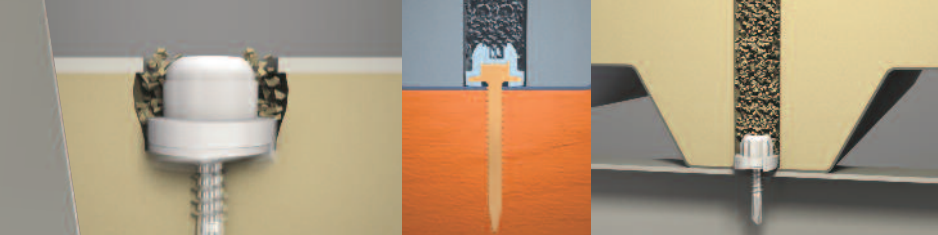

# Innovative development...

Industry calls for faster build times while the regulations set the boundaries.

At EJOT UK, we embrace this challenge and make objective development our forté.

The Opticore fastener has been created through challenging the options, visualising an alternative and analysing its development, every step of the way.

# through full system analysis

The result is a revolutionary piece of engineering that not only cores, drills and fixes in one easy operation, but also improves thermal retention properties.

And because it is made by EJOT, Opticore's range of applications include both hot and cold rolled steel and timber substrates..

A bi-hex and torx dual driving system completes the optimum coring solution.

**EJOT** **Opticore**

# Optimum coring fastener range

Light Section 1.2 to 3mm steel sections

Carbon Steel  
Opticore LS 5.5 x 25

Stainless Steel  
Opticore JT3-3-5.5 x 25

Heavy Section 4 to 12mm steel sections

Carbon Steel  
Opticore HS 5.5 x 38

Stainless Steel  
Opticore JT3-12-5.5 x 40

Timber sections

Carbon Steel  
Opticore TS 6.3 x 45

Stainless Steel  
Opticore JT3-2-6.5 x 50

Stitchers

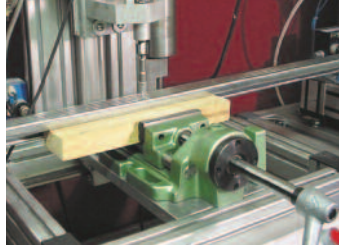

Carbon Stitcher  
SF 6.3 x 25

Stainless Steel Stitcher  
JT3-2-6.3 x 25

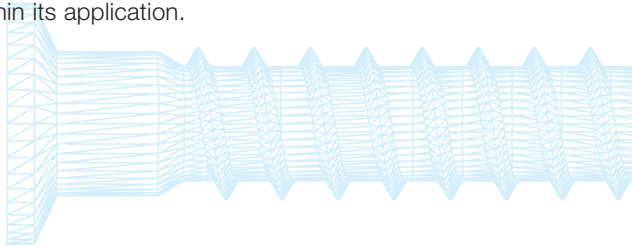

# The EJOT Applitec Centre,

EJOT® products are high in quality, always corresponding to current technical standards. The natural evolution of the market requires a fast response to maintain this quality and to meet UK and European standards, before they are even issued.

# the Centre of innovation.

EJOT® developed its unique APPLITEC centre; the most comprehensive fastener testing facility in the UK. It's here we undertake testing for all aspects of fastener technology, from simple dimensional and 3-dimensional analysis to testing the mechanical, structural and material dynamics of both the product and within its application.

# EJOT®
